Deposit of \$10.00 required to insure return of plans, etc. Proposal to be enclosed in sealed envelopes and addressed GEO. McK. WILLIAMSON, Lt. Col., Q. M. C. (3)

#### PROPOSALS FOR BRIDGES.

BRIDGES—U. S. Engineer Office, Portland, Ore.—Sealed proposals for eight steel swing bridges for Dalles-Celilo Canal will be received here until 11 o'clock a. m. December 7, 1914, and then publicly opened. Information on application. JAY J. MORROW, major engineers.

#### PREVENTABLE FIRES.

By the National Board of Fire Underwriters.

Three fires from three different causes, all preventable, were recently outlined in the one issue of a morning paper.

A young lady in Oakland stepped on an explosive match. It blazed up, caught her skirt, and burned her to death before aid could come. A careless smoker threw a match into a waste paper basket, but the fire was fortunately extinguished before any damage was done. A woman was cleaning gloves with gasoline too close to a flame. The fumes ignited, and before her husband could rescue her, both had been severely burned.

In several states laws have been enacted doing away with the old poisonous and explosive match. It has caused infinite loss and suffering. Babies have died from chewing the poisonous tip, and hundreds of lives and millions of property have been destroyed by it. Instances have been known where such matches lying in boxes on grocers' shelves, have become ignited by friction caused through shifting about, just in the ordinary course of daily trade. In storerooms the same thing has happened. No doubt many fires commonly attributed to spontaneous combustion, have arisen from just this cause.

Laws against the manufacture and sale of such matches have already been enacted in several states, and should be generally adopted. Only those matches should be permitted to be sold and used that strike only on a prepared surface, or ignite on the point and not on the side of the head. These cannot be ignited by side friction or by a careless step. They are safety matches, and none other should be used or sold.

A little knowledge and forethought would teach anyone that the fumes of gasoline are highly inflammable, and are given off so rapidly that a small room is easily filled with them. Fire will then cause on a larger scale the same explosion that gives power to the gasoline engine. Many lives are lost through a lack of appreciation or

thought regarding this simple scientific fact.

The storage of gasoline in groceries and general stores at every cross-road's corner has increased this hazard very materially. Within the last ten years, on account of the rapid increase of automobiles, gasoline has been placed on sale in large quantities by merchants who previously handled practically none. Hence the necessity of strict laws and ordinances governing its storage and sale, and the instruction of the people as to its proper use. It is not so much the gasoline itself that should be guarded as the fumes rising from it. So long as the gasoline is in closed metal containers, it is practically harmless. Only when the container is open and the fumes are permitted to spread, is there any serious danger. As these fumes are heavier than air, they naturally sink to the floor, and thus become more dangerous than if they rose into the upper air of the room, beyond the reach of flames. This fact accounts for the many accidents and fires in cleaning establishments and other places where a great deal of gasoline is used.

For the careless smoker who throws cigarette stubs and matches into waste paper baskets and other combustibles, there is no lesson except that of harsh rebuke or punishment. No other teaching would make any impression on him. A large number of our fires are caused by just such careless acts. That a destructive blaze did not result from this man's act was due to the vigilance of others and not to his own care.

#### INCORPORATIONS

Invented Building Products Co., construction Co. To construct buildings, pavements, etc. Capital Stock, \$100,000; 100,000 shares at \$1 each; amount subscribed, \$250. Place of business, San Francisco. Directors—J. Cruz, S. Fasser, L. Johnson, J. Cerda, F. Ziebosch, 50 shares each.

Spring-Hub Automobile Wheel Company. To deal in certain rights and patents. Capital Stock, \$200,000; 200,000 shares at \$1 each; amount subscribed, \$3. Place of business, San Francisco. Directors—E. Kher, C. Westermann and W. L. Kearney, 1 share each.

Costello-Lang Company. To handle auto vehicles, tires and tubes. Capital Stock, \$150,000; 150,000 shares at \$1 each; amount subscribed, \$25. Place of business, San Francisco. Directors—J. P. Costello, A. J. Lang, W. W. Jones, J. L. Read and W. A. Holton, 1 share each.

McAlpine Mines Company. To deal in mining property containing precious metals. Capital Stock, \$1,500,000; 1,500,000 shares at \$1 each; amount subscribed, \$5. Place of business, San Francisco. Directors—F. R. Whitcomb, C. L. La Rue, M. C. Hassett, A. L. D. Barnard and F. W. McLean, 1 share each.

Continuous Wire Wound Pipe Co. To deal in pipe and wire of all kinds. Capital Stock, \$100,000; 1000 shares at \$100 each; amount subscribed, \$500. Place of business, San Francisco. Directors—H. E. Aime, H. H. Plummer, W. L. Thompson, W. D. Morrison and H. C. Beach, 1 share each.

Thrift Incorporated. General ad-

vertising business. Capital Stock, \$150,000; 500 shares at \$50 each; amount subscribed, \$250. Place of business, San Francisco. Directors—C. H. Collier, C. A. Gwynn, C. W. Martin T. W. Simpson and O. F. Leppo, 1 share each.

The Neptune Place, Inc. General restaurant and cafe business. Capital Stock, \$10,000; 1000 shares at \$10 each; amount subscribed, \$30. Place of business, San Francisco. Directors—J. D. Rutledge, J. T. Williams, E. Stanley, 1 share each.

Thanksgiving Gold Mining Company. To deal in mill sites, claims, mines, etc. Capital Stock, \$30,000; 30,000 shares at \$1 each; amount subscribed, \$50. Place of business, San Francisco. Directors—Wm. Prior, J. Soussens, G. Kafsa, J. E. Manders and F. E. Boland, 1 share each.

Frank P. Doe Lumber Company. To deal in timber and timber lands and articles made from lumber. Capital Stock, \$100,000; 100,000 shares at \$1 each; amount subscribed, \$5. Place of business, San Francisco. Directors—F. P. Doe, L. L. Long, C. W. Doe, C. A. Geirrine and G. H. Mastick, 1 share each.

#### COPARTNERSHIP.

G. H. C. Meyer, H. L. E. Meyer, Jr., J. W. Wilson, J. M. Quail as Meyer, Wilson & Co.

#### STREET WORK CONTEMPLATED

The Board of Public Works has recommended to the Supervisors that the following street work be done:

Improvements of Cotter street, between Mission and the Ocean Shore Railroad occupancy; Santa Rosa avenue between Mission and Alemany; crossing at Cayuga and Onondago; Ripley, between Alabama and Peralta, and crossing at Alabama and Ripley; Raymond avenue, between San Bruno and Sawyer including the intersection of Raymond avenue and crossings of Alpha, Rutland, Delta and Eliot streets with Raymond avenue; Ocean avenue, between San Jose and Onondago, including intersection of Ocean avenue with San Jose avenue, Delano and Onondago and the improvement of Onondago avenue, between Ocean avenue and Otsego, including the crossing of Otsego and Ocean avenue.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—2 story and base, frame and plaster, \$15,000, Berkeley, Alameda Co., Cal. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, William H. Orrick. The dwelling will be erected at the southeast corner of College avenue and Forest street, and has been designed for a twelve-room house with three baths, sleeping porch and private garage. Interior will be finished in pine, redwood and hardwoods. Bed rooms will be finished in white enamel. Hardwood floors will be used throughout the main floor. There will be a warm air system of heating and open fire places. Mantels will be of tile and brick. Tile wainscot and floors will be used in the bath rooms. Automatic water heaters will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$2,500, Oakland, Cal. Architect, none. Owner, E. N. Fabing, 1251 Hopkins street, Oakland. The dwelling has been designed for a seven-room house and will be erected on Glendora avenue west of Clark street. Interior will be finished in pine, redwood and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCES—2, 2 story and base, frame, \$2,000 each, Berkeley, Alameda Co., Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Charles A. McCann, 2225 Piedmont avenue. These two houses have been designed for seven-room dwellings and will be erected at the corner of Regent and Stuart streets. Interiors will be finished in pine and hardwood veneer. Hardwood floors will be used in the living and dining rooms and reception halls. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms will be finished in tile. Exterior of the houses will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—1½ story and base, frame, \$2,500, Berkeley, Alameda Co.,

Cal. Architect, Elite Planners, 1844 Telegraph avenue, Berkeley. Owner, Frederick Townsend, 29 Alameda avenue, Berkeley. The dwelling has been designed for an eight-room house with bath and sleeping porch, and will be erected on Contra Costa north of Los Angeles. Interior will be of pine and redwood with one hardwood veneer. Hardwood floor will be used in the principal room. There will be open fire places and tile or brick mantels. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—1 story and base, frame, \$2,500, Berkeley, Alameda Co., Cal. Architect, none. Owner, E. B. Spiller, 115 Oxford street, Berkeley. The house will be erected at the southeast corner of Shattuck avenue and Eunice, and will contain seven rooms and bath. Interior will be finished in pine and redwood with some white enamel in the bed rooms. There will be hardwood floors and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

DETENTION HOME—2 story and base, reinforced concrete, \$25,000, Oakland, Cal. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Alameda County. The building will be erected at the corner of 18th and Poplar streets. The building will contain offices, dormitories and dining hall. Separate dining rooms will be provided for the girls and boys. Interior will be finished in pine and redwood. There will be steam heat, oil burning equipment and a hot water system. Some cell work will be required. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

HOTEL ALTERATIONS AND ADDITIONS—3 story and base, brick, \$5,000, Berkeley, Alameda Co., Cal. Architect, James W. Plache, Acheson Bldg., Berkeley. Owner, A. A. Fink. The present three-story building located on Center street near Shattuck will undergo alterations. Included in the work will be new interior finish, plumbing, plastering and electric work. Plans are complete and figures are now being taken.

WAREHOUSE—5 story and base, reinforced concrete. Cost not stated, Oakland, Cal. Architect, Industrial Engineering Co., represented by Architect Martinich, 1008 Masonic avenue, S. F., and Truss Concrete Steel Co., Sharon Bldg., S. F. Owners, Perkins Van and Storage Co. Both of these firms are preparing plans for the new warehouse building to be erected at the southwest corner of 2nd and San Pablo avenue, Oakland. Other than the fact that the building will be of improved construction and details can be given at this time, no information will be made on the work.

Contracts Awarded.

### MARIN, CONTRA COSTA AND SONOMA COUNTIES.

RAILROAD CONSTRUCTION — Cost not stated. Benicia, Solano Co., Cal. Engineer's name not given. Owners, A. O. Bowen Co., S. F. Activities on the proposed Vallejo-Benicia railroad will be resumed at once, according to the statement made by a local newspaper. The paper makes the following statement: "The A. O. Bowen Company has announced that work will soon begin on the electric line from Benicia to Vallejo. It is said that the money to finance the undertaking, which, on account of the war, was not at first forthcoming, has been secured and nothing now stands in the way of the proposed road being put through at a very early date.

WHARF—Reinforced concrete and steel, \$260,000. Richmond, Contra Costa Co., Cal. Engineers, Haviland & Tibbels, Alaska Commercial Bldg., S. F. Owners City of Richmond. The wharf will be 700 feet long by 150 feet wide

and will be carried on concrete piles. There will be a steel shed beside railroad tracks and loading machinery. Plans are complete and figures are being taken. Bids will be opened on December 28th. Plans and specifications can be secured from the engineers.

LIBRARY—1 story and base, reinforced concrete, \$10,000. Vacaville, S. lano Co., Cal. Architect, L. M. Turton. Napa. Owners, Vacaville Library Trustees. Plans have been completed and are now out for figures for this building. The building has been designed in the classic style and will contain one large reading room, stack room and office of the librarian. Plans provide for a warm air system of heating. There will be metal book stacks. Interior will be finished in pine with maple floors. Some ornamental iron specified. Exterior of the building will be faced with cement plaster. Bids will be opened on December 1st. Plans and specifications can be secured from the architect.

### Contracts Awarded.

WHARF AND CHANNEL WORK — Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Work on a ferry system to handle all freight and traffic between Martinez and San Francisco will be started within ninety days, the contracts for the work having been let. The contracts awarded to the Western Reclamation Co. for the dredging of canal 2,000 feet long and 120 feet width, which will lead up to a wharf which will be 200 feet in length with a bulkhead 500 feet, giving in wharfage facilities of 700 feet at the company's holdings at the foot of Tenth street. The second contract was granted to the Pacific Construction Company for the erection of wharves at a contract price of \$17,500.

BRIDGES—3, concrete. Cost not stated. Martinez, Contra Costa Co., Cal. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Bids opened by the Board of Supervisors for the building of three bridges on the first section of the State Highway from Pinole to San Pablo Bay show Karl M. Neilson of Martinez 1st at \$7,007 for all three structures. Following is a complete list of bids and their bids: Karl M. Neilson, \$7,016, \$3,098, \$1,692; total, \$7,807. R. Moller—\$3,543, \$4,044, \$1,984; total, \$7,571. Ralph L. Gorrill—\$3,480, \$4,044, \$2,160; total, \$10,000. F. P. Moore—\$4,265, \$3,785; \$2,389; total, \$10,044. Pacific Coast Construction Co.—\$3,850, \$4,244, \$2,691; total, \$10,781. G. Fields—\$3,114, \$3,564, \$2,146; total, \$24. D. McDonald, one bid only, acre Garry Flat, \$3,750. Henry Laya—\$3,361, \$3,970, \$2,616; total, \$9,982. C. Rogers, \$5,157, \$5,758, \$2,916; total, \$14,173. Blake Bros.—\$4,100, \$4,427, \$2,700; total, \$11,200.

### BUILDING CONTRACTS.

#### CONTRA COSTA COUNTY.

##### CANAL

ALONG AND ADJACENT TO PORTLAND — east bank of dredged canal, lands of Ellis Landing and Dock in Richmond. Construction of timber wharves and bulkheads for canal. Owner.....Ellis Landing & Dock Co.

tap many thousand acres of the Diamond Match Company's best timber.

**RESIDENCE** — 2 story and base, frame, \$1,500 each. Sacramento, Cal. Owners, E. H. Bill, 3215 14th avenue, and E. Gravel, 3015 T street. These two houses have been designed for five room dwellings with bath. Interiors will be finished in pine and redwood. Some oak floors will be used. Each living room will have a tile mantel and open fire place. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor. Materials are now being purchased.

**SCHOOL FIRE ESCAPES**—Cost not stated. Oroville, Butte Co., Cal. Architect, none. Owners, Town of Oroville. The Board of Education has decided to have plans prepared immediately for equipping the grammar school with fire escapes. The action was taken following a protest lodged by the Grand Jury against the failure of the Board of Education to so equip the building.

**ROAD WORK** — \$15,000. Castella, Shasta Co., Cal. Engineer's name not given. Owners, Trinity Asbestos Mining Co., Castella. The Trinity Asbestos Mining Co. will start men at work at once building a road from the asbestos mines over the line in Trinity County to Castella, the nearest railroad point. The road will be twenty miles long and will cost \$45,000. The surveys made years ago are available.

**RESIDENCE** — 2 story and base, frame. Cost not stated. Plumb, Tulare Co., Cal. Architects, Bowen & Davis, Fresno. Owner, Mrs. Charles E. Driver. The dwelling has been designed for a 7-room house with two baths and sleeping porch. Interior will be finished in pine, redwood and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

**LOBBY HALL**—7 story and base, Class A construction, \$100,000. Sacramento, Cal. Architect, A. R. Herold, Forum Bldg., Sacramento. Owners, Masonic Building Association of Sacramento. The building will be erected at the northwest corner of 12th and J streets, and will cover a large ground area. The first floor will be given over to stores. Upper floors will be arranged for quarters of nineteen Masonic Lodges. Interior finish will be of pine and hardwoods with special decorations in ornamental plaster, art glass and tapestries. There will be a complete steel frame, concrete and brick exterior walls, faced with pressed brick, stone and terra cotta. A loan of \$200,000 has been raised and construction will be started on approval of the plans.

**BRIDGES** — Timber construction. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans prepared by the County Surveyor for the construction of two wood beam bridges on the Tehama-Center Road have been adopted by the Supervisors, and bids for their construction will be taken until December 9th. Plans are

gether will full information may be had from the County Surveyor at Red Bluff.

#### Contracts Awarded.

**BRIDGE**—Steel and concrete, \$2,674. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor Red Bluff. Owners, Tehama County. Contractors, C. E. McCartney and F. Haskell, Red Bluff. Contract price, \$2,674.

**LOS ANGELES AND SOUTHERN  
CALIFORNIA.**

**BANK**—2 story and base, brick and  
steel, \$20,000. Hermosa Beach, Los  
Angeles Co., Cal. Architect, L. B.  
Pemberton, Auditorium Bldg., L. A.  
Owners, First Bank of Hermosa Beach.  
The building will be erected at the  
corner of Pier and Hermosa avenues,  
and will cover a ground area of 56 by  
95 feet. The design is in the classic  
style. The main floor will contain the  
banking rooms, several stores and of-  
fices for the Pacific Electric Railways.  
Interior finish will be of pine and  
hardwood with some ornamental plas-  
ter in the banking room. Special coin  
and safe deposit vaults will be in-  
stalled. Exterior of the building will  
be faced with pressed brick. Plans  
are now being prepared.

**CHURCH**—1 story and base, frame  
and brick. Cost not stated. Oxnard,  
Ventura Co., Cal. Architects, L. B.  
and A. L. Valk, Stinson Bldg., L. A.  
Owners, Methodist Episcopal Church.  
The building will cover an area of 65  
by 95 feet, and will contain sixteen  
class rooms besides the main auditor-  
ium and study. Interior will be fin-  
ished in pine and ornamental plaster.  
A central heating system will be in-  
stalled. White asbestos roof will be  
used. Exterior of the building will  
be covered with cement plaster. Plans  
are complete and have been turned  
over to Rev. Oliver Taylor, Pastor.  
He is now taking figures on the work.

**SCHOOL**—1 story and base, hollow  
tile construction, \$82,000. Los An-  
geles, Cal. Architect, Robert M. Taylor,  
Marsh-Strong Bldg., L. A. Owners,  
Orange School District. The sketches  
which were adopted by the board pro-  
vide for a one-story and basement  
building to contain eight class rooms,  
auditorium, kindergarten, sloyd and  
domestic science departments, etc. It  
will be of interlocking tile construc-  
tion with plastered exterior and tile  
roofing. Working plans for the build-  
ing will be prepared as soon as bond  
are sold.

**ORNAMENTAL LIGHTING SYSTEM**  
Cost not stated. Riverside, Ry-  
side Co., Cal. Engineer, City Engi-  
neer, City of Riverside. City of Ry-  
side. And for the construction of a  
system of lighting system on a  
street between 10th and 11th streets.  
It was received by the city engineer  
December 2, 1914.

**WATER**—1 story and base, frame  
of hollow tile, Imperial Co., Cal. En-  
gineer, City Engineer, City of San  
Diego. City of Hollywood. And for the  
construction of an intake sewer  
in the Northman Tract, New River  
Tract, low at \$10,000 and Watson &  
Spicer next at \$12,000. Both bids were  
taken under advisement.

**Contracts Awarded.**

**RESIDENCE**—1 story and base,  
frame, \$20,000. Hollywood, Los An-  
geles Co., Cal. Architect, Mead & Requa,  
511 E street, San Diego. Owner, Mr.  
A. Knudson. Contractor, Charles H.  
Richmond, 105 Home Bldg., L. A. Con-  
tract price, \$20,000.

**LATERAL SEWERS**—Cost not stated.  
Hollywood, Imperial Co., Cal. En-  
gineer, City Engineer, Hollywood. Own-  
ers, City of Hollywood. Contractors,  
McLean & Walsh, Hollywood. Con-  
tract price, \$27,243.58.

**PORTLAND AND OREGON.**

**BRIDGE**—Steel and reinforced con-  
crete, \$1,750,000. Portland ore. En-  
gineers, Howard & Harrington, Portland  
owners, Multnomah and Clatsop Coun-  
ties. Ends for the erection of the pro-  
posed interstate bridge to be built be-  
tween Portland and Vancouver, Wash-  
ington, will probably be authorized at  
an early date. Funds in the sum of  
\$2,000,000 have been disposed of by  
Multnomah and Clatsop counties. Ac-  
cording to Commissioner Harrington,  
the commission will ask for bid on units  
of the work, instead of a general con-  
tract. E. E. Howard, associated with  
Mr. Harrington, is also to receive in  
Portland shortly with the completed  
plans of the bridge. The structure  
will cost about \$2,750,000.

**SCHOOL**—2 story and base, frame  
of hollow tile, \$25,000. Portland, Ore.  
Architect, E. A. Nelson, 1000 Commercial  
owners, City of Portland. The build-  
ing will be of hollow tile construction  
and will be a two-story building.  
A steam heat system will be in-  
stalled. Plans will be prepared as  
soon as bond are sold. The building  
will be completed in the spring of 1915.

**STREET**—1 story and base, frame  
of hollow tile, \$10,000. Portland, Ore.  
Architect, E. A. Nelson, 1000 Commercial  
owners, City of Portland. The build-  
ing will be of hollow tile construction  
and will be a one-story building.  
A steam heat system will be in-  
stalled. Plans will be prepared as  
soon as bond are sold. The building  
will be completed in the spring of 1915.

and will be of semitireproof construction, exterior being finished with -tone. The building will cover an area of 30x58 feet.

**MARKET BUILDING**—2 story and base, reinforced concrete, \$100,000. Portland, Ore. Architect's name not given. Owners, Frye-Bruhn Co., South Seattle. The building will cover an area of 50x100 feet. Construction will probably be of reinforced concrete. Plans for the building will be prepared under the direct supervision of Mr. Frye in the company's offices at Seattle. It is expected that plans for the building will be completed in about thirty days, when bids on the work will be called for.

#### Contracts Awarded.

**SCHOOL**—2 story and base, reinforced concrete, \$121,575. Portland, Ore. Architect, F. A. Naramore, Portland. Owners, City of Portland, Contractors, Boyajohn-Arnold Co., Panama Bldg., Portland. Contract price, \$121,575.

**ALMHOUSE**—2 story and base, concrete and brick, \$37,333. Eugene, Ore. Architects, Hunzicker & Preusse, Eugene. Owners, State of Oregon. Contractor, C. Van Patten, Salem, Ore. Contract price, \$37,333.

#### SEATTLE AND WASHINGTON.

**BRIDGE**—Steel leaf, bascule type, City Engineer A. H. Dimock, Seattle. Owners, City of Seattle. The structure will have a span of 400 feet with two approaches 1,500 feet 1,200 feet respectively, and will be 40 feet wide, providing for two electric car tracks, two roadways and two 6-foot sidewalks. It is planned to let the work in three contracts, one for the approaches, one for the two concrete piers and the other for the steel span and lift. It will take about one and one half years to complete the work. Bids for the work will be called on the approval of the plans by the Department of Works.

**CHURCH**—1 and 2 story and base, concrete and brick, \$85,000. Seattle, Wash. Architect, W. S. Bell, associated with H. O. Shuey, Hoge Bldg., Seattle. Owners, University Place Christian Church of Seattle. The building will be erected at the corner of East 15th street and 50th avenue, and has been designed in two units, only one of which will be erected at this time. The first unit will contain the main auditorium and will seat 1,200 people. The second unit, which is to be erected later, will contain the Sunday school rooms, study and social hall. Interior finish will be of pine and ornamental plaster. A steam heating system will be installed. Exterior of the building will be faced with pressed brick. Plans for the first unit are nearly complete and figures will be called for shortly.

**PIPE LINE, ETC.**—\$220,000. Seattle, Wash. Engineer, City Engineer, Seattle. Owners, City of Seattle. An ordinance for making a survey for the construction of a pipe line from Cedar River to West Seattle has been recommended to the City of Seattle by the City Utilities Committee. The ordinance provides not only for a pipe line survey, but for a survey of Swan Lake for use as a reservoir. The pipe line has been estimated as costing about \$220,000. \$50,000 from the Cedar River to Swan Lake and \$170,000 from Swan Lake to West Seattle. It is not pro-

posed to convert Swan Lake into a reservoir at this time.

**SEWER WORK**—\$325,000. Vancouver, B. C. Engineer's name not given. Owners, Vancouver and District Joint Sewerage and Drainage Board. The Vancouver and District Joint Sewerage and Drainage Board has authorized their engineer to proceed at once with the plans for the proposed Clark trunk sewer. It is the intention of the board to start work as soon as possible on this portion of the proposed sewerage system, which will cost about \$325,000. The board will consider the advisability of doing the work by Day Labor.

**WAREHOUSE**—7 story and base, reinforced concrete, \$150,000. Seattle, Wash. Engineer, Chief Engineer West. Port of Seattle Commission. Owners, City of Seattle. Bids on the work will be called for early in December. Construction will be of concrete and hollow tile. Separate contracts to be let in this project include the cement for the above building, 121x172 feet, 1 story frame fish storage building, plans for which will be ready next month, a 40x121 frame ice storage house of 5,000 tons capacity. This building will be 50 feet high. The project also calls for a compressor and ice plant building, part of which will be two-story of fireproof construction, 100x168 feet, costing about \$15,000. The ice storage and fish building may be let in one contract at a cost of about \$35,000. The above figures do not include the cost of machinery, which will run the entire cost of the project close to \$100,000. Mr. West reports that specifications for grain elevator machinery will be ready sometime next week.

**LODGE HALL AND STORES**—4 story and base, reinforced concrete, \$100,000. Tacoma, Wash. Architects, C. Frere Company, Henry Bldg., Seattle. Owners, Tacoma Elks' Hall Association. The building will have a frontage of 75 feet and a depth of 112 feet. A large assembly hall and auditorium will be features of the lodge rooms. The ground floor of the building will be used for stores. Interior will be finished in pine and hardwood with hardwood floors in the auditorium and assembly hall. Plans provide for steam heat, vacuum cleaning system and hot water supply. Exterior of the building will be faced with cement plaster or pressed brick. Figures are being taken on both propositions.

**APARTMENT HOUSE**—5 or 6 story and base, Class A construction. Cost not stated. Seattle, Wash. Architects, J. L. Putman, associated with W. M. Somervell, White Bldg., Seattle. Owners, J. L. Putman and associates. The building will be erected at the southwest corner of Harrison and Federal streets on property covering a large ground area. Details of the building have not been worked out, but Mr. Putman assures us that the building will be one of Seattle's largest and most modern apartment houses. Construction will be fireproof. Further mention will be made of the work.

#### BIDS OPENED FOR RETAINING WALL AT LOCKWOOD SCHOOL.

Four sets of plans were received by the Oakland Board of Education for constructing a large reinforced concrete retaining wall at the new Lock-

wood School in Oakland. Nissen Bros. of Oakland submitted the lowest figure at \$7,818 and will probably be awarded the contract. All bids have been referred to the City Attorney. Following bids were received:

**Retaining Wall at Lockwood School.**  
Nissen Bros. .... \$ 7,818.00  
E. Roland ..... 10,600.00  
C. B. Burnham ..... 10,965.00  
Powell Bros. Constr. Co. .... 9,721.13

#### SHIP YARD DESTROYED BY FIRE.

The ship yard of George W. Kneass, 18th and Illinois streets, has been destroyed by fire, entailing a loss estimated at \$70,000. Four one-story frame buildings and a large stock of lumber was also burned. Heroic work of the fire department checked the flames from sweeping the plant of the Union Iron Works.

A character in one of Red Saunders' stories remarked that he always liked to hear a certain cowboy, named Jim Smith, sing. He said that it made him forget his troubles. That when a fellow got hit on the head with a two-by-four he didn't mind trifles. So it is in the present war. Society has been hit on the head with a two-by-four, and is trying to come out of unconsciousness and as a consequence everything is at stand still.

But things will adjust themselves under almost any circumstances. France bearing the burden of a hostile invasion, and the greatest war in the history of the world announces that she will be represented at the Panama-Pacific Exposition. And we may confidently expect that business will adjust itself even though the war continues. Already this country is preparing to adopt measures for the manufacture of products which were formerly imported altogether. And the tendency is to meet conditions as they exist rather than to wait for things to turn up.

#### TO INSTALL BOILERS.

Mary L. Phelan has made application with the Supervisors through the Scott Co., 243 Minna street, for a permit to install a 1500-gallon oil storage tank at the north line of Washington street 137 1/2 feet east of Laguna.

The San Francisco Investment Co. has filed application with the Supervisors for a permit to install and maintain a 1500-gallon boiler at the east line of Leavenworth 125 feet south of Geary.

The Boesch Lamp Company, 1135 Mission street has filed application for a permit to install a six-horse power boiler on their premises for heating plating solution and hot water for cleaning purposes.

#### WAR TAXES.

#### Documentary Taxes Effective December 1, 1914.

The following stamp taxes are in effect on and after December 1, 1914, to continue until January 1, 1916. These documentary stamps may be procured at the office of the Collector of Internal Revenue in San Francisco or at the stamp offices located in Oakland, Sacramento and Fresno:

#### Schedule A.—Documentary.

Bonds, debentures, or certificates of

If report be correct, this is especially true of Germany, for the Kaiser is said to be a large stockholder in the great Krupp works, whose principal output is big guns.

But in the United States and the other countries named there are private plants producing gunpowder, armor-plate and other war material, and also shipbuilding concerns engaged chiefly in the construction of war vessels.

Americans may deem it scandalous that Emperor William makes money out of the manufacture of guns and other equipment of war. But it is no less contrary to public morals that the Powder Trust for many years has been represented in the United States Senate by Henry A. Du Pont of Delaware.

Senator du Pont is a member of the Committee on Coast Defenses; also a member of the Committee on Military Affairs.

There is a particular significance in Senator Du Pont's membership in the last-named committee, in view of the obvious fact that it frequently has to deal with the question whether gunpowder for the Army and Navy shall be made in Government mills or bought from the Powder Trust—a concern in which Senator Du Pont is heavily interested and which ever bears his name.

It is as if the Krupp Works were known as the Kaiser Wilhelm Gun Factory!

As for the Steel Trust, greatly interested financially in the making of armor for war vessels, and also our shipbuilders who profit by construction of warships in private yards, are they not well represented in both Houses of Congress—not directly but indirectly?

For a number of reasons, including the promotion of peace, all military and naval construction should be in the hands of the Government, even if the cost were increased.

But it is reasonable to suppose that an actual saving could be effected by Government construction.—Sacramento Bee.

## THE WAR AND OUR TRADE WITH INDIA.

[Consul Jose de Olivares, Madras, September 15.]

The complete stoppage, due to the present European war, of the extensive import and export trade between South India on the one hand and Germany and Austria on the other, coupled with existing export prohibitions on the part of all countries at war, has resulted in creating an opportunity for largely increased trade between this country and the United States. The only obstacle presented is the insufficiency of shipping facilities, which, on this side of the world, are almost entirely wanting. The measure wherein the United States may hope to profit by existing trade opportunities, therefore will depend largely upon its preparedness in regard to shipping.

Among articles to be treated as conditional contraband, under the royal proclamation published by the Madras Government, September 29, 1914, were the following: Food-stuffs, clothing,

and vehicles suitable for use in war, money, vessels and boats, railway and telegraph material, fuel, barbed wire, horseshoes, field glasses, and nautical instruments.

### American Goods Wanted.

The following list indicates American commodities for which an increased market is offered in southern India:

**Vehicles, hardware, and metals.**—Engineers' valves and brass foundry; small engineers' and carpenters' tools; locks, bolts; iron cooking utensils, enameled ware; hollow ware; aluminum ware; oil stoves; water filters; wire nails; barbed wire; galvanized woven wire; iron and steel tubes, pipes, and bars; continuous galvanized iron; zinc sheets; ingots, and boiler tiles; aluminum sheets, circles, bars, and ingots; iron and steel; cutlery; pocket-knives; scissors; brass; copper; yellow metal (copper and spelter); fire clay; Portland cement.

**Machinery, electrical supplies, lamps.**—Woodworking machinery; lathes; saws; agricultural machinery; plows; drills, rice and grain mills; gasoline engines; well-boring plants; hand and power pumps; leather belting; cotton-mill machinery; rubber-working machinery; textile machinery; sewing and knitting machines; mining machinery; prospecting plants, railway equipment; locomotive engines, tenders, and parts; tramcar trucks, dynamos, electric pocket lamps; metal lamp ware; glass lamp chimneys and globes; incandescent lamp mantels.

**Painters' materials, ceramics, etc.**—White and red lead; white zinc, terra cotta ornaments; crockery; plain and fancy table glassware.

**Furniture.**—Bentwood furniture; perforated chair seats, linoleums and mouldings.

### A LIVE RECORD.

The manufacture of lime in the United States in 1913 broke all previous records, the production amounting to 3,595,390 short tons, valued at \$14,648,362, according to R. W. Stone, of the United States Geological Survey. This was an increase over 1912 of 65.92% tons in quantity and of \$678,248 in value. The average price per ton in 1913 was \$4.07, as compared with \$3.96 in 1912 and \$4.02 in 1911. While Pennsylvania is the largest producer, the output of this state is only 2.5% per cent of the total, indicating the wide distribution of the industry; in fact, 44 states reported to the survey a production of lime in 1913.

Lime used in building operations represents nearly a third of the total output, but large quantities are sold to chemical works, sugar factories, tanneries, etc., as well as to farmers for broadcasting on agricultural land.

### THREE-STORY APARTMENT HOUSE FOR WESTERN ADDITION.

Work will be started next Monday on a three-story apartment house on the northwest corner of Devisadero and O'Farrell streets, size of lot 80 by 57.6. Old improvements were removed during the last week. J. D. Isaacs is the owner of this property, and plans were prepared by J. C. Hladik, architect, Chas. Wright, contractor.

The building will contain five stories and a very attractive lobby on the first floor, and six rooms on second and third

## Time Table.

Oakland, Antioch & Eastern Railway.  
LEAVE KEY ROUTE FERRY.

Leave	Daily except as noted.
8:00A	Bay Point, Diablo and Way Stations.
9:00A	Sacramento and Pittsburg only.
	Carries Parlor, Observation Car.
11:00A	Sacramento, Pittsburg, Bay Point.
11:20A	Bay Point and Way Stations.

**OAKLAND,  
ANTIOCH  
& EASTERN  
RAILWAY**

Key Route Ferry, Phone Suter 2339.  
Red Line Trans. Co., S. F. People's Express Co., Oakland.

Floors divided in two and three-room suites. The equipment will be thoroughly modern including wall beds, dressing rooms, built in ice chests, coat closets, ironing boards, wall seats in bath rooms, and the latest steam and water heating plant. The exterior will be in massive Mission style with flower boxes for each apartment and in both open courts. The total investment will represent a sum of almost \$60,000.

### IN THE WAKE.

A striking cartoon represents "War in shining armor, with 'Want,' 'Famine' and 'Pestilence' stalking gauntly in the wake of war.

A striking image—and, oh! so old and so ever-true!

Witness:—

"And I saw, and behold a white horse, and he that sat thereon had bow; and there was given to him crown; and he came forth conquering and to conquer."

"And another came forth, a red horse; and to him that sat thereon it was given to take peace from the earth, and that they should slay one another; and there was given unto him a great sword."

"And I saw, and behold, a black horse, and he that sat thereon had balance in his hand. And I heard a voice in the midst of the four living creatures saying, A quart of wheat for a shilling; and three quart of barley for a shilling; and the oil and the wine hurt thou not."

"And I saw, and behold, a pale horse, and he that sat upon it, his name was Death; and Hades followed with him. And there was given unto them authority over the fourth part of the earth, to kill with sword, and with famine, and with pestilence, and with the wild beasts of the earth.—From Revelations VI.

### REMOVAL NOTICE.

THE L. A. NORRIS COMPANY announce the removal of their offices to their new building, 140 Townsend Street (near Third St.), San Francisco, where they will have improved facilities for handling Clinton Welded Wire Fabric & Clinton Wire Lath. Phone Kearny 5155.

**EXPOSITION NEWS NOTES.**

The first stake for the Canadian Pacific Building on the grounds of the Panama-Pacific International Exposition was driven on November 8th. The first swing of the sledge hammer was made by Mrs. G. M. Jackson, the wife of Canadian Pacific's agent in San Francisco. The building is to be 60 feet by 60 feet and will be between the structures of the Great Northern and the Grand Trunk System on the Esplanade.

The one thing necessary to make the Panama-Pacific International Exposition complete has been added. Work has begun on a special building to be used as a bank by the Anglo-California Trust Company. It will be at the head of "The Zone" and will be fitted with safety deposit vaults and every appurtenance of a modern banking institution.

A steamer load of materials and exhibits from Australia and New Zealand has arrived on the grounds of the Panama-Pacific International Exposition. There are 78 tons in the shipment. The greater part of it was for the New Zealand pavilion. The consignment for the Australian pavilion consists of 200 beautiful specimens of tree ferns, which will surround the structure.

Work on installation of the United States Bureau of Fisheries' exhibit at the Panama-Pacific International Exposition has begun and I. M. Dunlap, chief clerk of the bureau, is in charge of the exhibit. The bureau has taken 10,000 square feet of space in the Palace of Food Products. Thirty aquarium tanks and two pools are being installed. The larger specimens, such as the several varieties of seals, will be placed in the pools. A special car will be sent from Washington to bring the eastern specimens to the Exposition.

Norway dedicated her site and broke ground for her national pavilion on the grounds of the Panama-Pacific International Exposition on Saturday, October 31st. Ground was broken with a snow shovel used by Captain Amundsen on one of his expeditions.

G. A. Dennison, chief of the department of horticulture of the Panama-Pacific International Exposition, has received from a firm in St. Albans, England, a letter stating that shipments of shrubs and trees from Europe for the Exposition will proceed as planned before the war.

The building of the State of New York practically stands completed on the grounds of the Panama-Pacific International Exposition and bids were asked on November 7th for the construction of the structure of New York City. The state appropriated \$700,000 but the great eastern metropolis thought this would not insure sufficient representation for its own words and promptly appropriated \$100,000 for a New York City building and exhibit.

A train of eleven full cars, carrying a part of Cuba's horticultural display, has arrived on the grounds of the Panama-Pacific international Exposi-

tion. The appearance of the palms, tree ferns, and other trees in fruit, besides the high scores of other tropical vegetation is to be given a place of honor under the dome of the Palace of Horticulture.

## MINOR JOBS ABOUT TOWN

3346 Clay, skylight owner, Harry Keating, Premises contractor, A. N. Nelson, 103 Broderick, cost, \$150.

W. Fillmore, 13, 6 N. Eddy, underpin wall, owner, Marner Leventritt, New York, architect, G. A. Landsburgh, 709 Mission, contractor, John Spargo, 909 Presidio Ave., cost, \$175.

3026 Fillmore, alter basement for  
store; owner, Emma Muhlbach, Frem.  
cost, \$200.

3234 Washington; alter and repair building, owner, M. J. Tuska, Premises, contractor, J. H. Henderson; cost, \$700.  
NE Post and Steiner; ratproof; owner, Mrs. Hoerner; cost, \$154.

712 Shotwell; repair roof; owner, P. M. Burns, 1468 Masonic Ave., contractor, E. Ketter, 392 University; cost, \$150.

W. Mason 150 N. O'Farrell; install sidewalk doors; owner, D. L. Randolph cost, \$150.

1834 Gough; minor changes; owner, J. Breuner. Premises: cost, \$250.

1312 California; underpin foundation, owner, M. W. Busted, 440 Eddy, cost, \$100.

401 Ellis; electric sign; owner, John Olsen, Premises; contractor, Brumfield Elec. Sign Co., 18 7th; cost, \$100.

33 Montgomery, electric sign; owner, Lick Bar; cost, \$175.

1614 Haight; electric sign; owner, Cyril Hess & Co., Premises; contractor, American Sign Co., 1st National Bank Bldg.; cost, \$130.

563 California; electric sign; owner, Max Sutter, Premises; contractor, Brumfield Elec. Sign Co., 18 7th cost, \$100.

1027 Page; alter for garage; owner,  
H. Mangels; cost, \$170.

W Broderick 50 N Oak; alterations; owner, Y. Fritzhen; contractor, B. L. Ballard; cost, \$200.

164 23rd Ave.; alter dwelling; owner, Ida Malpas, Ukiah, Cal.; contractor, H. C. Matthies, 180 Jessie, cost, \$200.

652 Oak alterations; owner, Miss Coleman, Premises; cost, \$100.

N Caselli 275 W Douglass; alter and repair, owner, Margaret Stewart; cost, \$250.

SE Fremont and Market; repair roof agent, J. R. Miller, Lick Bldg.; cost \$200.

1414 231d; reshingle residence; owner, Mrs. Leale Cohn, Premises; cost \$100.

1760 Post; add one room; owner  
1st Reformed Church, premises; cost  
\$150.

104 San Jose Ave., repair garage owner, L. M. Bevelockway, Premises contractor, J. Mel. Jarvis, 3541 24th east, \$290.

4501 Mission, new doors and awning, owner, G. Gardeabhi, Thomas-cost, \$100.

S. Waller 150 W. Alpine—concrete marquise, owner, W. B. Wagner, New Bank Bldg—cost, \$700.

Ellis and Stockton, coat sign owner, Abraham's Great Clothing Co. 15 Stockton contracted swim. The

Painter, 756 Folsom road, cost, \$105.  
2513 Mission street, (Xtreme) owner,  
Carl Jorgensen, contractor, J. H.  
Thorup, 1604 14th Ave., cost, \$200.

SHORT-PAID POSTAGE HANDLES  
AMERICAN TRADE

© David J. P. Morgan, 1999  
 0950-0804/99 \$10.00

On the outstanding effect of the present department on the Government and those of major commercial organizations and trade groups, some American firms desiring the establish-  
ment of business relations with Chinese dealers and merchants have not yet learned that it is necessary to pay foreign postage on all mail sent. The regulation of the International Postal Union require the postal authorities of the United States to accept and forward all short-paid letters to foreign countries, but no rules of the foreign office compel the addressee to accept such mail and pay the penalty of double the deficiency.

**Quick Delivery of Letters Properly  
Stamped.**

In the mails arriving from the United States on September 16 and 20, 15 letters from American firms were received at this consulate. Of these, 6 carried 2-cent stamps instead of the required 5 cents. The notices of the arrival of the short-paid letters were not received until almost a week later.

The firm of Edward E. Muecke receives more letters from the United States than any other commercial house in Iquique. After each mail the head of the firm goes to the post office and looks over the short-paid letters to his address. He pays the penalty only on those from persons with whom his firm is in correspondence. Other firms usually disregard notices sent to call and pay penalty postage. The administrator of the post office states that few or no letters with short-paid postage are received from Europe, but that a large number come from North America, and these rarely reach the addressees.

### Penalty Postage Creates Bad Impression.

The delay in delivery of short-paid letters is inevitable. If needful, the firm that prepays its postage could have a cable order and confirm its acceptance before the delivery of its competitor's short-paid letter. Having to purchase one's mail causes a certain antipathy to the firm at fault, which undoubtedly results in the loss of good customers. The foreign firm justly believes that if such a little matter as postage is overlooked or neglected, it may expect negligence in the filling of orders and lack of proper attention to invoices, packing and shipping orders, some of which are very important and about which there should be no uncertainty.

## LOCAL FIRM GETS BRITISH OIL CONTRACT.

## CONSTRUCTION WORK ABROAD.

## CANADA.

[Consul Abraham E. Smith, Victoria, October 25.]

## Effect of European War on Building.

The European war has checked the inflow of British money and investors and promoters have become timid, while many industries of this district have received a setback. Municipal as well as private undertakings have felt this adverse pressure, and many works under contemplation or partly started have been dropped altogether or indefinitely.

However, some very pretentious undertakings have progressed so far that they must be finished. Much railroad work has been started, and this will be completed as quickly as possible.

The public works branches of both the provincial and Dominion governments have announced that their program of construction of public works and buildings will be continued, regardless of war troubles. A number of municipalities are retrenching in their expenditures on the smaller items, but large civic works, contemplated or at present under way, will be carried forward without delay.

The following is a list of proposed new work, with the names of the architects and the present prospect of building:

School, \$50,000, Spargins & Wilkins, indefinite; explosive plant, \$1,000,000, Victoria Chemical Works, under way; Y. W. C. A. Home, \$150,000, J. C. Frame, funds needed; church, \$100,000, J. M. Warren, delayed; railroad depot, \$1,000,000, company engineers, preparing; office building, \$300,000, German Canadian Trust Co., no information; church, \$25,000, Jones & Beaton, financing; office building, \$250,000, H. F. Griffith, indefinite; office building, \$500,000, Thos. Hooper, tenders closed; office building, \$250,000, delayed, office building, \$250,000, A. A. Cox, indefinite; cathedral, \$100,000, J. C. M. Keith, delayed; church, \$40,000, funds needed; marine depot, \$250,000, Government, tenders wanted; curling rink, \$20,000, Coates & Fleet, build this year; residence, \$30,000, J. M. Warren, preparing; apartment house, \$35,000, Fox & Perill, preparing; apartment house, \$62,500, Cummings & Morcom, January; apartment house, \$63,000, Cummings & Morcom, January; apartment house, \$27,000, delayed; warehouse, \$20,000, Jesse Warren, plans ready; hospital, \$100,000, L. P. Rixford, excavating; brick stores, \$10,000, C. E. Watkins, tenders closed.

Following is a list of work started or contracts let, with all probability that they will be finished with little or no delay, the cost of construction and the contractor being given.

Jail, \$80,000, C. W. Clarke, laundry power building, \$22,000, British Columbia Construction Co., residence, \$20,000, Grayson & Son, residence, \$12,000, Mr. Johnson, school, by school trustees, residence, \$10,000, A. H. Mitchell, residence, \$75,000, P. McKechnie, apartment house, \$45,000, Fulton Bros., armory, Barratt Bros., school, \$11,000, Lumby Bros., store building, \$30,000, T. H. Brown, store building, \$200,000, British Columbia Constr. Co., concrete pier, \$500,000, Grant, Smith & McDonald, post office addition, \$150,000, McAlpine, Robert-

son & Co., school, \$16,500, Lumby Bros., school, \$17,100, Lumby Bros.; church, \$20,000, Knott & Jones; detention building, \$32,000, Rourke, McDonald & Moncreiff; breakwater, \$1,000,000, Sir John Jackson; wharf, \$24,500, Parks, Tupper & Kirkpatrick.

Appropriations voted by the Dominion Parliament for Victoria for 1914 include a new drill hall, \$150,000; observatory, \$10,000, post office improvement, \$100,000; William Head quarantine, \$75,000. Dominion help has also been secured for the Pacific Great Eastern Railroad in the way of a loan of \$6,000,000 from the Government at Ottawa.

At South Wellington, Vancouver Island, there is to be erected a new hotel in the place of the Alexander Hotel, recently destroyed by fire. At Nanaimo the city has decided to proceed at once with the paving of Albert Street regrade, and contract has been awarded to J. A. Baxter for \$18,000. The city of Nanaimo has also recommended the building of a new bridge over Millstream, as the present bridge is old and dangerous. Also at Nanaimo, the Hospital Board has decided to erect an addition to the Nanaimo Hospital, to be finished for the coming winter.

#### [Consul Samuel G. Reat, Calgary.] Two Million Dollars Being Spent on New Buildings.

Despite business depression, new buildings being erected in Calgary aggregate in value \$2,160,000. The principal undertaking is the Government internal terminal grain elevator, which is to cost about \$1,500,000. Work on this structure is being rushed. The Merchants' Bank building is to cost about \$125,000. The Western Flour Mills Co. is building a warehouse, a new boiler house, and a mill addition at a cost of \$200,000. Simington & Co. (Ltd.) are building a \$32,000 warehouse. Work has started on a Roman Catholic church to cost \$40,000, the material being reinforced concrete and brick. It is also expected that a start will be made on the armory this fall, while \$12,000 will be spent on buildings at Victoria Park, for a mobilization base.

## HAWAII.

[Commercial Agent Franklin H. Smith, Honolulu, Oct. 22, en route to Asia.]  
Trolley Extension—Harbor Work.

Renewed consideration is being given to the project of extending the line of the Honolulu Rapid Transit & Land Co. to the United States Naval Station at Pearl Harbor. The extension would involve the building of approximately 1 miles of track.

Efforts are again being made for the dredging of a channel from the harbor of Honolulu into Kalia Harbor, island of Oahu, to provide more and needed dock facilities and anchorage. A partial survey has been made, but an appropriation has not yet been obtained.

## TEHELISHEFF, THE PEASANT.

"In Russia the leadership of one man, Michael D. Tchelisheff, has accomplished a great thing. It has abolished drunkenness. The man who could do that, who could induce an autocratic government to give up nearly half its ordinary revenue, must be a tremendously forceful character. He isn't a grand duke or a noble, this man Tchelisheff. He is described as 'a peasant by birth, originally a house painter by profession.' He picked up his educa-

tion from stray books and newspapers, and then hewed his way to the front by his own strength.

Nature is the great democrat. Men—little men—are always busy building up an artificial society. They say: 'We shall make a place for our sons. They shall not have to work as we have had to work. But they shall carry on the family name to greater honor.' So they educate their sons and pamper them and find soft jobs for them. And along comes some Jewish carpenter, some American rail splitter, some Russian peasant and turns all their plans upside down.

Napoleon organized his victorious armies on the assumption that every soldier carried a field marshal's baton in his knapsack. He created a wonderfully efficient government for France by insisting that a career was always open to the man with talent.

That is the order of Nature, which never coddles the unfit. Strong men are always coming to the front and asserting themselves and crowding out the men who seek to run things by virtue of a pull. The country that organizes a rigid society will stifle its own growth. It is essential to a nation's success that it keep the door of opportunity open so that talent shall not be suppressed."

That Russia is in earnest in the present war the above statement will amply show. And that common men have recognition and the highest offices are open to them in the most despotic government on earth indicates also that the war means progress for Russia at least. Russia is a country of vast extent. The endless plains of Siberia offer opportunity for countless millions of population. An enlightened government would in a generation work wonders for the people. The abolition of the saloon by the government will do much to start its people on the right road.

## ROAD MODELS.

At the Fourth American Road Congress, held at Atlanta, November 9th-13th, the U. S. Department of Agriculture exhibited a complete set of models illustrating the construction and maintenance of standard types of roads. Included in this set were models showing the development of stone road building for 2,000 years past, among which were the Appian Way, representing an ancient Roman type of construction, samples of early French roads, the Telford, and early and modern Macadam roads. Other models shown illustrated questions of road location, bad alignment, improper grades, dangerous crossings, unsafe bridges and many other features necessary to understand when laying out good roads. The whole field of road building was covered, and it was the most complete educational exhibit ever attempted in this country. All of these models made on a scale of 1 inch to the foot, were large enough to perfectly illustrate their point. Besides the models an automatic projectoscope presented self reading lantern slides, while sets of motion picture films showed various construction scenes. This Congress was the most important and successful yet held, and accomplished encouraging work in the way of enlightenment and stimulating public interest in this important movement.—Scientific American.

# Building and Engineering News

Devoted to the Architectural, Building, Engineering and Industrial Activities of the Pacific Coast.

Issued Weekly, \$3.00 per year

San Francisco, December 9, 1911

Fourteenth year No. 49

## Announcement.

With this issue the name of the Building and Industrial News is changed to Building and Engineering News.

The new name will better describe the peculiar field we cover, namely "Building" in all its branches, from actual construction to architectural treatment.

The Engineering field will be more fully covered than ever and reports of contemplated engineering and construction jobs made a special feature of each issue.

Commencing with the New Year, a "Special Number" will be issued once a month. Each monthly special will contain special articles from the pens of recognized experts in the Architectural, Building and Engineering field. These special articles will be fully illustrated with drawings and photographs.

This seems to be the only objection it can find so far to the federal bank plan and why the plan should be criticised for that reason we fail to see. Gold, like any other coin wears through use, it being heavy and soft and there is no reason why it should be used in place. Some people resort to "sweating" the coins, that is placing them in a bag and jostling them to wear off the the corners as in ordinary use, and thus stealing the worn off particles. So long as the gold is kept in the vaults of the banks and the subtreasury it seems immaterial whether it circulates or whether the paper representing it circulates in its stead.

The question of the enactment of a wage law will very likely come up before the next legislature on account of the Court of Appeals declaring the present law unconstitutional. The grounds of the decision was that the present law would lead to imprisonment for debt and that was contrary to the fundamental law of the State and Nation. There was no mention in the act of course for imprisonment on account of deferring payment of wages, but inasmuch as the law made it a misdemeanor to defer payment of wages and any misdemeanor is punishable by imprisonment, it follows that one who could or would not pay wages that were justly due might be imprisoned under the law as it now stands. It is not probable that such a state of facts would often occur, but the law is determined upon its rational effects under a hypothetical state of facts just as much as upon actual conditions.

Destitute men and women and wage earners are often without remedy to collect wages withheld. Court procedure is too costly and lengthy a remedy, often times justice withheld is justice denied. The evil of deferring wage payments is best illustrated in the record of Grey Brothers and the two murders that resulted therefrom. The state bureau has done a wonderful work in combating this system and in facilitating the collection of wages without long delays or expensive lawsuits. If the introduction of this law is likely to hamper the work of the bureau, then it becomes a little more necessary that some other statute which will not hamper the bureau's work be enacted.

## The Superintendent and the Labor Question.

G. D. Stark in the Wood-Worker.

Probably the factor which the study of scientific management and efficiency in general has emphasized more than any other in the human element. In other words, attention has been called to the fact that in studying methods and machinery, manufacturers have too often overlooked the men. The labor question has frequently been considered from the wrong angle; with too great emphasis on the dollars and cents proposition, and too much attention to laborers as operatives of machinery, and not enough thought for them as human beings.

That conditions are changing and that the human factor is being given its proper value in the business equation, is indicated by general efforts on the part of wood-workers and other manufacturers to improve the conditions of work and the comforts of the workers. With lunch rooms, lockers, reading rooms, recreation facilities, shower-baths, etc., being provided, it is no longer fair or accurate to say that this proposition is being overlooked or disregarded.

But, after all is said and done, it is the superintendent who must solve the problem of keeping his men healthy, happy and efficient. The owner of the plant may be willing to spend money for this or that feature of welfare work, and to do everything in his power to make his employees comfortable and contented, yet the wrong kind of superintendent may spoil the whole thing, and may make all the efforts which have been put forth go for naught.

What should be the attitude of the superintendent toward his men? Some of the most successful factory executives emphasize, above all other elements, that of absolute fairness.

"The moment employees get the idea that the superintendent has favorites, or that he is doing things for some that he is not doing for all," said a well-known wood worker recently, "his troubles are going to multiply. No matter what the other conditions of work may be, the superintendent must see that everybody is treated exactly alike. The hands of a manufacturing plant, from the smallest to the largest, are a democracy, and for this very reason putting one before his fellows, or showing the slightest favoritism is bound to cause resentment that will make itself felt in loss of efficiency and contentment."

It is for this reason that the use of the piecework system is frowned upon by many superintendents. Although it can not always be put into effect, because of practical obstacles, it is adopted by them whenever and wherever possible. Under this plan, instead of being paid by the day or week, each employee is paid exactly according to his output. Nobody can be favored at the expense of others, and the superintendent is sure to get the most out of his men.

While the piecework plan is not much in vogue, it is not to be discarded out of a purely sentimental account. If one employee is given a

raise, there are always numerous others who feel they are equally entitled to increased wages. Thus the foreman and the superintendent are likely to be accused of showing favoritism, where nothing of the sort is intended. But where the price scale is public and fixed, and everybody is paid on that basis and none other, the elimination of the petty jealousies that sometimes demoralize a working force is assured, and everybody is impressed with the fact that all are on the same footing, and that all have the same chance to win the maximum rewards.

Judged purely from the standpoint of improving the morale of a factory," said the superintendent who has had twenty-five years' experience in handling labor, "I believe the piecework system is the greatest benefit that can be imagined. I so thoroughly believe in it that in every factory I have been I have installed the system and in many plants I have extended its operations to kinds of work which were never before thought capable of being handled on that basis. It is not a panacea for the superintendent's troubles, by any means, but it certainly goes far in the direction of simplifying them."

In some cases superintendents with reputations as "drivers" have succeeded wonderfully well in increasing the production of their plants. But, generally speaking, such men will stir up resentment and cause loss of production instead of increases. The question is largely governed by the locality in which the mill or factory is operating, and the character of the employees. However, the general proposition that they must be treated and considered as human beings still holds good, and the superintendent who handles his charges as though they were part of their machines is risking trouble.

Suggesting the need of careful study of the personnel and general characteristics of the working force by the superintendent, a factory in the middle west some time ago employed a new man to handle the operations. His previous experience had been in another section, with a class of labor which required rather stern methods. The plans he had used in the other plant had been successful, but in three months he had succeeded in disorganizing the force and in alienating the management as well as the individual employees. He had simply not considered the changed conditions under which he was working, nor the possibility that his help would resent an attitude which had not been questioned in the other factory. His employer paid the penalty for his lack of discrimination. Fairness without favoritism, firmness without harshness, would, it seems to be a combination which the superintendent must cultivate. He must be fair to all, and his authority must be absolute to all.

Many troubles in manufacturing are due to the labor proposition. Some are due to the fact that the superintendent is not given com-

plete authority than to any other cause, in the opinion of many experienced executives.

Little things that are not of themselves important are magnified by employees until they lose their real proportions. Owners, by coming through the factory and dealing directly with employees, have sometimes caused their superintendents to be regarded merely as figureheads, resulting in their authority being questioned in the factory executives becoming useless to the companies which employed them. Sometimes the head of the wood-working establishment who has delegated authority to his superintendent, does so without thinking of the injury which he may be working, but a little thought will show that if the superintendent is to be really effective in inducing as much and as good mill work or furniture as he should, he must have complete control of the plant.

This does not mean that the owner who has his capital invested should know what is going on, and should confer with his superintendent regarding methods and processes. On the other hand, some factory men get the idea that the head of the company should never step over the threshold into the plant, but should regard office as his sole domain, leaving manufacturing operations to the superintendent entirely. This is as extreme as the other idea, which permits the owner to take part of the authority away from the factory executive. The proper plan is a happy medium whereby the owner gives complete control of the factory to the superintendent, but at the same time keeps closely in touch with what is going on.

The successful system is to choose a superintendent who is believed to be capable of rendering the required service, and then look to him for results. A responsible head, who is expected to deliver, is sure to do much better work than the superintendent whose efforts are hampered and interfered with by the well-meant, but ill-judged activities of the owners inside the factory. The wishes of the head of the company should be transmitted to the employees through the superintendent, and employees should be taught to look to him for information, promotion, dress and all other action from the company. Unless this is the case, the position is weakened and his usefulness diminished or even destroyed.

Not long ago a superintendent had made a good record in a working plant, and who had counted his share, at least, to the spite earnings which it had made for stockholders, resigned his position. He was asked the reason why, and said: "The head of the company interfered with my authority and did not give me the proper control of the factory. I felt that I could not do myself and them justice, and consequently I resigned."

Many competent superintendents have clauses in their contracts pro-

ing that they are to have complete authority in the plant, and do not to be interfered with in the detail of running the factory. Such contracts are advisable, not only for the protection of the superintendent, but also of the owner, and so that the former will know that he is to be held responsible for results. There is no doubt like divided authority, and the wise owner wants to be able to place the blame and the credit exactly where they belong.

#### DEFECTIVE FLUE.

A. J. Quinen has informed the Building Bureau of the Department of Public Works that the chimney flue in the building at 339 10th avenue is dangerous and will cause fire in the neighborhood if defects are not remedied. The matter is now being investigated.

#### MACHINE FOR CLEAVING OLD BRICK.

There has been invented by a Philadelphia, Pa., mechanic, a machine to clean used brick that will cut the cost to half or even a third of that of the old style method of cleaving by hand. It is estimated that the number of brick cleaned in that city in a single year is not less than 25,000,000, at a cost of \$1 to \$1.50 per 1,000. This new machine will clean them for about 50 cents a thousand.

#### WILL RAZE BUILDING.

Symon Bros., wreckers, have been granted a permit by the Board of Public Works to tear down a two-story and basement frame building on the west line of Webster street 100 feet north of McAllister, to make way for new improvements to be made at that location.

#### BUILDING HEIGHT.

A maximum of twelve stories, not to exceed 170 feet in height, is the limit prescribed for Minneapolis buildings. The matter has been the subject of serious study for some time and the ordinance seems to satisfy the conditions. The streets of Minneapolis are fairly wide and of nearly uniform width and so the height limit is uniform for the city.

#### TO COUNT AND HANDLE SACKS.

An automatic sack bundling and counting machine for taking care of cement bags has been put on the market by the Faehrbill Manufacturing Co., of Cleveland, Ohio. By this machine the counting is done automatically, a counter being set to make the bundles in any desired number. When the required number are placed on the machine, a bell rings, a lever is pulled down, a handle turned, and the bundle of sacks is securely tied with wire, ready for shipment.

#### NEW TREND OF BRITISH COLUMBIA TRADE.

[Consul General R. E. Macdonald, Vancouver, Canada, Oct. 26.]  
Local market conditions indicate a demand in British Columbia for the particularly in Vancouver, for many articles produced in the United States which have been supplied to Europe.

However, the demand in the Province of British Columbia is increasing for the latter European goods, trade.

Among the unfavorable conditions affecting trade in the Western Province that has prevailed in the Province during the past year, and which have been made more acute by the present war and the cessation of building operations. These have resulted in an exodus of people from the cities and towns and a general curtailing of expenditures. The financial stringency has also resulted in a material reduction of general supplies, though this must have the effect of creating a more active demand later, because of the necessity of replenishing stocks when conditions improve.

#### Cutlery and Hardware.

Cutlery of all kinds, razors, skates, vises, pliers, putty knives, screw drivers, drills, hair clippers, shavers, scroll and cross cut saw tools, coping saw blades, clocks, rifles, shotguns, revolvers, and ammunition have heretofore been imported from the Continent. There is a good demand for firearms and ammunition in the local market, and there is also a considerable trade with the Orient in these lines supplied from here. England will probably continue to supply most of the trade in cutlery, but tools, etc., will be furnished by the United States and Canada. Galvanized wire for winding wooden water pipe, a quantity of which is manufactured here and which is also imported from the Continent, will in the future probably be supplied by the United States and Canada.

#### INCORPORATIONS.

American Asbestos and Manufacture Company. To manufacture structural material, fibrous and mineral products. Capital Stock, \$1,000,000, 10,000 shares at \$100 each amount subscribed \$500. Place of business, San Francisco. Directors—W. B. Stone, E. E. Stone, J. A. Voorhes, C. W. Waller and R. R. Norton, 1 share each.

Ursa Major Corporation. To deal in lands for agricultural or mining purposes. Capital Stock, \$25,000, 250 shares at \$100 each, amount subscribed, \$300. Place of business, San Francisco. Directors—Geo. Monk, E. Ryan, G. T. O'Flanagan, 1 share each.

Lowell Land Co. General real estate business. Capital Stock, \$500,000, 5,000 shares at \$100 each amount subscribed \$500. Place of business, San Francisco. Directors—J. E. Weller, A. J. Lowell, W. Percival, W. C. Percival and G. E. Pine, 1 share each.

The Green Home. To maintain a home to care for and nurse persons. Capital Stock, \$500, 50 shares at \$10 each amount subscribed, \$50. Place of business, San Francisco. Directors—A. S. McEl Honey, E. T. Greer and M. Clements, 1 share each.

White Printing Company. General printing business. Capital Stock, \$25,000, 250 shares at \$100 each amount subscribed \$50. Place of business, San Francisco. Directors—J. Perry, A. T. Perry, G. H. Sperry, 1 share each.

The Green Printing and Publishing Co. Capital Stock, \$100,000, 1,000 shares at \$100 each amount subscribed \$100. Place of business, San Francisco. Directors—J. Perry, A. T. Perry, G. H. Sperry, 1 share each.

age 100,000, 1,000 shares at \$100 each amount subscribed \$100. Place of business, San Francisco. Directors—J. Perry, A. T. Perry, G. H. Sperry, 1 share each.

Local Incorporated Business. Capital Stock, \$100,000, 1,000 shares at \$100 each amount subscribed \$100. Place of business, San Francisco. Directors—J. Perry, A. T. Perry, G. H. Sperry, 1 share each.

Owners, State of Washington. Carl E. Uhlen, chief engineer for the Washington Water Power Company, has completed plans for the construction of two buildings for the state fish hatchery in Natatorium Park, which will be constructed this winter. One building will be 44x26 and the other 28x44 feet. The larger building will contain one of the largest aquariums on the coast.

## BONDS.

**SANTA CLARA, SANTA CLARA CO., CAL.**—The Town Trustees of Santa Clara have set December 21st as the date for the voting of bonds in the sum of \$20,000.

Should the issue carry the proceeds of the bonds will be used in completing the State Highway through the town of Santa Clara as follows: From the corner of the San Francisco road and Scotts lane, along the San Francisco road to Lincoln street and south on that thoroughfare to Franklin street and east on Franklin street to Jefferson street, thence from the corner of Grant and Franklin streets south on Grant street to the Alameda and along the Alameda to the limits of the town.

**YREKA, SISKIYOU CO., CAL.**—Twelve thousand dollars worth of school bonds of the Montague District have been sold to Blyth, Witter & Co. of San Francisco. The price paid was a premium of \$100 and accrued interest.

**YREKA, SISKIYOU CO., CAL.**—The 10th sewer bonds in the sum of \$21,000 were recently sold to the residents of Scott Valley, O. V. Green and the Scott Valley Bank were the largest buyers. The work on the sewer will be put under way immediately.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Delegates from improvement clubs have organized a protest with the Superior court of the county against calling a bond election for \$100,000 for the 10th Exposition, asserting that it would cost the county \$20,000 and that it would be a burden to the people would be desired.

**NEW ASPEN, PACE CO., CAL.**—The board of public citizens of New-

castle will decide at the polls if they want to bond the town for \$2,500, the money to be used in the extension and completion of sewers.

The election has been called by the Commissioners of the Newcastle Sanitary District.

As yet no opposition has developed to the passage of the bonds.

**ESCONDIDO, SAN DIEGO CO., CAL.**—The City of Escondido has disposed of a bond issue of \$100,000 for the development of a water supply and the construction of a municipal distributing system.

**COUNCIL, IDAHO.**—The question of voting bonds in the sum of \$25,000 for the construction of a court house was defeated.

**HAYRE, MONT.**—Bonds voted here for the construction of a county court house carried by eleven votes. The bonds were in the sum of \$125,000.

**HAILEY, IDAHO.**—The question of voting \$25,000 bonds for a water system has been defeated. It is thought that another election will be called.

**ELMA, WASH.**—Bonds in the sum of \$10,500 were voted here November 30th, for the completion of the high school, and work will be started at once.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—The approval of the Pacific Electric Railroad bond issue by the State Railroad Commission is believed to mean that construction of repair shops in this city by that corporation will be started in the near future.

**COLTON, SAN BERNARDINO CO., CAL.**—Bonds in the sum of \$30,000 have been voted at the special election held at Colton for a new school building.

**DUNCAN, ARIZ.**—Sweet, Causey, Foster & Co. of Denver has, through Frank R. Coon, cashier of the Lordsburg National Bank, purchased the \$10,000 bond issue of the Duncan High School District.

**EL PASO, TEXAS.**—At the regular meeting of the County Commissioners, all bids submitted for the \$360,000 worth of court house and jail bonds were rejected. The commissioners refuse to sell the bonds for less than par and accrued interest.

## BRIDGES AND DAMS.

**SAN FRANCISCO.**—Traffic bridge, steel and concrete construction, \$15,000. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. The bridge will be erected across East street from a point north of the Ferry Tower, and will be 22 feet high. It will be carried on four sets of columns. The traffic way will be 12 feet wide and will be covered with asphalt. Bids will be called for shortly by the State Board of Harbor Commissioners.

**RICHMOND, CONTRA COSTA CO., CAL.**—Wharf, steel and reinforced concrete. Cost not stated. Engineers, Aitken & Tibbitts, Alaska Commercial Bldg., S. F. Owners, City of Richmond. Plans have been completed for a modern wharf to be constructed on

the Richmond waterfront. The structure will be carried on concrete piles. There will be a steel frame ship with a single track railroad running its entire length. The wharf proper will be 550 by 30 feet. Bids will be opened on December 28th. Plans and specifications can be secured from the engineers.

**RED BLUFF, TEHAMA CO., CAL.** Bridges, 3 steel and concrete. Cost not stated. Engineer, County Surveyor William F. Lunning. Red Bluff, owners, Tehama County. County Surveyor Lunning has prepared plans and specifications for the construction of three bridges of concrete construction to be constructed along the route of the State Highway from Red Bluff to the Shasta County line. The plans will be submitted to the Supervisors on December 8th, when bids will be called for. The bridges aggregate 195 linear feet and are as follows: Bridge over Dibble Creek 335 feet long, bridge over South Fork of Blue Tent Creek 100 feet long, and a bridge two miles south of the Four Mile House 10 feet long.

**TUBA, ARIZ.**—Bridge, steel highway type. Cost not stated. Engineer, Commissioner of Indian Affairs, Washington, D. C. Owners, United States Government. Bid 1, Mendenhall, Straw & Bird Construction Co., Springfield, Utah.

2, MacArthur Brothers Co., 11 Pine street, New York city.

3, Heuser & Sim, 528 Dooley Block, Salt Lake City, Utah.

4, Utah Construction Co., Ogden, Utah.

5, Reynolds-Ely Construction Co., Springfield, Utah.

6, W. A. Kettlewell & Sons, Iowa City, Iowa.

7, Winster Brothers Co., Minneapolis, Minn.

8, Grant, Smith & Co., 1150 Henry Building, Seattle, Wash.

9, Yale & Reagan, 208 La Salle street, Chicago, Ill.

10, W. O. Morrison, Denver, Colo.

11, Frederick Rohand, San Francisco, Cal.

12, Security Bridge Co., Minneapolis, Minn.

13, Wasatch Grading Co., 512 Dooley Block, Salt Lake City, Utah.

14, Olaf L. Hedenberg, William F. Olson, George E. Ross & A. A. Love-

less, Provo, Utah.

15, The Heley Construction Co., Livingston, Mont.

16, Ridoout & Andrus, Draper, Utah.

17, Cowan, Lovelace, Dixon, Wilson & Co., Payson, Utah.

18, Gibbons Brothers, 953 3rd avenue, Salt Lake City, Utah.

19, Eli R. K. Ferguson, Scienus Gardner, R. W. Monny, Alma Andrus, R. S. Bradford & John W. Roach, Spanish Fork, Utah.

20, Malcolm Brothers, Spanish Fork, Utah.

21, C. E. Green, for Green Construction Co., Tooele, Utah.

22, Enach Smith, 319 Kearns Building, Salt Lake City, Utah.

23, Morrison - Knudsen Co., 12-13 Shaw Block, Boise, Idaho.

#### Division No. 1.

Item 1, Excavation, class 1—Bid 1, 20.50; 2, 15; 3, 20; 4, 21; 5, 16; 6, 25; 7, 18.60; 8, 15; 9, 24; 10, 17; 11, 18; 12, 25; 13, 19; 14, 20; 15, 24.

Item 2, Excavation, class 2—Bid 1, 20.50; 2, 35; 3, 20; 4, 21; 5, 37; 6, 25; 7, 18.60; 8, 35; 9, 40; 10, 42; 11, 18; 12, 25; 13, 48; 14, 40; 15, 50.

Item 3, Excavation, class 3—Bid 1, 20.50; 2, 31; 3, 65; 4, 80; 5, 75; 6, 31; 7, 75; 8, 120; 9, 80; 10, 110; 11, 48; 12, 11; 13, 15; 14, 12.25; 15, 12.

Item 4, Overhaul—Bids 1 to 15, inclusive, 2c.

Item 5, Excavation for structures—Bid 1, 50; 2, 75; 3, 65; 4, 31; 5, 55; 6, 60; 7, 60; 8, 55; 9, 125; 10, 70; 11, 150; 12, 50; 13, 11; 14, 50; 15, 31.

Item 6, Concrete in structures—Bid 1, 9.20; 2, 9.55; 3, 12.25; 4, 10; 5, 11; 6, 11.50; 7, 12.50; 8, 11.40; 9, 11; 10, 17.30; 11, 10; 12, 11.40; 13, 9.70; 14, 10.80; 15, 11.50.

Item 7, Back filling—Bid 1, 1; 2, 50; 3, 35; 4, 50; 5, 45; 6, 75; 7, 50; 8, 15; 9, 50; 10, 70; 11, 60; 12, 65; 13, 11; 14, 50; 15, 25.

Item 8, Rock fill—Bid 1, 1.50; 2, 2; 3, 1.50; 4, 1.25; 5, 1.35; 6, 3.50; 7, 2; 8, 2.50; 9, 2; 10, 3; 11, 1; 12, 3; 13, 1; 14, 5; 15, 1.

Item 9, Paving—Bid 1, 2.50; 2, 2.50; 3, 3; 4, 1.50; 5, 1.10; 6, 3; 7, 2.50; 8, 3; 9, 2; 10, 2.70; 11, 2.50; 12, 1.50; 13, 3; 14, 2; 15, 2.

Item 10, Laying 6-inch pipe—Bid 1, 10; 2, 10; 3, 10; 4, 15; 5, 7; 6, 35; 7, 18; 8, 10; 9, 15; 10, 30; 11, 15; 12, 60; 13, 25; 14, 20; 15, 20.

Item 11, Laying 12-inch pipe—Bid 1, 20; 2, 15; 3, 25; 4, 20; 5, 12; 6, 45; 7, 35; 8, 60; 9, 25; 10, 40; 11, 40; 12, 70; 13, 30; 14, 25; 15, 60.

Item 12, Laying 18-inch pipe—Bid 1, 10; 2, 20; 3, 50; 4, 25; 5, 20; 6, 60; 7, 35; 8, 70; 9, 40; 10, 60; 11, 65; 12, 80; 13, 35; 14, 15; 15, 1.

Item 13, Concrete canal lining—Bid 1, 9.50; 2, 7.50; 3, 10.50; 4, 12; 5, 13.75; 6, 12.50; 7, 19; 8, 16; 9, 12; 10, 14.50; 11, 15; 12, 15; 13, 10; 14, 30; 15, 12.

Item 14, Tunnel—Bid 1, 24.70; 2, 28; 3, 32; 4, 32.25; 5, 32.6; 6, 36; 7, 26; 8, 32.50; 9, 45; 10, 23.50; 11, 30; 12, 30; 13, 33; 14, 37; 15, 23.75.

Total, division 1—Bid 1, 17,465; 2, 56; 3, 71.25; 4, 54,371.25; 5, 52,179.75; 6, 58,719.50; 7, 64,890; 8, 55,004.65; 9, 59,608; 10, 56,108; 11, 57,744.50; 12, 81,177.75; 13, 59,122.50; 14, 64,129.75; 15, 40,547.75.

#### Balanced Values.

The following bids were received by the U. S. Reclamation Service, Los Angeles, Cal., specification 355-F, for control piping and materials for balanced

valves, Arrow Rock Dam:

Item 1, 10 three-inch ejector valves; 2, 3 positive control indicators; 3, galv. pipe and fittings; 4, miscellaneous pipe, hose and fittings; 5, same as item 4; 6, same as item 1, 7, same as item 2.

Union Iron Works, 311 California street, San Francisco, Cal., item 1, \$330, 25 days; 2, \$290, 25 days; 6, \$330, May 15; 7, \$290, May 15; delivery San Francisco.

Keystone Iron Works, 973 North Main street, Los Angeles, Cal., item 1, \$34, 20 days; 2, \$194, 14 days, 3, \$447, 20 days; 4, \$398, 20 days; 5, \$395, May 15; 6, \$384, May 15; 7, \$193, May 15; delivery Los Angeles.

Crane Co., Los Angeles, Cal., item 3, \$216, delivery 20 days; 4, \$308, 30 days; 5, \$318, May 15; delivery Chicago.

Stacy-Schmidt Mfg. Co., York, Pa., item 1, \$375, 45 days; 2, \$220, 45 days; 3, \$310, 45 days; 4, \$365, 45 days; 5, \$360, May 15; 6, \$340, May 15; 7, \$180, May 15; delivery York, Pa.

Union Machine Co., 934 Brannan street, San Francisco, Cal., item 1, \$796, 40 days; 2, \$225, 40 days; 3, \$300, 40 days; 4, \$366, 40 days; 5, \$266, May 15; 6, \$396, May 15; 7, \$225, May 15; delivery San Francisco.

Fulton Engine Works, Los Angeles, Cal., item 1, \$455, 45 days; 2, \$280, 45 days; 3, \$318, 45 days; 4, \$424, 45 days; 5, \$423, 15 days; 6, \$455, May 15; 7, \$280, May 15; delivery Los Angeles.

United Iron Works, 520 Second street, Oakland, Cal., item 1, \$566, 25 days; 2, \$297, 25 days; deliveries Oakland, Cal.

Pelton Water Wheel Co., 19th and Harrison streets, San Francisco, Cal., item 1, \$916, 35 days; 2, \$490, 37 days; 6, \$916, May 15; 7, \$470, May 15; delivery San Francisco.

Joshua Hendy Iron Works, 75 Fremont street, San Francisco, Cal., items 1, 2, 6, and 7, lump sum, \$1,409.

### Reclamation Work.

The Reclamation Service is asking for sealed proposals for a big job of earthwork involving about 335,000 cubic yards of excavation. This work is in connection with the Sun River project and is located about 25 miles northwest of Great Falls, Mont., and about 6 miles north of Fort Shaw, Mont., on the Sun River branch of the Great Northern Railway and about 6 miles south of the towns of Bole, Sloan and Cordova, Mont., on the Choteau branch of the Great Northern Railway. The excavation is on the Greenfields distribution system, Greenfields, South, and Mill Coulee canals. All proposals should be sent to the office of the United States Reclamation Service, Great Falls, Mont., before 2 o'clock p. m., December 22nd. Full particulars will be furnished upon request to the U. S. R. S., Washington, D. C.; Great Falls, Mont., or Fort Shaw, Mont.

### Flathead Reclamation Project.

The Reclamation Service is asking for sealed proposals for the construction of structures on the Flathead project in Montana. The work involves about 9,500 cubic yards of excavation, 1,000 yards of concrete, 4,000 square yards of paving, the placing of 73,500 pounds of reinforcing steel and the

other adjoining holdings. Should this be carried out an immense pumping plant will be installed. R. J. Murphy is the Superintendent of the Phelan ranch.

PORTLAND, ORE.—Sewer work, re-

#### Contracts Awarded.

NAPA, NAPA CO., CAL.—Sewer work, \$2,341.50. Engineer, City Engineer, Napa. Owners, City of Napa. Contractor, John H. May, Napa. Contract price, \$2,341.50.

SAN FRANCISCO — Municipal car barns, 1 story and base, Class A construction, \$196,900. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, R. W. Moller, S. F. Contract price, \$196,900.

#### RESIDENCES.

SAN FRANCISCO — Residence, 2 story and base, frame, \$15,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Dr. Guido Cagliari. The dwelling will be erected at the corner of Larkin and Lombard streets, and has been designed to contain twelve rooms, three baths and sleeping porch. The engineer's estimate of the work was \$187,616.

## STORES AND OFFICES

SAN FRANCISCO—Office addition, 22 stories. Class A construction. Cost not stated. Architect, Willis Polk, Hobart Bldg., S. F. Owners, M. H. de Young, Chronicle Bldg., S. F. The present twelve and seventeen story office structure at the corner of Kearny and Market streets will be brought up to a height of 43 stories. In an interview Mr. de Young stated that preliminary plans for this work have been underway for some time and that these provide for a forty-three story building, the new portion of which will be carried on an entirely new steel frame and new footings and foundations extending some twenty feet below the surface. Details of the architectural design were refused by Mr. Polk, who stated that publicity of this important news had been left in the hands of Mr. de Young. Further mention will be made of the work.

**MODERN STANISLAUS CO. CO.** has a story and base. The latter is construction. Cost not stated. Architect, Charles C. Frye, 20 Montgomery street. S. F. owner is represented by G. H. Fendler Co., S. F. The building will be erected at the corner of 40th and 1st streets and will cover an area of 100 by 100 feet. There will be a number of stories finished in pine and hardwood. Ceiling floor will be used. Patent stone fronts are placed. Part of the building will be covered with a heavy glass. Plans are being prepared with a view of the building being a modern street level building.

this work has been let to Corbett & Bayliss. Other parts of the work are now out for figures.

**SACRAMENTO, CAL.**—Stores, 1 story and base, brick, \$ 9,000. Architect, none. Owner, Gene Pendergast, 1311 22nd street, Sacramento. The building will be erected on Third street and will cover a considerable ground area. There will be several stores. Interiors will be finished in pine throughout. Patent store fronts are specified. A cement floor will be used. Exterior of the building will be faced with pressed brick. Plans have been completed and are in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

### SEALED PROPOSALS.

#### NOTICE TO CONTRACTORS.

**OFFICE OF THE CLERK OF THE Board of Supervisors, Alameda County, California.**—Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, at his office, until **Monday, December 28, 1914, at 10 o'clock A. M.** (The day when said bids will be opened and the contract awarded) for the installation of steel roller hook shelf cases in the office of the Recorder of Alameda County. Specifications and sealed work are on file in the office of the County Clerk, subject to inspection of bidders.

Each bid must be accompanied by a check for at least ten per cent of the amount of the bid or proposal, certified to by some responsible bank, and made payable to John P. Cook, Clerk of the Board, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract.

(Seal) **JOHN P. COOK,**  
Clerk of the Board of Supervisors.

### PROPOSALS FOR RECLAMATION WORK.

**RECLAMATION WORK**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, at St. Ignatius, Mont., until **2 o'clock p. m., December 22, 1914**, for the construction of a structure, one mile laterals, called "A" and "B", and an excavation, 1,950 cubic yards of concrete,

1,000 square yards of paving, the placing of about 73,500 pounds of reinforcing steel and the manufacturing and laying of about 2,100 linear feet of concrete pipe. The work is situated on the east side of the Flathead River, from 6 to 12 miles southwest of Polson, Mont. For particulars address the United States Reclamation Service, Washington, D. C.; Great Falls, Mont., or St. Ignatius, Mont. A. P. DAVIS, chief engineer.

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 586.**—Proposals for Steel Rolling Doors, Wire Cables and Attachments, Galvanized Sheet Steel, Rivets, Bolts, Washers, Cable Clips, Turnbuckles, Bronze Bars, Carpenters' Squares, Metallic Tapes, Manila Rope, Leather Belting, Flax Packing, Sandpaper, Chamois Skins, Ships' Felt, Window Glass, Lye, Metal Polish, Soap, Lamp Oil, Linseed Oil, Japan Dries, Varnish, Lubricating Engine Truck Paint, Chrome Yellow, Bristol Board and Paper.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m., December 14, 1914**, at which time they will be opened in public, for furnishing the above mentioned articles. Plans and general information relating to this circular (No. 586) may be obtained from this office or the office of the assistant purchasing agent, Long Point, Panama, Panama, Panama, Cal.; also from the U. S. engineer's offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. ROGGS, major, corps of engineers, U. S. army, general purchasing officer.

### PROPOSALS FOR HIGHWAY BRIDGE.

**STEEL HIGHWAY BRIDGE**—Department of the Interior, Office of Indian Affairs, Washington, D. C.

Sealed proposals placed and marked on the outside of the sealed envelope "Proposals for Steel Highway Bridge Across the Moencopi Wash, near Tuba, Ariz.," and addressed to the commissioner of Indian Affairs, Washington, D. C., will be received at the Indian office until **2 o'clock p. m. of December 22, 1914**, for furnishing materials and labor for the erection of a steel highway bridge across the Moencopi Wash, Western Navajo Indian Reservation, Ariz. In strict accordance with the plans, specifications and instructions to bidders, which may be examined at the office of the paper or periodical in this advertisement appears, the U. S. Indian Warehouses at Ft. St. Louis, Mo.; Omaha, Neb., and San Francisco, Cal.; the Builders' Exchanges at Portland, Ore., and Spokane, Wash., and at the Western Navajo School. For further information apply to the superintendent of the Western Navajo Indian School, Tuba, Ariz. C. A. T. SELLS, commissioner.

### PROPOSALS FOR BUILDING.

**BUILDING** Sealed proposals indorsed "Proposals for Ward Pavilions" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m., January 2, 1915**, and then and there publicly opened, for three temporary one-story wooden ward pavilions at the naval hospital reservation, Puget Sound, Wash. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval yard, Puget Sound, Wash. H. R. STANFORD, chief of bureau.

### PROPOSALS FOR CRANES.

**CRANES** Sealed proposals indorsed "Proposals for Electric Traveling Cranes" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m., December 12, 1914**, and then and there publicly opened, for three electric traveling shop cranes at the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau, H. R. STANFORD, chief of bureau.

### PROPOSAL FOR GAS RECORDER.

**GAS RECORDER** Sealed proposal indorsed "Proposals for Flue Gas Re-

corder" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m., December 12, 1914**, and then and there publicly opened, for one gas flue gas recorder at the United States naval hospital heating plant, Mare Island, Cal. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, Mare Island, Cal. H. R. STANFORD, chief of bureau.

### PROPOSALS.

**OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.**

Sealed proposals will be received at this office between the hours of **10 o'clock p. m. and 3 o'clock p. m., Wednesday, the 16th day of December, 1914**, for doing the following work to wit:

The sheet metal covering of down pipes and lantern of the City Hall.

Progressive payments will be made. Said work must be done in accordance with the specifications on file at the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within one hundred (100) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$7,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Board of Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect. All proposals must be made upon such forms.

The Board of Public Works reserve the right to reject any and all bids.

By order of the Board of Public Works.  
F. J. CHURCHILL,  
Secretary.

### PROPOSALS FOR ELECTRICAL SUPPLIES.

**ELECTRICAL SUPPLIES**—Office of the Quartermaster, Fort Bayard, N. M.—Sealed proposals will be received here until **2 p. m., December 10, 1914**, for furnishing miscellaneous quantities of electrical supplies, including choke coils, 3 lightning arresters, watt hour meter, 3 lightning arresters, 1 water wheel, 1 electric pump, 1 transformer, 3 standard wrenches, 4 pipe wrenches, 1 piler, screwdrivers, 6 files and 9 twist drills. For further information address C. E. ELLERFSON, quartermaster, Fort Bayard, acting quartermaster.

### PROPOSALS FOR CANAL WORK.

**CANAL WORK**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposal will be received at the office of the U. S. Reclamation Service, St. Ignatius, Mont., until **3 o'clock p. m., December 15, 1914**, for the construction of about 38 miles of canals and laterals, involving the excavation of about 106,000 cubic yards of material, and a dam situated on the east side of the Flathead River, about 18 miles southwest of Polson, Mont., and 9 miles west of Ronan, Mont. For particulars address the U. S. Reclamation Service, Washington, D. C.; Great Falls, Mont., or St. Ignatius, Mont. A. P. DAVIS, chief engineer.

### PROPOSALS FOR STEEL TANKS.

**STEEL TANKS**—Sealed proposals indorsed "Proposals for Fuel-Oil Tanks," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m., December 12, 1914**, and then and there publicly opened for nine 2,100-gallon steel fuel-oil storage tanks at the navy yard, Puget Sound, Wash. Mare Island, Cal., and Norfolk, Va., and naval coal depots, San Diego, Cal., and Melville, R. I. Plans and specifications on application to the bureau, H. R. STANFORD, chief of bureau.

**LABOR.** Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$1,000. San Francisco. Architect, William Helbing, 1120 Market street, S. F. Owner, Phil Bannon, Pacific Gear and Tool Co. The dwelling will be erected at the corner of 13th avenue and Fulton street, and has been designed to contain seven rooms and bath. Interior finish will be of pine and redwood with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**SHEET METAL WORK**—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans have been completed for the sheet metal covering for the dome of the new City Hall. Bids are now being taken and will be opened by the Board of Public Works on December 16th. Plans and specifications can be secured from the City Department of Architecture. An official proposal appears in another column of this issue.

**EXHIBIT BOOTH**—Frame construction, \$1,500. San Francisco. Architect, Bernard Joseph, First National Bank Bldg., S. F. Owners, Schloss Manufacturing Co. This booth will be erected in the Manufactures Palace. The most important parts of the work will be mill work, plastering, glass and electric work. Plans are complete and figures are being taken.

**MACHINE SHOP**—1 story and base, brick, \$6,000. San Francisco. Architect, W. H. Crim, Jr., 425 Kearny street, S. F. Owner, John McConaghy. The building will be erected on the south side of Grove street west of Polk, having a frontage of 34 feet and a depth of 120 feet. Interior will be finished in pine. A cement floor will be used. Metal window sash and frames are specified. Exterior will be covered with pressed brick. Plans are complete and figures are now being taken.

**FLATS**—2, 3 story, frame, \$4,500 each. San Francisco. Architect, W. H. Armitage, 328 Montgomery street, S. F. Owner, A. Cadenazo. These two buildings will be erected on the east side of Powell street south of Lombard, and each will contain two modern flats of four and five rooms. Frontages will be 20 feet and the depth 55 feet. Basement will be arranged for private garage. Interior will be finished in pine and redwood with some hardwood floors. Interior will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures have been taken under advisement by the architect.

**FLAT ALTERATION AND REPAIRS**—Frame construction, \$2,000. San Francisco. Architect, none. Owner, M. Gotlieb, 2009 Stockton street, S. F. This work will consist of repairing the recent fire damage, and will

include new interior finish, plastering, painting, plumbing and electric work. But little exterior work is necessary. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**FLATS** 3 story and base, frame, \$6,500. San Francisco. Architect, none. Owner, Mrs. M. A. Webster 711 15th avenue. This building will be erected on the west side of 14th avenue north of Balboa street, having a frontage of 15 feet by a depth of 61½ feet. Interior has been arranged for three modern flats of five and six rooms. Interiors will be finished in pine, redwood and elm. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile. Automatic water heaters will be installed. Entrances will have tile wainscot. Exterior of the building will be covered with shiplap and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**FLAT ALTERATION**—Frame construction, \$2,000. San Francisco. Architect, John T. Kidd, 456 Clipper street, S. F. Owner's name withheld. This work will consist of remodeling a frame residence into two, modern flats. Included in the work will be interior finish, plastering, plumbing, electric work and painting. Open fire places will be installed. Exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

**HOTEL**—5 story and base. Class C construction, \$50,000. San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, Columbia Realty Co. The building will be erected on Sutter street west of Taylor and will cover a considerable ground area. Plans show a total of 60 guest rooms, both single and en suite. Nearly all rooms will have private baths. Interior will be finished in pine and hardwood. There will be steam heat and a hot water system, elevator service and vacuum cleaning. Bath rooms will be finished in tile with composition floors. Entrance will have marble wainscot and tile floor. Some ornamental plaster will be used in the lobby. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**MUNICIPAL POWER PLANT**—Cost not stated. San Francisco. Engineer, City Department of Engineering, Temporary City Hall. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for furnishing and installing the power plant equipment at the Municipal Plant in the Civic Center show the Davis-Rogers Co. low at \$11,950. They will probably be awarded the contract.

**ROAD CONSTRUCTION**—Cost not stated. Visalia, Tulare Co., Cal. Engineer, County Surveyor, Visalia. Owners, Tulare County. The County Surveyor has completed plans for a road to be built from Badger to Esham. The plans will be submitted to the Board of Supervisors at once, and bids will probably be advertised for next week.

**TUNNEL LIGHTING, ETC**—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for lighting the Stockton

street tunnel have been completed and figures are now being called. Bids will be opened on December 16th. Both the electric wiring and fixture work is included in the contract. Plans and complete information can be secured from the Board of Public Works.

**AUTO ROAD CONSTRUCTION**—Cost not stated. Truckee, Nevada Co., Cal. Engineer, County Surveyor, Truckee. Owners, Nevada County. The Truckee Chamber of Commerce at its regular meeting discussed plans for a new auto road between Truckee and Reno, along the banks of the Truckee River, thereby doing away with the steep grades of the present road. This piece of road will be one of the links of the Lincoln Highway. The matter will be considered at the next meeting when it is thought that definite action will be taken on the work.

### Contracts Awarded.

**MUNICIPAL CAR BARN**—1 story and base. Class A construction, \$196,300. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, R. W. Moller, S. F. Contract price, \$196,300.

**STEAM DISTRIBUTION SYSTEM**—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for constructing an underground steam distributing system in the Civic Center show Robert Dalziel, Jr., Co. low on both propositions as follows: Proposition A, \$21,100 and Proposition B, \$18,930.

**APARTMENT HOUSE**—7 story and base. Class A construction. Cost not stated. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, Mr. Morsehead. Contractors, Williamson Bros. & Henderson, Holbrook Bldg., general construction. Cost not stated. James Pinkerton, plumbing, Standard Electric Co., electric work.

## City Bids Opened

R. W. Moller Presents Low Bid For First Story of New Municipal Car Barns. F. Rolandi Gets California Linc.

Bids were opened at the Wednesday afternoon meeting of the Board of Public Works for constructing track for the California street Municipal Railroad and for constructing the first story of the Potrero avenue car barns. F. Rolandi presented the low figures for the California Street Railroad at \$103,308 with Peterson & Grier next low at \$103,001, a difference of about \$1,700. F. Rolandi will be awarded the contract at the Friday morning session of the Board of Public Works.

This contract calls for track grading, paving and laying of the steel. Steel will be furnished by the City and County.

R. W. Moller presented the lowest figures for constructing the car barns at \$168,994. Following is a complete list of the firms bidding on the work:

**Municipal Car Barns (First Story.)**  
H. L. Peterson, \$245,000  
Lundgren Co., 204,475  
F. Rolandi, 204,119  
Grant Fee, 213,000

J. J. Leonard, ..... \$100,000  
T. W. McClennahan, ..... 100,000  
R. W. Moller, ..... 100,000  
C. W. Wold, ..... 100,000  
Sound Constr. & Eng. Co., ..... 100,000  
M. Fischer, ..... 100,000  
Clinton Fireproofing Co., ..... 100,000  
James L. McLaughlin, ..... 100,000

The following firms submitted bids for the California Street Railroad work but as only the two lowest bids were totaled a list of their bids can not be published.

**California Street Railroad.**

Lindgren Co., ..... \$100,000  
Peterson & Grier, ..... \$100,000  
A. Borland, ..... 100,000  
F. Rolandi, ..... 101,508  
Ralsch Improvement Co., ..... 101,508  
Mahony Bros., ..... 101,508  
Eaton & Smith, ..... 101,508  
Karl Ehrhart, ..... 101,508  
Contra Costa Constr. Co., ..... 101,508  
Healy-Tibbitts Constr. Co., ..... 101,508

At the Friday morning meeting of the Board of Public Works a contract was awarded to the Clinton Fireproofing Company for constructing the first story of the Seventeenth Street Municipal car barns. The contract price is \$196,900. The bid of R. W. Moller, which was low, has been withdrawn. No contract was awarded for the California Street line of the Municipal Railroad system as a provision of the contract was that the work should be started at once. Because of the Christmas shopping the Board has decided to hold the award until after the holidays.

Bids were opened at the same meeting for furnishing and installing equipment for the Municipal Power Plant in the Civic Center. Davis-Rogers Co. submitted the lowest figure for the equipment for the power plant at \$11,950, and the Robert Dalziel Jr. Co. the lowest bid for the underground steam system. Following is a complete list of the bids received:

**Equipment Civic Center Power Plant.**  
Robert Dalziel Jr. Co., ..... \$12,000  
Davis-Rogers Co., ..... 11,950  
Turner Co., ..... 12,694  
Siebert Co., ..... 12,400  
Wittman Lyman Co., ..... 12,148  
Pacific Fire Ext. Co., ..... 13,500  
Scott Company, ..... 11,994

**Underground Steam Distribution System, Civic Center.**

Robert Dalziel Jr. Co., Prop. 1, Proposal A, ..... B \$21,100; Prop. 2, Proposal A, ..... B \$18,920.  
Scott Co., Prop. 1, Proposal A, \$28,560  
B, \$23,250; Prop. 2, Proposal A, \$21,600;  
B, \$20,440.  
F. P. Walsh, Bid void (no check).  
Wittman Lyman Co., Prop. 1, Proposal A, \$27,830; B, \$—; Prop. 2, Proposal A, \$23,964; B, \$—.  
Kiernan & O'Brien, Prop. 1, Proposal A, \$32,676; B, \$25,676; Prop. 2, Proposal A, \$28,581; B, \$22,164.

**Addition Planned For Chronicle Building.**

M. H. de Young Considering Plans of Architect Willis Polk to Make Building Forty-three Story Skyscraper.

Seattle is no longer to have the distinction of having the tallest skyscraper west of Chicago for some time

coming year. Such a record will be held by a forty-three story building, which is to be added to the "Building" skyscraper, the work of the Chicago architect, Mr. de Young. Willis Polk was at Seattle on Monday for a preliminary detail of the building, which he worked out for the addition to the present Chronicle building, the corner of Kearney and Taylor streets, which would give to their building the distinction of being the tallest structure west of Chicago. The addition will be a superimpose on top of the present building and will consist of sufficient stories to bring the entire building, both the old and new portion, to a height of forty-three stories. It is not the intention of the architect to carry the new portion on either the foundations or frame of the old building but to carry new footings to a depth of ninety feet and then pierce the floors of the old building and erect through these holes an entire new frame which will carry only the new additional stories.

In speaking of the design and other matters of construction Mr. Polk refused to go into details, saying that any publicity was in the hands of Mr. de Young, whom he expected would announce his important news early in January.

#### BUILDING PERMIT FEES.

According to a report compiled the Bureau of Building Inspection of the Board of Public Works collected during the month of November a total of \$1,819.20 for building permits. During the month there was 498 permits issued.

#### BUILDING OPERATIONS FOR NOVEMBER.

Building Construction for Month of November Shows Healthy Figures Although They Fall Below Totals of Last Year.

Building activities throughout the City and County for the month of November shows a total of \$988,587 invested in building construction. Of this amount \$17,500 was for public buildings.

According to the report of the Building Department of the Board of Public Works there was a total of 498 permits issued which makes the total \$988,587.

The report of the Building Department does not include work carried on by the State or Government nor work undertaken by the Municipality, except in the construction of buildings.

A complete and segregated report of the Building Department of the Board of Works is as follows:

Class	No. of	Amount
Class "A"	1	\$100,000
Class "B"	1	1,500
Class "C"	51	327,110
Frames	136	139,746
Alterations	318	103,291
Public Buildings	1	17,500
Total	498	\$988,587

## OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—5 story, 2000 base, class C construction, 8 x 100, Oakland, Cal. Architect, Clay N. Reed, Albany Block, Oakland. Owners, United Home Builders. The building will be erected on the west line of Oak street north of 11th, having a frontage of 60 feet and a depth of 130 feet. There will be a total of 150 rooms, arranged in suites of from one to four rooms. All apartments will have wide beds and private bath rooms. Besides the usual office, lobby and service rooms, the building will have a large roof garden and art studio. Interior will be finished in pine and hardwood with some ornamental plaster. The rooms will have tile floors and wainscot. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. The entrance will be finished in marble. The exterior of the building will be lined with pressed brick. The building is being completed and is now being taken about January 1, 1915.

STORE ADDITION AND ALTERATION—4 story, 100 x 100, Oakland, Cal. Architect, Clay N. Reed, Albany Block, Oakland. Owners, United Home Builders. The building will be erected on the west line of Oak street north of 11th, having a frontage of 60 feet and a depth of 130 feet. There will be a total of 150 rooms, arranged in suites of from one to four rooms. All apartments will have wide beds and private bath rooms. Besides the usual office, lobby and service rooms, the building will have a large roof garden and art studio. Interior will be finished in pine and hardwood with some ornamental plaster. The rooms will have tile floors and wainscot. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. The entrance will be finished in marble. The exterior of the building will be lined with pressed brick. The building is being completed and is now being taken about January 1, 1915.

NEW STORE—2 story, 100 x 100, Oakland, Cal. Architect, Clay N. Reed, Albany Block, Oakland. Owners, United Home Builders. The building will be erected on the west line of Oak street north of 11th, having a frontage of 60 feet and a depth of 130 feet. There will be a total of 150 rooms, arranged in suites of from one to four rooms. All apartments will have wide beds and private bath rooms. Besides the usual office, lobby and service rooms, the building will have a large roof garden and art studio. Interior will be finished in pine and hardwood with some ornamental plaster. The rooms will have tile floors and wainscot. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. The entrance will be finished in marble. The exterior of the building will be lined with pressed brick. The building is being completed and is now being taken about January 1, 1915.

Town of Livermore. The Clerk of the Town Trustees has been directed to advertise for bids for the construction of a fire alarm system at Livermore. The system will consist of 14 boxes. Bids on the work will be opened on December 14th at 3 p. m. Further information may be had from the Clerk of the Town Trustees.

WAREHOUSE—2 story and base, brick and steel. Cost not stated, Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner's name withheld. The building will be erected at the corner of 19th and Harrison streets and will cover a considerable ground area. Interior will not be finished. Construction will be of the extra heavy warehouse type. Metal window sash and frames will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

HOTEL—6 story and base. Class C construction, \$100,000, Oakland, Cal. Architect's name not given. Owners' names withheld. Contractor Edward Sommerstrom, 212 East 12th street, Oakland, has secured a contract on the percentage basis for a six-story and basement brick and steel hotel to be erected in the Lakeside District. The building will cost about \$100,000. Details will be given out in about a week.

HOTEL AND STORES—7 story and base. Class C construction, \$104,000, Oakland, Cal. Architect, William Wilde, 1725 Broadway, Oakland. Owner, O. T. Mead. The building will be erected at the southeast corner of Tenth and Clay streets and will cover a large ground area. There will be several stores besides the hotel lobby on the first floor. Upper floors will contain a total of 108 guest rooms, nearly all of which will have private baths. Plans provide for steam heat, elevator service, a hot water system, vacuum cleaning and patent store fronts. Interior will be finished in pine and redwood with some ornamental plaster. Marble and tile wainscot will be used. Bath rooms will be finished in tile and have composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

APARTMENT HOUSE ADDITION—Frame construction. Cost not stated, Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Amalia Tisch. This work will consist of adding a number of two and three room suites to the present building, and will include the customary branches of the work. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated, Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, W. H. Sellander. The dwelling will be erected in the Clarendon Tract and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine, redwood and hardwood veneer. Some white enamel will be used in the bath rooms. Hardwood doors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and a hot water system. Mantels will be of oak. Bath room will have a w.c. and tub. An automatic water heater will be installed. Exterior of the house

will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA.

**INTERURBAN ELECTRIC LINE** — Cost not stated. Fresno, Fresno Co., Cal. Engineer's name not given. Owners, Fresno Interurban Railroad Co., Fresno. Application of the Fresno Interurban Railroad Company for a franchise to operate in the City of Fresno has been filed with the City Clerk. J. B. Rogers is president of the company. It will be necessary for the Interurban Company to build twenty-six blocks of track in Fresno should the application be granted.

**STORES**—1 story and base. Class C construction. Cost not stated. Modesto, Stanislaus Co., Cal. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner represented by G. H. Umben Co., S. F. The building will be erected at the corner of 10th and J streets and will cover an area of 110 by 101 feet. There will be a number of stores finished in pine and hardwood. Cement floor will be used. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared with walls and foundations of sufficient strength to carry additional stories.

**RESIDENCES**—4, 2 story and base, frame. Cost not stated. Fresno, Fresno Co., Cal. Architects, Glass & Butner, Fresno. Owners, Alfred Eavesman, Herbert Levy, William Glass and Charles Doyle. These homes will be erected on adjoining property and will contain from six to eight rooms. Interiors will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**BRIDGES** — 2. Wood construction. Cost not stated. Visalia, Tulare Co., Cal. Engineer, County Surveyor Lovehace, Visalia. Owners, Tulare County, County Surveyor Byron Lovehace has completed plans and specifications for

two wooden bridges to be erected over the Kaweah River by Tulare County. Both bridges will be over 600 feet in length. Bids will be advertised for shortly by the Board of Supervisors.

**HOTEL AND STORE**—2 story and base, brick and steel, \$30,000. Architect, J. Carl Thayer, Fresno. Owner, E. A. Cleveland, Corcoran. The building will be erected at the corner of E and Kern streets, covering an area of 80 by 100 feet. There will be four stores on the first floor and a number of hotel rooms on the upper floor. Interior will be finished in pine and redwood. Tile floor will be used in the lobby and store entrances. Plans provide for a hot water system. Bath rooms will be finished in tile and will have composition floors. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**SCHOOL**—2 story, brick and concrete. Cost not stated. Fresno, Fresno Co., Cal. Architect, J. Carl Thayer, Fresno. Owners, City of Fresno. The building has been designed for an eight-room building with provision for additions. Floors and stairways will be of reinforced concrete. Interior will be finished in pine with some maple floors. There will be steam heat, oil burning equipment and program clocks. Modern school plumbing will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and bonds have been sold. Bids will be advertised for at once.

**SCHOOL**—2 story and base, brick and concrete, \$90,000. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owners, City of Fresno. The building, the largest of the seven new schools, will contain thirteen class rooms, auditorium, offices and assembly hall. Floors and stairways will be of concrete. Interior will be finished in pine with some maple floors. Plans provide for steam heat, oil burning system, vacuum cleaning, modern school plumbing and program clocks. Exterior will be faced with pressed brick. Plans are complete and figures will be called for shortly. Further mention will be made of the work.

**SCHOOL**—Frame and plaster. Cost not stated. Fresno, Fresno Co., Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, City of Fresno. The building will be known as the Kirk School. There will be eight class rooms and an assembly hall. Interior finish will be of pine with maple floors in the class rooms. There will be steam heat, oil burning system and modern school plumbing. Exterior will be covered with cement plaster on metal lath. Plans are complete and ready for figures. Bids will be advertised for at once.

**SCHOOL**—2 story and base, brick and concrete, \$82,250. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, City of Fresno. Contractors, Evans Contracting Co., Fresno, general construction. Contract price, \$82,250. Bids for the heating and ventilating will be readvertised for at once. The building will be known as the Longfellow School.

#### Contracts Awarded.

**SCHOOL**—2 story and base, brick and concrete, \$52,760. Fresno, Fresno Co., Cal. Architects, Cones & Traver, Addison-Bled Bldg., S. F. Owners,

Wednesday, Dec. 9, 1914.

City of Fresno, Contractor, James L. Daly, Fresno, general construction. Contract price, \$52,700. Bids will be called for at once for the program clock system. The building will be known as the Webster School.

#### FRESNO BUILDING TOTALS.

FRESNO, Fresno Co., Cal.—Building permits issued in this city for the month of November by Chance H. Scott, City Building Inspector, show a total of \$10,507. Permits issued for new buildings amounted to \$12,135. For the year 1914 to November 30 there has been \$1,102,147 spent in building construction in this city.

#### MODESTO BUILDING TOTALS.

MODESTO, Stanislaus Co., Cal.—Building permits issued by City Clerk W. O. Thompson for the month of November amounted to \$23,500. The largest permit issued was for a two story store and office building for J. M. Moyle at \$20,000.

#### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

BRIDGES—3 steel and concrete. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor William F. Lunning, Red Bluff. Owners, Tehama County. The Surveyor has prepared plans and specifications for the construction of three bridges of concrete construction, to be constructed along the route of the State Highway from Red Bluff to the Shasta County line. The plans will be submitted to the Supervisors on December 8th, when bids will be called for. The bridges aggregate 495 linear feet and are as follows: Bridge over Dibbl Creek 355 feet long, bridge over South Fork of Blue Tent Creek 100 feet long and a bridge two miles south of the Four Mile House 40 feet long.

IRRIGATION PLANT—Cost not stated. Chico, Butte Co., Cal. Engineer's name not given. Owner, Senator James D. Phelan. One of the largest irrigation projects for the culture of rice in this state is being proposed by James D. Phelan, who owns a large tract of land a few miles south of Chico. The entire project when put through will be located in Butte County. Phelan's plan is to place 15,000 acres under irrigation by water pumped from the Sacramento River which outskirts the Phelan ranch and other adjoining holdings. Should this be carried out an immense pumping plant will be installed. B. J. Murphy is the Superintendent of the Phelan ranch.

frame, \$2,700 and \$2,000. Sacramento, Cal. Architect, none. Owners, O. I. Moore, 2903 35th street, and W. D. McKay. These two houses will contain five and six rooms respectively. Interiors will be finished in pine and redwood with some hardwood floors. Open fire places will be used in the living rooms. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms. Exteriors will be covered with rustic and cement plaster and metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

o 6 tons per square foot for clay i  
ck beds, always dry; on clay, mod  
tely dry, 2 to 4 tons; on gravel an  
rse sand, well cemented, 8 to 1  
s; on compact, well-cemented sand  
o 6 tons; on clean dry sand, 2 to  
ns. Average pile loads of from 1  
to 20 tons each are permitted. Pile  
are driven to an average penetration o  
1 inch in the last few blows of  
2,000-pound hammer falling 25 fee  
This gives a calculated safe bearin  
load of 25 tons.

# **TOTAL COST OF A ROAD KEPT GOOD UNTIL THE BONDS ARE PAID OFF.**

WASHINGTON, D. C., Dec. 1, 1914.—  
While it is frequently easy for  
nty to issue bonds and borrow  
ney for improving the local high  
s, the raising of the money to re  
those bonds at maturity is ofte  
so simple. Many counties, in bor  
ing money for bonds, figure tha  
amount of money raised represent  
total cost of the road, forgetting  
t the road must be maintained an  
ired if, at the end of the term o  
bonds, the county is to have any  
ig to show for its investment.  
he question of financing country  
d building is discussed fully in De  
tment of Agriculture Bulletin No.  
entitled "Highway Bonds," which  
ritten by the Office of Public Road  
Collaboration with James W  
ver, Professor of Mathematics and  
rance, University of Michigan. In  
bulletin the authors discuss fully  
various methods of financing road  
ding and retiring debts for road  
struction, and also deal frankly  
the actual total cost of a road  
ng the life of the bonds. On the  
l cost of a road, the authors cite  
following two examples as afford  
at least a basis for estimating the  
d minimum cost of a mile of road:

## **Cost of a Mile of Road Built With 20-Year Bonds.**

ituminous-macadam:  
of construction (\$10,500)  
der 5 per cent serial bond  
th interest for 20 years..\$16,012.50  
of annual repair and  
aintenance (\$600) for 20  
ars ..... 12,000.00

Total cost for 20 years...\$28,012.50

ick:  
of construction (\$18,500)  
der 5 per cent serial bond  
th interest for 20 years..\$26,426.73  
of annual repair and  
aintenance (\$300) for 20  
ars ..... 6,000.00

Total cost for 20 years..\$32,426.73  
e authors point out that the actual  
of building and maintaining a  
ific highway can be determined  
after the character and volume  
affic and actual wear and tear have  
studied for a series of years. The  
es quoted above, of course, will  
apply to ordinary macadam, gravel  
ay roads, but in all these cases the  
est on the bonds must be met, and  
e must be expenditures to main-  
them in condition. The poorer the  
nage and the less permanent the  
acter of the road foundation, the  
ter must be the percentage that re-  
costs will bear to the first cost.  
larly, the question of whether the  
al surfacing is designed to with-

Passing in order to dispense with the bridges which now operate as impediments to traffic of larger vessels on the river.

#### Proposed Insane Asylum.

The secretary of the interior through the bureau of health will ask the legislature for \$50,000 to build an insane asylum at Alabang, the former site of a stock farm of the bureau of agriculture, a few miles out of Manila. At present, the insane, such as are cared for at all by the government, are housed at San Lazaro Hospital for infectious diseases, with poorly equipped quarters. The plan contemplates the destruction of the present inadequate buildings at San Lazaro and the construction of two modern concrete buildings there for the nucleus of an institution for the treatment of infectious and contagious diseases. This to be done in the immediate future, if the legislature will consent. Another part of the plan is an institution for the care of the helpless, both aged and infants, who while not suffering from any malady are yet unable to provide for their own support. This would partake of the nature of an insular "poorhouse." The plans for this institution are not formulated. Such cases at present provided for by a rather precarious system of private charities and police aid.

It is proposed to provide, at Alabang, a sanatorium costing \$100,000 to \$500,000 to accommodate about 300 patients. Further appropriations are to be made annually as the needs of the institution increases and government funds become available.

#### MODERN OFFICE EQUIPMENT FOR HONGKONG.

[Vice Consul General A. E. Carleton, September 21.]

The saving of time is not deemed of the greatest importance in the Orient, and for that reason modern time-saving appliances are not usually to be found in the large houses and banks of this colony. Conservatism and the "old order of things" have been too strong to admit of a general introduction of the scores of machines that in the United States tend to greater accuracy and dispatch, lessen drudgery, and add materially to the business possibilities of an office. The field in Hongkong is, however, worthy of cultivation, and cheap labor seems to be the only hindrance to the sale of American modern office equipment. Banks and commission houses, having branches in all parts of the Far East, are not entirely lacking in modern appliances, and many of these would become purchases if proper effort were made.

Many of the machines well known in the United States are unheard of in the Far East, therefore, local demonstration is essential. The Chinese do not understand catalogues, and as a rule will not buy from them. In every case they must be shown the practicality and efficiency of the "machine with brains."

The question of office furniture, steel cabinets in particular, is discussed in the Daily Consular and Trade Reports of March 15, 1913, and a limited amount of trade has developed therefrom. Excellent results have also been secured from the exhibition of steel cabinets now on display in this com-

plete general. [A list of these goods, which would probably be interested in machines and steel furniture for office use may be had upon application to the Bureau of Foreign and Domestic Commerce or its branches.]

#### HIGHWAY OF THE STATE OF WASHINGTON.

[Consul General R. E. Mansfield, Vancouver, British Columbia, Nov. 2.]

The recent completion of construction work on the Snoqualmie Pass section of the Sunset Highway in the State of Washington is of special interest to British Columbia motorists. Heretofore it has been necessary for the Vancouver motorists either to ship direct to the Kootenays or the Okanogan, or tour by way of Seattle, Portland, The Dalles, Walla Walla, and Spokane.

Wonderful changes have been wrought in the transmountain thoroughfare in the State of Washington. In seven months the tortuous, narrow path across the Cascades has been transformed into a splendid 16-foot highway with a maximum grade of 5 per cent. The State of Washington has spent approximately \$335,000 on the 28 miles from North Bend to Lake Keechelus.

The Sunset Highway, so designated by the legislature, begins at Seattle and passes through Renton and North Bend. The State road now begins a few miles east of North Bend, and starts a gradual ascent up Grouse Ridge. In order to reach the summit on a 5 per cent grade, it was necessary to build a big loop in the road, but it has served to beautify the route, offering rare views of towering peaks. The pass is wide at the summit, the greatest elevation being 5,600 feet. From the summit the road travels down the east slope of the Cascades, following the canyon, crossing Gold Creek, and thence to Lake Keechelus, and from there follows the northeast side of the lake and down the fertile Yakima Valley past Lake Kachess through the towns of Easton, Cle Elum, and Ellensburg. From Ellensburg the route runs in a southeasterly direction to Wenatchee, Waterville, Coulee City, Wilbur, Davenport, and Reardon, into Spokane.

From Spokane the motorist can travel north to Nelson, British Columbia, and the Kootenays, and from Wenatchee the British Columbia-Okanogan country is accessible. Around the Okanogan lake there are a number of good roads with exceptional scenic beauties and attractions for the motorist. The district boasts of a large number of motors for a rural country, the town of Vernon alone having 400 cars.

#### New Roads Encourage International Intercourse.

The growing interest in motoring and the rapidly increasing number of cars are encouraging the construction of many new roads and the improvement of those already built in this Province. The interest in and the progress of motor-road construction in the Pacific Coast States is also encouraging similar activities in British Columbia, and the linking of the various highways north and south of the international boundary assists the "entente cordiale" between this Province and the States immediately south. There is a fraternal feeling between motorists, no matter what the nation.

ality, and especially is this true of American and Canadian motorists, they drive the same kind of cars, language and customs and conditions are the same, even to the rules of road, money standards, etc., and Canadian motorists in the United States, or vice versa, find a welcome under conditions that make him feel at home.

The Sunset Highway is one of many links in the international chain of roads creating closer relations and encouraging international travel, which will result in the extension of trade between the two countries.

#### SOUTHERN PACIFIC WILL PURCHASE EQUIPMENT.

New equipment costing \$1,426,000, consisting of 30 locomotives, 30 passenger cars and 20 steel electric motor cars for suburban traffic will be ordered shortly by the Southern Pacific Company.

#### WAR AFFECTS Ceylon's COMMERCE.

[Consul Charles K. Moser, Colombo, September 20.]

At present no drafts for dollars are being negotiated through local banks, during the unsettled conditions that have not been given a reasonable rate of exchange from London on which work. The banks have declined to quote rates on dollars and all credit must be opened on first-class London banks. No moratorium has been declared in this colony.

Freight rates are generally 33 1/2 per cent surcharge, though on September 17 surcharge to London was reduced from 25 per cent to 20 per cent and seems probable that the rates to New York have also been reduced. The war risk insurance rates quoted on the 17 were: To Australia, 1 1/2 per cent; to the United Kingdom, 2 per cent; to the United States, westward 2 per cent eastward 3 per cent. Other than high war-risk freight and insurance rates, the possible lack of shipping space, and the difficulty of drawing dollars against shipments to the United States, there are no unusual impediments in the way of American export and import trade.

#### Stock on Hand.

In Ceylon there is a shortage of many articles that the United States could easily supply. One of the principal importing firms has furnished the following information as to stocks on hand of the following articles:

Barbed wire—Stocks sufficient to last 1 to 6 months.

Cement—Small stocks on hand.

Corrugated iron sheets—small stocks.

Hoop iron—Small stocks, especially for making tea chests, size 1 1/2 inches.

Iron bars—Stocks on hand to last to 10 months.

Nails—Small stocks, especially Nos. 13 and 14 A for tea chests.

Sheet iron—small stocks.

Tools—Small stocks but demand not great.

Window glass—Supply nearly exhausted.

### A REMARKABLE STREAM.

**Deschutes River, Oregon, Will Irrigate Several Hundred Thousand Acres and Also Furnish Over Half a Million Horsepower.**

Deschutes River, Oregon, a tributary of the Columbia, is one of the unique streams of the United States. Its natural flow is remarkably constant, rising in times of so-called floods only a few inches, owing to the fact that the river flows for a considerable portion of its course through a region of lava and loose volcanic material which act as a huge sponge. The headwaters of the river afford reservoir sites so large and so well distributed that the total flow of the river may be utilized both for irrigation and for power. The irrigable lands in the valley, aggregating 300,000 to 500,000 acres, are so situated on a plateau in the upper part of the basin that the total flow of the upper river and its principal tributaries may be utilized for irrigation. Below the irrigable area the river flows in a deep canyon having a fair slope and affording excellent opportunities for power development. A reliable water supply is assured by the return waters from the irrigated areas above, a large proportion of the water seeping back into the channel, and by the lower tributaries of the river. The future use of this exceptional combination of abundant water supply, large area of irrigable land, and great water powers will transform the Deschutes Valley into a region whose agricultural importance will be enhanced by the many hydro-electric plants that will furnish power for local use or for transmission to distant power markets.

Deschutes River and its tributaries have been under investigation for several years by the engineers of the United States Geological Survey in cooperation with the State engineer of Oregon, and the Federal Survey has just issued a comprehensive report discussing the irrigation and power possibilities of its drainage basin. The investigations of power resources indicate that after allowance is made for requirements of irrigation, a total of 600,000 horsepower may be developed. The report discusses these resources in considerable detail, the discussion being based largely on records of stream measurements made from 1905 to 1912. To obtain these data gaging stations have been maintained in the Deschutes River basin by the United States Geological Survey and co-operating parties at 25 points on the river itself and its various tributaries, canals, etc. A copy of the report, which is published at Water-Supply Paper 344, may be obtained free of charge on application to the Director, United States Geological Survey, Washington, D. C.

### COMPENSATION FOR ACCIDENTS.

The law of the United States allows compensation only for accidents sustained in the course of employment without negligence or misconduct, causing disability exceeding fifteen days or resulting in death. Compensation is on the basis of full wages, but payment is limited to one year, even in cases of death and total permanent disability.

The total number of claims filed during the first five years of the law was 14,963, of which 14,916 were allowed, 911 disallowed and six were still under consideration at the end of that period. Of the cases allowed, 137 were for fatal accidents. The total compensation paid for all accidents during the five years amounted to over \$1,800,000, of this more than \$732,000 was paid to 6315 employees of the Isthmian Canal Commission.

In the fiscal year 1912-13 the average compensation reported for 3220 non-fatal and fifty-six fatal cases was \$106.36 and 661.12, respectively. Of the non-fatal cases, 996 were Isthmian Canal Commission employees, who are largely unskilled and are exposed to great hazard, and 2324 were employees of other departments, the two groups receiving an average of \$93.64 and 112.66 respectively. Of the fatal cases, eleven were Isthmian Canal and forty-five other employees, the compensation averaging \$410.77 and \$72.31, respectively. The failure to recognize permanent partial disability on a different basis from disability from which there is complete recovery results in very inadequate compensation in many cases. Thus, fractures of an arm or leg led to compensation payments of less than \$25, the loss of a eye between \$25 and \$50, and in a case of the loss of a right arm the injured workman received less than \$50, while in three cases of the loss of both legs, occurring during the third year, the average compensation was \$57.40.

The small amounts of compensation under this act, when compared with compensation under the various state workmen's compensation laws, are due to the fact that under the Federal law compensation payments limited to usual wages must cease when the injured employee is able to resume work and in any case cannot continue beyond twelve months. Under the more recently enacted state laws compensation, usually on the basis of one-half or two-thirds the average wages, is paid in case of temporary disability during disability, or in case of death or permanent disability for a period extending to six years, and in several states to eight years.—Bulletin U. S. Department of Labor.

### BRICKMAKING IN IRELAND.

The brickmaking industry in the north of Ireland has, for the past three years, been in a very stagnant condition, chiefly owing to the political situation in Ulster, says the Buffalo, N. Y. "Courier." There is a big demand for small houses in Belfast, but the fear that the new Irish parliament may tax property has prevented and is preventing the builders from erecting these unless they are sure of an immediate sale of the property.

Plans have been passed for a fair proportion of large contracts such as building warehouses and additions thereto, and when times are normal these will be proceeded with at once. The Belfast city council are building two hundred and fifty workmen's houses, this being the only big contract in the city at the present time, while in the immediate vicinity of Belfast some three hundred laborers' cot-

tages are being erected by the government.

Had Irish political affairs been amicably settled, the building trade would have received a great impetus, but the declaration of war made satisfactory conditions appear still further away. The trade is practically a local one and depends entirely on those who build property as an investment; therefore, until such time as peace is declared, the brick manufacturers in the north of Ireland must rest content with a comparatively slack period and prepare for the rush of business which will come although circumstances may somewhat delay it.—Brick and Clay Record.

### SECONDARY METALS.

The value of the "secondary metals," exclusive of gold, silver, platinum, and iron, recovered in the United States in 1913, was \$72,845,000 according to J. P. Dunlop, of the United States Geological Survey. Even this large figure is a decrease compared with 1912, when the value was \$77,396,000. "Secondary metals" are those recovered from scrap metal, sweepings, skimmings, drosses, etc., and are so called to distinguish them from the metals derived from ore, which are termed "primary metals." The distinction does not imply that secondary metals are of inferior quality.

The Sihlwald, or city forest of Zurich, Switzerland, adds to the town's revenues \$7.20 per acre a year, reducing the amount needed to be raised through taxation by more than \$32,000.

In northern Idaho and Montana, which had many fires during the past summer, 35 per cent of the fires on national forests were caused by railroads, 24 per cent by lightning, and 10 per cent by campers. The remainder were due to brush burning and other miscellaneous or unknown causes.

To guard against tree repair fakers, a quack tree surgeons, the Massachusetts forestry association will inspect the shade trees belonging to its members, free of charge.

## THE BUILDING OUTLOOK.

THE American Contractors' Business  
as Seen by Architects in All  
Parts of the Country.

Rarely, if ever, has there been a time when the future in the building industry has been so difficult to scan, as during the recent weeks and months. Rarely, if ever, have the prospects been so tantalizing, now shadowed by the darkest clouds of incredulity. Rarely, if ever, has the interest in this question been so keen among architects, engineers, contractors and builders.

If architects and contractors are the more directly interested a vastly larger class of the American people are vitally concerned. For there is in the country no industry, save agriculture in its entirety, that equals in importance that of construction work. Building permits issued in New York city this year will be about \$150,000,000. At the same average throughout the country the total building of the country would amount to about \$3,000,000,000. The building permits for Chicago for the year will reach about \$90,000,000. On that basis the total for the country would be \$4,500,000,000. The active work in Philadelphia in 1914 will total somewhere near \$40,000,000. At a corresponding rate the building for the entire country would reach close to \$3,000,000,000. The per capita construction work in the rural districts is doubtless less than in the towns and cities, but the majority of the American people now live in towns and cities and the growth of the smaller municipalities in the great majority of instances equals or exceeds that of the larger cities. It would perhaps be extremely conservative to estimate the total building of the Country in excess of \$2,000,000,000 annually or approximately \$100 for each family. In its final analysis most of the building cost consists of labor. And remembering that the average family income throughout the country is scarcely \$500, the building industry looms up as of commanding importance, a degree of importance not generally appreciated. It represents about 20 per cent of the total expenditures of the people.

Like all other branches of human effort, it is involved more or less at present in the general business perplexity. Yet it is at least semi-independent, and does not ebb and flow in exact rhythm with general conditions. It possesses to a considerable degree an initiative of its own, but only so far as it is free from financial dependence. The one great cloud that has hovered over the American nation during the past several months has been financial in its character. There have been other contributing elements to the slowing down of business, and some of them no doubt important, but in recent years large American borrowers had availed themselves more and more of the phreatic European money bags, borrowing there in huge and ever increasing amounts, year after year. When the chill of war went through the financial world the European purse strings tightened and those large American borrowers who

crossed the seas for their requirements, were "up against it."

Another even more serious consideration was the large holdings of American securities abroad in consequence of the borrowing. To prevent the dumping of these securities on this side, and the consequent draining of our gold, the stock exchanges had to close. Additional unsettlement came pending the inauguration of the new banking system. It is little wonder that the bankers "sat tight" and waited. But those plunges have been taken and are now things of the past. It is of the future that the building interests are now the more vitally concerned. What of the future?

The American Contractor has taken especial pains during the past few days to sound the temper of the building trade, in all parts of the country. A large number of architects, contractors, builders, bankers and others have been interviewed and their best judgment as to the outlook has been obtained. These judgments may be summarized as most cheering. The spirit of optimism is reasserting itself in all parts of the country and the way seems to be paved for greater activity.

Looking to general conditions, the returning financial confidence is no doubt of prime importance. The stock exchanges are gradually resuming their normal activities. The fear of the foreign dumping of American securities is in part dispelled. And well it may be. The new banking system insures an adequate supply of currency for domestic needs, elastic enough to suit all conditions of trade. And should the sale of foreign-held securities again increase sufficiently to endanger the gold reserves, it would be as simple a matter as before to again close the stock exchanges. There would be in that measure no reflection upon the domestic financial situation. It would be merely a precaution to retain our gold. Considerable timidity continues in banking circles, induced in large measure by the European war and the fear of a possible American involvement of some sort, but confidence is rapidly growing that the United States can make herself independent financially as well as politically, and as that idea strengthens the skies will brighten to gorgeous hues. The country may not yet be approaching a boom period but the allaying of financial fear, that has recently occurred is an asset of almost incalculable value. A condition that deserves special emphasis is that architects almost everywhere are optimistic in the expression of their views, and the reasonable interpretation of this is that a large amount of work is being planned. It will no doubt be interesting to present here the local conditions existing in various parts of the country and accordingly extracts from the letters of some of our correspondents are reproduced.

### As Viewed in New York City.

"The business outlook from the standpoint of engineers and architects

of the more prominent class, is far better than it has been for years. Some have large plants on hand which the European war has temporarily held up, but will go ahead it is claimed after January 1st irrespective of European conditions which are mostly to blame for the tie up of the money markets, although in some places the loan rates are better than before the war and has kept a certain class of speculative work in motion.

"Among the Sanitary Engineers while the war has not noticeably affected them, they plan for great things during the next few years and are at the present time holding several professional exhibitions and conferences which is deemed necessary from the optimistic outlook. Some trouble is experienced by municipalities in floating bonds to cover the construction of water works and other municipal necessities, and in many cases they are asking contractors to accept the bonds in part payment. The general outlook is very optimistic, which optimism is helped considerably by the stand of the government officials and the opening of the Federal Reserve Banks."

Another New York authority writes: "The majority of architects of my acquaintance have as many prospects for next year as they had this time last year. There is a great falling off in building operations. Money for new schools is almost impossible to get. Money can be obtained for speculative work, business buildings or private dwellings where there is an equity of 50 per cent."

This view reflects a less uniform condition: "Some architects have made plans, taken bids and then submitted the figures to the owner, and they have been good bids too, only to have the owner hesitate and finally decide to lay the project over until next spring. This has happened very frequently, and in most cases the client has been so financially situated as to be free and independent of all loan companies. Some few architects are receiving more inquiries now than before, and a great many are entering into competitions now of all kinds that heretofore only did this, occasionally. The general opinion however is, that things will begin to pick up after the new year."

Another correspondent writes: "A spirit of optimism prevails among the majority of contractors, but the general impression prevails that the spring will see a decided improvement. Only today I had one man tell me that he was 'living in hope.' Most builders are doing something even if only enough to talk about. Several have stated that the opening of the Federal Reserve Banks will in all probability loosen up the money market. The falling off seems to have hit the speculative line hardest of all, as there are numerous dwellings and residences which are going right ahead. Factory additions are coming into prominence also."

ing the past two years, has reached a point where many additions are needed to the state institutions. Indications are that plans involving the expenditure of four millions of dollars or even more will be presented to the legislature. Under the new law in Ohio, all of the eighteen state institutions are under the control of the board of administration and that board has outlined a comprehensive plan for the erection of a score or more of necessary buildings in 1915.

Concerning Cincinnati, this statement from Myers V. Cooper, one of the largest operators in that city's real estate and a prominent builder of homes, is appropriate: "It is now comparatively easy to finance the home buyer. Building associations are again making loans and much private money has come into the market for the same purpose during the past month, the entire situation reflecting the general ease-up in conditions."

Our Cleveland correspondent says: "The majority of architects and engineers in northern Ohio including Cleveland, are busy on preliminary plans for work that will be started early in spring; a large number say that judging from present indications the coming summer will be the most prosperous in the building trades in the history of the country. There has been no appreciable falling off in any line of the building business, and if there has been any it has been in the private residence work. Most of the people engaged in building believe that the opening of the new Federal Banks will tend to loosen up money and enable the banks to make more loans. The general opinion is that if there was less war talk and more business talk, business would continue to improve."

Concerning conditions throughout northern Ohio and Indiana our correspondent writes: "The general conditions as they look to architects now, for building in the spring of 1916, are that they will even surpass the building operations of 1914. The prospective work for spring has or is beginning to show results and is looked upon very favorably by the architects and builders in such cities as Toledo, Lima, Sandusky and in fact throughout the whole northern part of Ohio. The northern part of Indiana is just as favorable for future building, as in the cities of Ft. Wayne, South Bend, La Porte, Elkhart, Warsaw and others. The new Federal banking system has met with approval and most architects and contractors believe it will be a great help to general business and also to their own. It is now easier to obtain loans from the banks throughout northern Indiana and Ohio, and the rate of interest has dropped down to normal on loans throughout this territory."

Our Detroit correspondent writes: "The building line is very quiet, but a decided chance is looked for in the near future. The architects have plenty of work on prospective buildings and all agree that the first of the year will bring out new work. At the present time the people cannot make loans on the banks, which is the only thing that is holding back the work. Money is expected to loosen up any day and the architects are making daily trips to the banks in an endeavor to obtain loans. Some of the architects have work that will not mature until spring, but the bids will be taken and

the contracts let so as to have everything in preparation for early spring building. Building in the smaller towns has quieted down and the architects are looking for early orders for drawings to be put out for bids early in spring."

#### Indiana Architectural Field.

This review of the Indiana architectural field comes from our Indianapolis correspondent:

"On the surface architectural activities are quiet, but there is a strong undercurrent that tends to busy and active operation in the spring. The consensus of opinion among the architects is that the new work will begin to make itself felt shortly after the first of the year. Fall work in Indiana this year was behind the usual volume of business, in fact, some of the architects who have been practicing for years said this was the quietest season they had ever experienced. However, the architects took the dullness gracefully; they attributed it to the general unsettled conditions that affected all lines of business and considering the stagnation that enveloped mercantile, financial and real estate circles locally, the showing in the building field was not so bad after all.

"Many large and small projects all over Indiana are held in abeyance, there being hardly an architect but has a hibernating project awaiting the coming of spring. The inability to negotiate loans with which to pursue building operations was the prime factor in this general postponement, yet there were quite a few projects held over as it was late and there was a fear that the weather would break badly.

"Financial matters seem to be assuming a more liberal basis and money for 'sound business' will be more available directly. Such a condition will add a new impetus to the building field. While the Federal Reserve Act is expected to greatly stimulate business, still the prediction is made that those who are looking for cheap money are going to be disappointed. There is and will continue to be a big demand for money and the interest rates will be kept up, but this feature is not expected to greatly retard legitimate and necessary building.

"Architects generally are optimistic, they are doing considerable sketching and though one can never tell the outcome of this early work, there seems to be a firm tone back of the new prospects. At this time there are on the boards in Indiana some large projects — schools, banks, municipal buildings, fraternal organization buildings and private undertakings — on which plans are already under way. Many of these will appear for bids early in January or February and will make a good wedge for the opening up of the spring building campaign. There are many good live propositions still in the embryo state that are bound to materialize before the summer rolls around. Taken all in all, the outlook in Indiana is not a gloomy one by any means."

#### Outlook for Milwaukee.

"Conditions and outlook in building construction for Milwaukee are thus reviewed by our correspondent in that city:

"There has been an unusually large amount of speculative building going on here in the past four or five years.

This work suddenly slumped, probably on account of the increase in interest rates; others attribute it to over supply in this class of work. Money 'scare' naturally affects a small investor first and the demand for buildings in this class dropped at once.

"The future conditions look bright. The rate of interest on loans has gone down from 5½, 6 and even 6½ and per cent to 5 per cent, which is a normal rate, and where good security is offered there is not much trouble getting a loan. Inquiries and requests for loans are as numerous at this time as they were last year, if not more according to the architects. They seem to feel that the new Federal Banks will help to keep the money market open, and are looking forward to a prosperous spring season. They expect quite a boom in new fact buildings and improvements to present plants. At the present time tentative plans have been drawn for several large buildings. These buildings will be started right after the first of the year. The small investor also seems to be taking a brighter view of things and there will in all probability be a usual demand for residences and duplex flats.

"Taking it all in all conditions seem to be slowly going back to normal. It may be a matter of several months before this desired condition is reached but from what I have heard and have been told, the greater majority think that they have at present no cause for worry about the future."

In Minneapolis the interest rate on loans after war was declared went as high as 8 per cent and probably higher, but it has since steadily creased until now it is practically normal, the rate now being 5½ per cent to 6 per cent on residence work and about 5 per cent on larger buildings. The falling off of business is confined to any certain classes of buildings, but affects the general building business. Requests for plans for new buildings to be erected in 1915 are very good, in fact fully as good a year ago at this time. Some architects report prospects even brighter than a year ago. All indications point to a very good year in this territory.

#### Conditions in St. Louis.

In St. Louis our correspondent emphasizes on "Safety First" as a guiding policy. He says: "Conditions have not changed materially in the last four months, and at the present time the outlook for the future does not appear very rosy. From inquiry we come to the conclusion that our bankers adhere to St. Louis' late axiom, 'Safety First.' It is not that St. Louis is not doing any business. In most of our industrial and mercantile lines we are practically doing the same volume as last year. Some firms even claim an increase over the year 1913. But as to the building conditions we must hark back to our late 'Safety First.' The spirit is here to but our bankers will not take a chance. We have another axiom, 'don't take a chance as the odds are all against you.' It is not that the opportunities are lacking, as opportunity is continually knocking, and in fact bringing her knuckles trying to make some of our leading citizens wake up, there are thousands of sketches prepared for buildings of all descriptions and a great many more that plans a

# ADVANCE NEWS

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, story and base, frame, \$15,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Girard Investment Co. The building will be erected on the north side of California street west of Leavenworth, covering an area of 25 by 70 feet, and has been designed to contain a total of six suites besides a private garage. Suites will consist of two and three rooms. All apartments will have wall beds and private baths. Interior finish will be of pine, redwood and elm. Some hardwood floors will be used. Plans provide for steam heat, automatic elevator and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work is now being done by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$12,000. Architects, Koenig & Christiansen, 750 Parnassus avenue, S. F. Owner, O. Petersen. The building will be erected on the north side of Judah street east of Eighth avenue and will cover a ground area of 27 by 66½ feet. There will be six suites of two, three and four rooms. All apartments will have private baths and wall beds. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living rooms and halls. There will be steam heat and a hot water system. Bath rooms will be finished in tile and composition. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architects.

**SAN FRANCISCO**—Apartment house, 1 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected in the Fifty Vara District and has been designed in the Pueblo style. The structure covers a large ground area and will contain a total of eighty rooms arranged in two, three and four room suites. Interiors will be finished in pine and hardwood with hardwood floors in the living and dining rooms. There will be steam heat, a hot water system, electric cooking apparatus and vacuum cleaning system. All suites will have wall beds and private baths. Bath rooms will be finished in tile with composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base. Class C construction, \$25,000. Architect, W. W. Breite, Clunie Bldg., S. F. Owner, Frederick Steffen. The building will be erected on the east side of Hyde street 112 south of Ellis, and has been designed

to contain a number of two and three room suites with private baths and wall beds. Interiors will be finished in pine and elm. Hardwood floors will be used. There will be steam heat and a hot water system. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are being prepared.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$16,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected at the southwest corner of California and Stockton streets and will cover a considerable ground area. Interior will be finished in pine, redwood and southern gum. There will be a number of suites arranged in two and three rooms. Private baths and wall beds will be used. Bath rooms will be finished in tile with composition floors. Plans provide for steam heat and a hot water supply. Entrance will be finished in marble and tile. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and segregated figures are being taken.

## BONDS

**REDONDO BEACH, LOS ANGELES CO., CAL.**—The City Trustees of Redondo Beach have agreed on the selecting of a site for the proposed library building and will soon call a bond election in which to secure funds for the erection of the building.

The site consists of thirteen lots, fronting 270 feet on Vincent street, 175 on Elana avenue and 150 feet on Broadway.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Engineer G. E. Grunsky of San Francisco, the consulting engineer in the preparation of plans for Stockton's new sewer system, states that the drawings are nearly completed and will be ready for approval in ten days. On approval of the plans a bond election will be called to raise funds for the construction of the system.

**AUBURN, PLACER CO., CAL.**—Preliminary plans for a municipal lighting system, to be constructed and operated by the city of Auburn, are now under consideration by the City Trustees.

The matter will be considered by the Trustees at their meeting in January, when it is thought that a date for the calling of a bond election will be set.

**DUNBAR, TULARE CO., CAL.**—The million and a half dollar good roads bond issue has been defeated by approximately 700 votes. There was but 50 per cent of the registered vote polled.

At the Dunbar precinct there were 198 votes in favor of the issue and 221 opposed. Visalia cast the highest vote favoring the bonds, the vote being four to one favoring the bonds and had 188 votes over the necessary two-thirds majority.

**WINTERS, YOLO CO., CAL.**—Bonds of \$50,000 will be voted at Woodland on December 6th. The proceeds of the issue, should it carry, will be used in the construction of a new high school building.

**PLACERVILLE, EL DORADO CO., CAL.**—The proposition of calling a bond election at which time the voters will decide to bond the city for funds to pave Main street from end to end is now under consideration.

**SEBASTOPOL, SCHOOL DISTRICT SONOMA CO., CAL.**—The Board of Supervisors has sold the \$20,000 bonds of the Sebastopol School District to N. V. Halsey & Co. for \$20,007 and accrued interest.

**VALLEJO, SOLANO CO., CAL.**—Fifty thousand dollars worth of the State Highway bonds, bearing interest at the rate of 4 per cent and purchased by the county less than a year ago, have been sold by the Supervisors for \$46,000.

This is the first sale of any of the \$350,000 worth of bonds purchased by the Supervisors to insure work on the highway through Solano County.

**RICHMOND, CONTRA COSTA CO., CAL.**—Seventy-five thousand dollars worth of Richmond School District bonds, the last portion of the \$150,000 issue voted by the people last January, have been sold by the Supervisor. Three sites for school buildings will be purchased immediately. One for the Pullman, East Richmond and El Cerrito schools.

**SAN FRANCISCO, CAL.**—The Nap City Water Company has applied to the State Railroad Commission asking leave to sell \$14,500 of its bonds at not less than 90.

**COLUSA, COLUSA CO., CAL.**—The second installment of the State Highway bonds of Colusa County have been sold to the First National Bank of Colusa. The bonds amounted to \$125,000 and were sold for \$112,828.12, leaving \$11,171.87½ for the county to make up.

Provision for this deficit has already been met by the county. There are about \$115,000 of highway bonds yet to be sold in this county.

**WOODLAND, YOLO CO., CAL.**—The \$100,000 bonds recently authorized by the voters of the Woodland School District for the purpose of building a new grammar school, will be sold to the highest bidder on December 19th.

**HUNTINGTON BEACH, ORANGE CO., CAL.**—Another bond election, is expected, will be held in this city in the near future. A petition is now in circulation asking the City Trustees to call a special election to vote bonds of \$6,500 to secure adequate fire protection.

**HOLTVILLE, IMPERIAL CO., CAL.**—The County Board of Supervisors has turned down the offer of Halsey & Co. of 90 per cent plus accrued interest for \$50,000 worth of highway bonds. This would mean an actual loss of 10 per cent by the county.

**MAIRSHFIELD, ORE.**—A bond issue will be presented to the voters at a

election to be called for a referendum on the future for the purpose of raising the necessary £20,000 with which to erect a monument to the fallen. Carl Albrecht, co-chairman of the movement, is

**BILLINGS, MONT.**—The bill will be received until December 31, 1911, for the purchase of \$15,000 bond for an 1880 and of \$22,000 bonds in 1909 for the construction of bridges across the Yellowstone River at Pompey's Pillar and for the construction of a bridge across Duck Creek.

DEER LODGE, MONT. A complete canvass of the recent election shows that the proposition of issuing bonds in the sum of \$100,000 for the erection of a court house has carried. Link & Haire of Billings, Mont., are the architects.

**TACOMA, WASH.** The Pacific Iron and Steel Company will issue \$50,000 bonds, to raise funds for adding eight furnaces to its present plant, erecting a new building and adding new machinery.

**VANCOUVER, WASH.**—Bids opened by the Board of County Commissioners, Clarke County, for the purchase of \$400,000 interstate bridge building bonds.

**RED LODGE, MONT.**—Bids will be received until December 30th for the purchase of \$30,000 poor farm bonds. Funds will be used in improvements at that place. I. A. Hauswald is the County Clerk.

**BRIDGES, DAMS AND HARBOR  
WORK.**

**SAN FRANCISCO**—Bridges' painting. Cost not stated. Engineer, none. Owners, City and County of San Francisco. The Board of Public Works has requested the Board of Supervisors to make an appropriation for repainting the city bridges at 6th street, Mt. Vernon avenue, Arlington street and Richmond avenue. The work will be done under the direction of the Superintendent of Building Repairs.

**FRESNO, FRESNO CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, City Engineer, Fresno. Owners, City of Fresno. Bids are now being taken for a reinforced concrete bridge to be constructed over Dry Creek on Van Ness avenue. Plans and specifications can be secured from the City Engineer's office at Fresno. Bids will be opened on December 21st.

BAKERSFIELD, KERN CO., CAL.—  
Bridge, steel and reinforced concrete.  
Cost not stated. Engineer, State High-  
way Commission associated with  
County Surveyor, Bakersfield. Owners,  
Kern County. The State Highway  
Commission has been authorized by  
the Supervisors to construct a bridge  
over Beardsley Canal. The county will  
pay for the work. With the materials  
on the ground the State Highway Com-  
mission can build the bridge cheaper  
than any other contractor. The County  
Surveyor also has plans prepared for  
a 90-foot reinforced concrete bridge to  
be constructed over Poso creek at  
Famosa. Bids on this bridge will soon  
be called for.

RICHMOND, CONTRA COSTA CO., CAL.—Subway repair. Concrete, Co. not stated. Engineer: City Engineer, Richmond. Owners: City of Richmond. City Engineer. Chipping announcements that plans and specifications for the improvement of the subway have been completed and now are being looked over by City Attorney Hall.

[illegible]

## FIREHOUSES AND JAILS

**SAN FRANCISCO.** Intention Home, 2 story and base, Class A construction, Edison, Architect, Louis C. Mulgark, Chronicle Bldg., S. F. Owners: City and County of San Francisco. Plans for the first unit of the new Intention Home, which is to be erected on West Mission Street between Brady and 17th streets, are nearly complete. The building will be of preproof construction and will contain the general office, wards, dining rooms and kitchen. Interior will be finished in pine and hardwood. There will be a central heating system, oil burning plant and modern plumbing. Exterior of the building will be faced with pressed brick. Bids will be called for shortly by the Board of Public Works.

## FLATS

FRESNO, FRESNO CO., CAL.—Flats, 2 story and base, frame, \$7,500. Architects, Bowen & Davis, Fresno. Owner, Robert Cutten. The building will be erected on Tulare street and has been designed to contain four modern flats of five rooms each. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and the mantels. Bath rooms will be finished in tile. Automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

[illegible]

beck. The building will be erected at the northwest corner of Douglass and 19th streets and has been designed for a store and a three-room flat on the first floor. Upper floors will contain two six-room flats. Interiors will be finished in pine and redwood with some hardwood floors. There will be an open fire place in each living room. Bath rooms will have tile wainscot. Exterior of the building will be covered with shiplap. Plans are being prepared.

#### HOTEL

**SAN FRANCISCO**—Flats, 3 story and base, frame, \$6,500. Architect, Italo Zanolino, 604 Montgomery street, S. F. Owner, L. M. Calosso. The building will be erected on the north side of Broadway east of Larkin and has been designed to contain three modern flats of five and six rooms with a private garage in the basement. Interiors will be finished in pine and redwood. Some hardwood floors will be used. There will be open fire places and tile mantels. Bath rooms will be finished in tile. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

### GOVERNMENT WORK & SUPPLIES.

#### Prospective Bidders.

Specifications for work under the office of the supervising architect have been furnished to the following firms in addition to those previously noted in these columns:

**La Junta, Colo., Construction, Jan. 4.**  
George A. Shaul, Seneca, Kans.  
George W. Stiles Construction Co., the Rookery Building, Chicago, Ill.  
Dieter & Wenzel Construction Co., Wichita, Kans.  
Daniel T. McCarthy, 411 Walnut street, Philadelphia, Pa.  
J. H. Wiese, City National Bank Building, Omaha, Neb.  
Frank H. Latimer & Son, 612 Massachusetts Building, Kansas City, Mo.  
J. E. & A. L. Pennock, Land Title Building, Philadelphia, Pa.

#### Panama Canal Awards.

Awards have been made during the past week by the general purchasing officer of the Panama Canal for furnishing supplies and materials for the Panama Canal, as follows:

Under circular 878, cable, bolts, tubes, brushes, rope, lumber, etc., bids opened November 20.

Henry R. Worthington, 115 Broadway, New York City, class 7, brass packing nuts, \$66.

Maendler Bros., St. Paul, Minn., class 11, flat varnish brushes, \$188.40.

No award has yet been made on class 13.

#### Army Work Authorized.

The quartermaster general has directed that specifications be drawn for the following work at army posts: Fort Winfield Scott, Cal., storehouse for militia.

Fort Sam Houston, Tex., stable and barrack for pack team, and lavatory. Presidio of San Francisco, Cal., two howling alleys in the gymnasium building.

The work in each instance will be done by the post authorities. Inquiries regarding same should be addressed accordingly.

#### Indian Office, Frame Hospitals.

The contract for the construction of six frame hospitals at various places, bids for which were opened November 3, has been awarded to W. D. Lovell, Minneapolis, Minn., at \$86,000 for all six buildings.

#### Reclamation Service, Pump Impellers.

Abstract of bids for specifications 356-F, centrifugal pump impellers, Minidoka reclamation project, Idaho, opened at Los Angeles.

D'Olier Centrifugal Pump and Machine Co., Philadelphia, Pa., delivery Philadelphia, item 1, \$1,830; 2, \$690.

United Iron Works, Oakland, Cal., delivery Oakland, item 1, \$1,895; 2, \$637.

R. M. Eddy Foundry Co., Chicago, Ill., delivery Chicago, item 1, \$1,924; 2, \$675; government to furnish patterns for item 2.

Union Iron Works, San Francisco, Cal., delivery San Francisco, item 1, \$1,937; 2, \$965.

Union Machine Co., San Francisco, Cal., delivery San Francisco, item 1, \$1,996; 2, \$908.

Byron Jackson Iron Works, San Francisco, Cal., delivery West Berkeley, item 1, \$2,100; 2, \$985.

S. Morgan Smith Co., York, Pa., delivery York, item 1, \$2,140; 2, \$720.

#### Scoop Wheel.

Abstract of proposals for material for scoop wheel for Minidoka reclamation project, Idaho, opened at Los Angeles, Cal., advertisement No. 362.

Advance Machine Co., Los Angeles, Cal., item 1, \$725; Los Angeles; 35 days, item 2, \$20; Los Angeles; 35 days.

Baker Iron Works, Los Angeles, Cal., item 1, \$768; Los Angeles; 4 weeks; item 2, \$15; Los Angeles; 4 weeks.

Fulton Engine Works, Los Angeles, Cal., item 1, \$830; Los Angeles; 30 days; item 2, \$32; Los Angeles; 30 days.

Llewellyn Iron Works, Los Angeles, Cal., item 1, \$835; Los Angeles; 21 days, item 2, \$45; Los Angeles; 21 days.

Joshua Hendy Iron Works, San Francisco, Cal., item 1, \$875; Sunnyvale, Cal.; 25 days; item 2, \$20; Sunnyvale, Cal.

United Iron Works, Oakland, Cal., item 1, \$890; Oakland, Cal.; 40 days; item 2, \$25; Oakland, Cal.; 10 days.

Union Machine Co., San Francisco, Cal., item 1, \$998; San Francisco; 30 days; item 2, \$28; San Francisco; 30 days.

#### Light-house Service Buoys.

The following bids were received by the light-house inspector, 18th district, San Francisco, Cal., for two Mammoth whistling buoys:

Moore & Scott Iron Works, \$3,300.

Main Street Iron Works, \$3,960.

Pacific Coast Boiler Works, \$1,850; accepted.

Ocean Shore Iron Works, \$2,850.

Seattle Construction and Dry Dock Co., \$3,006.

Griscorn-Russell Co., \$2,900.

#### Ejector Valves and Indicators.

Abstract of proposals for ejector valves and indicators, balanced valves, for Shoshone reclamation project, Wyoming, opened at Los Angeles, Cal.:

Keystone Iron Works, Los Angeles, Cal., item 1, \$128; Los Angeles, 16 days; item 2, \$129; Los Angeles, 16 days.

Joshua Hendy Iron Works, San Francisco, Cal., 132 Sunnyvale; 30 days; item 2, \$153; Sunnyvale; 30 days.

Union Machine Co., San Francisco; Cal., item 1, \$127.50; San Francisco; 14 days; item 2, \$184; San Francisco; 14 days.

James Jones Co., Los Angeles, Cal., item 1, \$204; Los Angeles; 45 days; item 2, \$350; Los Angeles; 60 days.

Pelton Water Wheel Co., San Francisco, Cal., item 1, \$390; San Francisco; 25 days; item 2, \$450; San Francisco; 35 days.

#### Umpqua River Light-station, Wash. Fixtures.

The following bids were received by the light-house inspector, 17th district, Portland, Ore., for furnishing fixtures, fittings, and pipe for Umpqua River Light-station, Wash.:

Crane Co., Portland, Ore., \$556.38; accepted.

M. L. Kline, Portland, Ore., \$356.03.

The Gould Co., Portland, Ore., \$601.98.

**FORT KAMEHAMEHA, T. H.**—Post buildings, 48, 1 story, frame. Cost not stated. Engineer, Constructing Quartermaster, Fort Kamehameha, T. H. Owners, United States Government. Bids will be opened by the War Department at Washington on December 31st for constructing the new army post to be erected at Fort Kamehameha near Honolulu. There are 48 buildings included in the work, all of which will be of frame construction and of the one-story type. Plans and specifications are on file with the Constructing Quartermaster at Fort Mason and can be obtained on deposit of \$25. The following buildings are included in the work: Sixteen sets of company officers' quarters with detached servants' quarters. Two sets of lieutenants' quarters with detached servants' quarters. Eight sets of non-commissioned officers' quarters. Four sets of barracks. Wrecking one store house and other work, including quartermaster's store houses, etc.

**MAKE ISLAND, CAL.**—Marine barracks, 1 and 2 story, reinforced concrete and brick, \$206,000. Architect, Bureau of Yards and Docks, Washington, D. C. Owners, United States Gov-

ernment. It now seems certain that a part, probably one half, of the \$2,000,000 now available for constructing new marine barracks at Mare Island and the Norfolk Navy Yards, will be used at once for this work at Mare Island. The present quarters for the marines are but temporary affairs and new buildings are needed very badly. Fort McArthur on San Pablo Bay will be fortified and a permanent garrison stationed there, according to the latest reports from the War Department. A Board composed of Col. Stephen M. Foote, Col. George McK. Williamson, of the Constructing Quartermaster Department at Fort Mason, Major L. R. Burgess and Major Robert R. Raymond has been appointed to arrange preliminary plans for the construction of barracks and mounting guns.

**Contracts Awarded.**  
SAN FRANCISCO — Rostrum, concrete, \$5,832. Architect, Constructing Quartermaster, Fort Mason. Owners, United States Government. Contractor, R. Ehrhart, S. F. Contract price, \$5,832.

FORT MILEY, MARIN CO., CAL.—Water main, \$315. Engineer, Constructing Quartermaster, Fort Mile. Owners, United States Government. Contractor, F. Szoke, S. F. Contract price, \$315.

## HOSPITALS.

SAN FRANCISCO — Hospital ward and garage, 2 story and base. Class A construction, \$70,000. Architects, Righetti & Headman, Phelan Bldg., for the City Department of Architecture. Owners, City and County of San Francisco. Plans for the pathological ward and garage building to be erected adjoining the new San Francisco Hospital, have been completed and approved. Bids are now being taken by the Board of Public Works for the general construction. The building will have a complete steel frame, brick exterior walls, concrete floor and fireproof roof. Interior will be finished in pine and metal. Steam heat will be supplied from the general plant at the hospital. Exterior of the building will be faced with pressed brick. Bids will be opened on December 23rd. Plans and specifications can be secured from the City Department of Architecture. An official proposal appears in another column of this issue.

SAN FRANCISCO—Hospital vacuum cleaning. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete for the installation of a complete vacuum cleaning system in the main group of buildings at the San Francisco Hospital. Bids are now being taken and will be opened by the Board of Public Works on December 23rd. An official proposal appears in another column of this issue.

SAN FRANCISCO—Hospital fire escapes. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, Owners, City and County of San Francisco. Plans are complete and figures are being taken for installing fire escapes on the main group of buildings at the San Francisco Hospital. Bids will be opened on December 23rd by the Board of Public Works. An official proposal appears in another column of this issue.

SAN FRANCISCO—Hospital repairs

ating plant. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and figures are now being taken for construction and installing a complete water supply plant at the Isolation Hospital. Bids will be opened by the Board of Public Works on December 23rd. Plans and specifications can be secured from the City Department of Architecture. An official proposal appears in another column of this issue.

## HOTELS.

SAN FRANCISCO—Hotel, 4 story and base, brick and steel, \$50,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, Columbia Realty Co. The building will be erected on the west side of Taylor street north of Sutter, having a frontage of 38 feet 9 inches by 125 1/2 feet. There will be in the neighborhood of 75 rooms, all of which will have private baths. The main floor will be occupied by the lobby and offices. Interior will be finished in pine and redwood with some hardwood floors. There will be steam heat, elevator service and a hot water supply. Bath rooms will be finished in tile with composition floors. Some ornamental plaster will be used in the lobby. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

### Contracts Awarded.

SAN FRANCISCO — Hotel addition and alterations, 2 story and base frame residences to be converted into a hotel, \$15,000. Architects, Smith & Stewart, 241 Kearny street, S. F. Owner, K. D. Winship. Contractors, Brandt & Stevens, S. F. Contract price, \$15,000.

## PANAMA-PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Exhibition booth, frame construction, \$15,000. Architect, Louis C. Mulgardt, Chronicle Bldg., S. F. Owners, Union Oil Co. The display will be erected in the Palace of Varied Industries at the Panama-Pacific International Exposition, and will embrace one of the most comprehensive displays of the oil industry and its varied products. Bids will be taken for the work shortly.

## RAILROAD CONSTRUCTION AND EQUIPMENT.

DINTEA, TULARE CO., CAL.—Railroad construction and supplies. Cost not stated. Engineer, none. Owners, Mineral King Orchard Co. The Mineral King Orchard Company will purchase equipment consisting of railway and transfer cars to be used in handling the fruit crops for the year 1915. The trucks for several miles will be laid and will be of heavy steel and ties. These will be the first steel tracks laid in this county.

### Contracts Awarded.

SAN FRANCISCO — Coal, 100,000 barrels, \$8. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Crocker-McClellan, contract price, \$827.

## RESIDENCES.

SAN FRANCISCO — Bungalow, 1 1/2 story and base, frame, \$10,000. Architect, Thorne Thorne, Haight, 245 Broadway, S. F. The dwelling will be erected on the north side of Anza street, east of the city limits and has been designed for a family of four. The interior finish will be of large pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fireplace in the living room. Mantel will be of tile or brick. Bath room will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO — Residence, 2 story and base, frame, \$7,000. Architects, Patch & Knoll, Hearst Bldg., S. F. Owner, Mr. Griffin. The dwelling will be erected in Forest Hill and has been designed for an eight room house with two baths and sleeping porch. Interior finish will be of pine, redwood and hardwood. Some white enamel will be used in the bed rooms. There will be hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. A hot water system will also be installed. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO — Residence, 2 story and base, frame, \$4,000. Architect, O. E. Evans, 2367 Mission street, S. F. Owner, M. W. Kane. The dwelling will be erected in the Richmond District and has been designed for an eight room house with bath. Interior finish will be of pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be open fire places, furnace heat and brick mantel. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO — Bungalow, 1 1/2 story and base, frame, \$2,000. Architect, none. Owner, Ward C. Brown, 2915 Harrison street, S. F. The dwelling will be erected on the west side of Lishon street south of Exelsior and has been designed for a five room house with bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place in the living room. Mantel will be of tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO — Bungalow, 1 1/2 story and base, frame, \$2,000. Architect, none. Owner, J. C. Lee, 1015 Broadway, S. F. The dwelling will be erected on the west side of Lishon street south of Exelsior and has been designed for a five room house with bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place in the living room. Mantel will be of tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residences, 30, 2 story and base, frame, \$2,000 to \$5,000 each. Architect, none. Owner, Thomas Seoble, 363 11th avenue, S. F. These dwellings will be erected on the property bounded by 29th and 32nd avenues, Anza and Balboa streets. Each house will contain from seven to eight rooms. Interiors will be finished in pine, redwood, elm and hardwood. Hardwood floors will be used in the principal rooms. Furnace heat will be installed in the more expensive dwellings. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and floors. Automatic water heaters will be used. Exteriors will be covered with cement plaster on metal lath. Plans for the first six homes have been completed and work will shortly be started under the Day Labor system.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 2 story and base, brick and frame, \$15,000. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner's name withheld. The dwelling has been designed for a ten-room house with three baths and sleeping porch. A garage will also be erected on the property. Interior finish will be of pine, redwood, hardwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system and hot water system. Bath rooms will be finished in tile. There will be open fire places and tile or brick mantels. Exterior of the house will be covered with brick veneer and cement plaster. Plans are being prepared.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$3,500. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, H. H. Gastman. The dwelling will be erected on Euclid avenue, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$3,500. Architects, F. R. Peake Co., 1127 University avenue, Berkeley. Owner, O. E. Essig. The dwelling has been designed for a seven-room house and will be erected in Clingmont. Interior finish will be of pine, redwood and hardwood. Hardwood floors will be used in the living room, dining room, and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are com-

plete and figures are being taken.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$10,000. Architects, Schirmer, Bugbee & Co., Balzied Bldg., Oakland. Owner, D. F. W. Shores. The dwelling will be erected in Crocker Highlands, and has been designed for an eight-room house with two baths and sleeping porch. A garage will also be erected on the property. Interior of the dwelling will be finished in pine, redwood, hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system, probably hot water heat, and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and equipped with showers. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$4,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Mr. Haywards. The dwelling will be erected in Thousand Oaks, and has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine, redwood and hardwood. Some hardwood floors will be used. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,000. Architect, H. C. Bauman, Chronicle Bldg., S. F. Owner, E. A. Janssen, Hearst Bldg. The dwelling will be erected in Lincoln Manor and has been designed for a seven-room house with bath. Interior will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the living room and dining room. There will be an open fire place in the living room. Mantel will be of tile or brick. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Residences, 3, 2 story and base, frame, \$3,000 each. Architect, none. Owner, Alfred Johnson, 2423 Clement street, S. F. These dwellings will be erected on the west side of 26th avenue south of Geary street, and each has been designed to contain seven rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile wainscot will be used in the bath rooms. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, M. Johnson, Addison opposite Bryon, Berkeley. The dwelling will be erected on Addison street and has been designed for a seven-room house with bath. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be

open fire places and tile or brick mantels. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, John G. Vallen, 2897 Piedmont avenue, Berkeley. The dwelling will be erected on Walla Vista near Arimo, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SACRAMENTO, CAL.**—Residence, 2 story and base, frame and plaster, \$25,000. Architect, R. A. Herold, Forum Bldg., Sacramento. Owner, David W. Serman. The dwelling will be erected on Sierra avenue in East Sacramento and has been designed for a ten-room house with three baths and sleeping porch. Interior finish will be of pine, redwood, hardwoods and white enamel. Hardwood floors will be used in the living room, dining room, library and reception hall. There will be a central heating system and open fire places. Bath rooms will be finished in tile and equipped with showers. A hot water supply and vacuum cleaning system will also be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

**SACRAMENTO, CAL.**—Residence, 1½ story and base, frame. Cost not stated. Architect, none. Owner, Carl Koel, 3326 Carnell avenue, Sacramento. The dwelling will be erected on Hawley avenue and has been designed for a five-room house. Interior finish will be largely of pine. There will be hardwood floors in the principal rooms. A large open fire place and tile or brick mantels will be installed. Bath room will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**FRESNO, FRESNO CO., CAL.**—Residence, 2 story and base, frame and plaster, \$15,000. Architects, Bowen & Davis, Fresno. Owner, I. Teilmann. The dwelling will be erected on Kearney Boulevard, and has been designed for an eleven-room house with four baths and sleeping porch. Interior finish will be of pine and hardwood with some white enamel in the bed rooms. There will be hardwood floors in the living room, dining room, library and reception hall. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**FRESNO, FRESNO CO., CAL.**—Residence, 1½ story and base, frame, \$5,000.

000. Architects, Bowen & Brown, Fresno. Owner, Lou Smith. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have the warmest. Exterior of the house will be covered with cement plaster on metal bath. Plans are now being prepared.

### Contracts Awarded.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$15,000. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Eugene F. Kline. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$15,000.

### SCHOOLS.

BERKELEY, ALAMEDA CO., CAL.—Schools, 5, 1 and 2 story and base, brick and steel, \$35,000 to \$75,000. Architects as follows. Owners, City of Berkeley. At a joint meeting of the Berkeley City Council, the Board of Education and the Advisory Committee held Monday evening, five architects were selected to prepare plans for the new school buildings to be erected in Berkeley. Hobart & Cheney, Crocker Bldg., S. F., will design one building; Walter Reed, Oakland Bank of Savings, one; W. H. Ratcliff, First National Bank Bldg., Berkeley, one; Coxhead & Coxhead, Hearst Bldg., S. F., one, and J. W. Plachek, Acheson Bldg., Berkeley, one. The new buildings will range in cost from \$35,000 to \$75,000.

FRESNO, FRESNO CO., CAL.—Normal school, 1 and 2 story and base, brick and steel, \$370,000. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans for the \$370,000 State Normal School to be constructed at Fresno have been completed and approved by the State Engineering Advisory Board at Sacramento. Bids will be called for shortly, and it is hoped that a contract can be let early in January.

CALEXICO, IMPERIAL CO., CAL.—Schools, 2, 1 and 2 story and base, hollow tile. Cost not stated. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, City of Calexico. Plans for two new buildings have been completed and figures will be taken beginning December 22nd. The two-story building will cover an area of 178 by 61 feet and the one-story structure 148 by 35 feet. Interiors will be finished in pine with maple floors in the class rooms. Plans provide for modern school plumbing, ventilating system and program clocks. Exteriors will be faced with cement plaster. Plans can be secured from the architects after the date above mentioned. Bids will be opened on January 5th.

### SEWERS, STREET WORK & WATER SYSTEMS.

SAN FRANCISCO—Oil storage tank, concrete and steel. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and figures are now being taken for constructing an oil storage

tank in connection with the Municipal Power House at the Civic Center. It will be opened to the Board of Public Works on December 16. Plans and specification can be secured from the City Engineer's office. An official proposal appears in another column of this issue.

REDWOOD CITY, SAN MATEO CO., CAL.—Paving, fence and bulkhead. Cost not stated. Engineer, County Surveyor, Redwood City. Owner, San Mateo County. Bids opened by the Supervisors for the paving of Oak Grove avenue at Muho Park show the following bids and the bidders:

City St. Improvement Co.	\$7,429.87
Federal Construction Co.	9,333.77
Clark & Henery	8,102.41
Petersen & Grier	7,795.19
Raisch Imp. Co.	7,792.06

Surveyor's estimate, \$6,326.58. Bids laid over until next meeting. Bids for construction of a bulkhead on the San Francisco creek in the 3rd Road District show:

Harry B. Morey	\$3,324.15
D. C. Howard	3,118.15
P. H. McEvoy	3,578.50

Contract awarded to D. C. Howard. Construction of the John Meyn road shows James Willison the only bidder, his bid being \$2,162.01, and he was awarded the contract.

Construction of Kelly avenue, Half-moon Bay road:

James Willison	\$1,381.78
Wrightson, Anderson & Yost	4,945.05

Matter of award laid over until next meeting.

Bids for right-of-way fence on Belmont road show A. D. McCellan the only bidder at \$1,877.77, and he was awarded the contract.

REDWOOD CITY, SAN MATEO CO., CAL.—Fencing. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Bids for the 28,000 feet of wire fencing, required to enclose the new road right-of-way through the Week's property have been ordered by the Board of Supervisors.

FRESNO, FRESNO CO., CAL.—Fire hydrants. Cost not stated. Engineer, City Engineer, Fresno. Owners, Fresno County. Plans have been completed and figures are being taken for furnishing twenty-five fire hydrants. Full particulars can be secured from the City Clerk. Bids will be opened on December 21st.

SAN FRANCISCO—Tunnel electric work and fixtures, \$885. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for furnishing and installing electric work in the Stockton Street Tunnel, including the lighting fixtures, show the McFall Electric Co. low at \$885. They will be awarded the contract. A complete list of these bids will be found under the heading of San Francisco in this issue.

SAN RAFAEL, MARIN CO., CAL.—Steam pipes and street work. Cost not stated. Engineer, City Engineer, San Rafael. Owners, Town of San Rafael. The Clerk of the City Council has been directed to advertise for bids for furnishing and installing steam pipes for the Southern Electric gas plant at the San Rafael baths. The board is now considering the proposal of the City Engineer to purchase the property of the Petaluma Electric Co. for the purpose of San Rafael baths.

STOCKTON, STOCKTON CO., CAL.—Water works plant and equipment. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. Bids submitted to the Trustees for the construction of a building and the installation of an auxiliary plant for the city water works have been rejected. The matter of doing the work under the Day Labor system is now under consideration.

REEDLEY, FRESNO CO., CAL.—Water works plant and equipment. Cost not stated. Engineer, City Engineer, Reedley. Owners, City of Reedley. Bids submitted to the Trustees for the construction of a building and the installation of an auxiliary plant for the city water works have been rejected. The matter of doing the work under the Day Labor system is now under consideration.

AUBURN, PLUMER CO., CAL.—Municipal lighting system. Cost not stated. Engineer, City Engineer, Auburn. Owners, City of Auburn. Preliminary plans for a municipal system to be constructed and operated by the City of Auburn are now under consideration by the City Trustees. The matter will come up for discussion at the January meeting of the Board. It is proposed to call a bond election to vote the necessary bonds to cover cost of construction. Further mention will be made of this work when a decision has been rendered.

STOCKTON, SAN JOAQUIN CO., CAL.—Municipal sewer system. Cost not stated. Engineer, G. E. Grunsky, San Francisco, associated with the City Engineer, Stockton. Owners, City of Stockton. Engineer G. E. Grunsky reports that the plans for Stockton's new sewer system are now well under way and will be ready for approval in about two weeks. A bond issue will be voted in the near future to raise funds for the construction of the system.

LODI, SAN JOAQUIN CO., CAL.—Sewer work. Cost not stated. Engineer, City Engineer, Lodi. Owners, City of Lodi. Rights of way for water and sewer mains across two blocks in the Barnhart Tract to serve the residents between Central avenue and Tokay street in the southern part of the city have been secured. Plans for this work will be prepared by the City Engineer and a contract for the plans and bids will be called for.

THE CLINT, TULARE CO., CAL.—Water works plant and equipment. Cost not stated. Engineer, City Engineer, The Clint. Owners, City of The Clint. Bids submitted to the Trustees for the construction of a building and the installation of an auxiliary plant for the city water works have been rejected. The matter of doing the work under the Day Labor system is now under consideration.

STOCKTON, STOCKTON CO., CAL.—Water works plant and equipment. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. Bids submitted to the Trustees for the construction of a building and the installation of an auxiliary plant for the city water works have been rejected. The matter of doing the work under the Day Labor system is now under consideration.

project for the Sacramento Valley, which will distribute water to approximately \$88,000 acres. The cost will be about \$23,000,000, according to State Engineer W. F. McClure, a member of the special board of engineers appointed by Secretary of the Interior Lane to investigate irrigation in the Sacramento Valley. The members of the board of engineers who made a report on the great irrigation project are: Wm. L. Marshall, Consulting Engineer to Secretary of the Interior Lane; D. C. Henny, Acting Chief Engineer of the United States Reclamation Service; Wm. F. McClure, State Engineer, and H. T. Cory, Engineer of the Iron Canyon Project.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Water main extensions, \$6,000. Engineer, City Engineer Barzellotti, Stockton. Owners, City of Stockton. At the regular meeting of the Board of Trustees Superintendent Henning submitted estimates of the cost of installing cast iron water mains into the Cordier Tract and the Western Addition, recommending that the same be constructed in time for water service in the spring. The estimates are as follows: Pleasant avenue to Hutchins street, 330 feet of six-inch pipe, \$1,125 west of Hutchins, 600 feet of six-inch pipe and 610 feet of four-inch pipe at \$1,670. Total, \$2,795. No action was taken, but it was the sense of the board that a meeting will be called within a short time, when this and other proposed extensions will be threshed out. Engineer Barzellotti submitted an estimate of \$1,355.80 for a ten-inch storm water sewer for West Elm street.

**CHICO, BUTTE CO., CAL.**—Electroliers. Cost not stated. Engineer, none. Owners, City of Chico. The next meeting of the Development Board will be given over to the discussion of electroliers for a lighting system for Chico, according to City Trustee John S. Waterland, who has been investigating the proposition. The committee wants electroliers installed along Main, Broadway and Fifth streets.

By order of the Board of Labor  
Works, P. J. CHURCHILL

By order of the Board of Public  
Works, F. J. CHURCHILL,

In a report from the U.S. State Dept. dated September 16, it is noted that "while the U.S. has a surplus of the raw oil from which asphalt is produced, exports of asphalt to the United States are small." While the U.S. has a surplus of asphalt, it is noted that "the U.S. is a net importer of asphalt from the U.S.A."

## Plans Here For New Army Post.

**Forty-eight New Buildings to be Erected at Fort Kanehameha Near Honolulu.** Bids Open December 31.

A new army post to be known as Fort Kanehameha is to be constructed in Hawaii some distance out of Honolulu, and when completed will be one

of the most modern of the army posts in the island. A total of forty-eight new buildings are required, plans for which have been completed and are now out for figures. Bids will be opened in Washington, D. C., on December 31st. Plans and specifications for this work are on file with the Constructing Quartermaster at Fort Mason and may be secured by a deposit of \$25.

All buildings in the new post will be of the one-story type and of frame construction with rubble stone foundations and chimneys and tile roofs. Modern plumbing and electric work, finish hardware, lighting fixtures and waterproofing are included in the general contract. The principal buildings, which will form the new post, are sixteen sets of Company Officers' quarters each with detached servants' quarters, two sets of Field Officers' quarters also with detached servants' quarters; eight sets of Non-Commissioned Officers' quarters; four sets of barracks, store houses and Quartermaster's supply depot.

### MARIN, CONTRA COSTA AND SOLANO COUNTIES.

STEAM PIPES AND STREET WORK  
Cost not stated. San Rafael, Marin  
Co., Cal. Engineer, City Engineer, San  
Rafael. Owners, Town of San Rafael.  
The Clerk of the City Council has been  
directed to advertise for bids for fur-  
nishing and laying steam pipes from  
the Southern Pacific Gas Plant to the  
San Rafael Baths. The Council is now  
considering the proposition to bitu-  
menize the road from Third street and  
Potluma avenue to and around the  
San Rafael Baths.

GRAVING FOR TRACKS AND  
TANKS Cost not stated. Richmond,

Contra Costa Co., Cal. Engineer's name  
not given. Owners, Shell Oil Co. Con-  
tracts for the grading and excavating  
work for the tanks and spur tracks at  
the Shell oil refinery in Richmond have  
been awarded to O'Brien Bros. & Smith  
of San Francisco, covering the exca-  
vating for the four 55,000 barrel oil  
tanks which will be built on top of  
the hills. Thomas R. Hanna of Mar-  
display will be erected in the Palace of  
spur tracks through the works.

PUMPS FOR PIPE LINE—Cost not  
stated. Martinez, Contra Costa Co.,  
Cal. Engineer's name not given. Own-  
ers, Valley Pipe Line Co. Contractors,  
Columbia Steel Works, Pittsburg. Con-  
tract price not given. Note: This  
contract includes the pumps and aux-  
iliary equipment for eleven stations  
along the route of the Valley Pipe  
Line Co. from Coalinga to Martinez.  
bridge will soon be called for.

SUBWAY REPAIRS—Concrete. Cost  
not stated. Richmond, Contra Costa  
Co., Cal. Engineer, City Engineer,  
Richmond. Owners, City of Richmond.  
City Engineer Chapman announces  
that plans and specifications for the  
improvement of the subway have been  
completed and now are being looked  
over by City Attorney Hall.

MARINE BARRACKS—1 and 2 story,  
reinforced concrete and brick, \$200,000.  
Mare Island, Cal. Architect, Bureau  
of Yards and Docks, Washington,  
D. C. Owners, United States Gov-  
ernment. It now seems certain that  
a part, probably one half, of the \$200,-  
000 now available for constructing  
new marine barracks at Mare Island  
and the Norfolk Navy Yards, will be  
used at once for this work at Mare  
Island. The present quarters for the  
marines are but temporary affairs and  
new buildings are needed very badly.  
Fort McArthur on San Pablo Bay will  
be fortified and a permanent garrison  
stationed there, according to the latest  
reports from the War Department. A  
Board composed of Col. Stephen M.  
Foote, Col. George McK. Williamson,  
of the Constructing Quartermaster De-  
partment at Fort Mason, Major L. R.  
Burgess and Major Robert R. Raymond  
has been appointed to arrange pre-  
liminary plans for the construction of  
barracks and mounting guns.

### Contracts Awarded.

COURT HOUSE—Addition to court  
room. Cost not stated. Martinez, Con-  
tra Costa Co., Cal. Architects, W. H.  
Weeks, 75 Post street, S. E. Owners,  
Contra Costa County. Contractors,  
Fink & Schindler, S. E. Contract price  
not stated.

### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA.

IRRIGATION WORK, DITCHES,  
ETC.—\$15,000. Modesto, Stanislaus Co.,  
Cal. Engineer, District Engineer, Mo-  
desto. Owners, Modesto Irrigation  
District. At a meeting of the directors  
of the Modesto Irrigation District,  
final steps towards the construction of  
the proposed Curtis Drain Ditch were  
taken, these involving one condemna-  
tion proceedings for a right-of-way  
and the advertising of bids on the  
work. The ditch, according to plans  
already prepared by the District En-  
gineer, will drain the low land in the  
northwestern section of the district  
and is estimated to cost from \$10,000  
to \$12,000. Secretary Abbott was in-  
structed to advertise also for bids for  
the extension of the Sproul drain ditch  
to connect with the main drainage  
canal, this work costing about \$2,500.  
Plans for the work, together with  
specifications and full information may  
be had from the Secretary of the Dis-  
trict at Modesto. Bids will be opened  
on December 29th.

WATER WORKS PLANT AND  
EQUIPMENT—Cost not stated. Reed-  
ley, Fresno Co., Cal. Engineer, City  
Engineer, Reedley. Owners, City of  
Reedley. Bids submitted to the Trus-  
tees for the construction of a build-  
ing and the installation of an auxiliary  
plant for the city water works have  
been rejected. The matter of doing  
the work under the Day Labor system  
is now under consideration.

BRIDGE—Reinforced concrete. Cost  
not stated. Fresno, Fresno Co., Cal.  
Engineer, City Engineer, Fresno. Own-  
ers, City of Fresno. Bids are now be-  
ing taken for a reinforced concrete  
bridge to be constructed over Dry  
Creek on Van Ness avenue. Plans and  
specifications can be secured from the  
City Engineer's office at Fresno. Bids  
will be opened on December 21st.

BRIDGE—Steel and reinforced con-  
crete. Cost not stated. Bakersfield,  
Kern Co., Cal. Engineer, State High-  
way Commission, associated with  
County Surveyor, Bakersfield. Owners,  
Kern County. The State Highway  
Commission has been authorized by the  
Supervisors to construct a bridge over  
Beardsley Canal. The county will pay  
for the work. With the materials of  
the ground, the State Highway Com-  
mission can build the bridge cheaper  
than any other contractor. The Coun-  
ty Surveyor at Bakersfield has plans  
prepared for a 90-foot reinforced con-  
crete bridge to be constructed over  
Poso Creek at Famosa. Bids on this

RAILROAD CONSTRUCTION AND  
SUPPLIES—Cost not stated. Dinuba,  
Tulare Co., Cal. Engineer, none. Own-  
ers, Mineral King Orchard Co., Dinuba.  
The Mineral King Orchard Compan-  
y will purchase equipment, consisting of  
railway and transfer cars to be used  
in handling the fruit crops for the  
year 1915. The trucks for several  
miles will be laid and will be of heavy  
steel and ties. These will be the first  
steel tracks laid in this county.

RESIDENCE—2 story and bas-  
ement and plaster, \$15,000. Fresno,  
Fresno Co., Cal. Architects, Bowen &  
Davis, Fresno. Owner, I. Teilmann. The  
dwelling will be erected on Kearny  
Boulevard and has been designed for  
an eleven-room house with four bath  
and sleeping porch. Interior finish will  
be of pine and hardwood with wood

white enamel in the bed room. There will be hardwood floors in the living room, dining room, library and reception hall. Plans provide for furnace heat and open fire places. Mantle will be of tile or brick. Bath rooms will be finished in tile. A hot water system will also be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCE**—A 1 1/2-story and base, frame, \$5,000. Fresno, Fresno Co., Cal. Architects, Bowen & Davis, Fresno. Owner, Lou Smith. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal bath. Plans are now being prepared.

**NORMAL SCHOOL**—1 and 2 story and base, brick and steel, \$370,000. Fresno, Fresno Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans for the \$370,000 State Normal School to be constructed at Fresno have been completed and approved by the State Engineering Advisory Board at Sacramento. Bids will be called for shortly and it is hoped that a contract can be let early in January.

**BRIDGES, CULVERTS AND HEAD WALLS**—Concrete and timber. Cost not stated. Bakersfield, Kern Co., Cal. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Plans are complete for the construction of several timber bridges, concrete culverts and a reinforced concrete head wall in Division No. 5 of Section No. 1, Kern County. Plans and specifications can be secured from the County Surveyor at Bakersfield. Bids will be opened on January 9th.

**FLATS**—story and base, frame, \$7,500. Fresno, Fresno Co., Cal. Architects, Bowen & Davis, Fresno. Owner, Robert Cutten. The building will be erected on Tulare street and has been designed to contain four modern flats of five rooms each. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being pre-

**SACRAMENTO, STOCKTON AND  
NORTHERN CALIFORNIA.**

**MUNICIPAL LIGHTING SYSTEM**—Cost not stated. Auburn, Placer Co., Cal. Engineer, City Engineer, Auburn. Owners, City of Auburn. Preliminary plans for a municipal system to be constructed and operated by the City of Auburn are now under contemplation by the City Trustees. The matter will come up for discussion at the January meeting of the Board. It is proposed to call a bond election to vote the necessary bonds to cover cost of construction.

tion. Forthwith the same will be made  
of this work when it shall be  
rendered.

MUNICIPAL SANITATION SYSTEM. The city of Stockton, Stockton, Cal., Engineer, of E. G. Gorn, Ky., is a franchised association with CITY ENGINEER, STOCKTON, CALIFORNIA CITY OF STOCKTON, ENGINEER, E. G. Gorn, Ky., who is the consulting engineer in the preparation of plans for the Stockton new sewer system, reports that the plans are now well under way and will be ready for approval in about two weeks. A bond issue will be voted in the near future to raise funds for the construction of the system.

**SEWER WORK**—Cost not stated. Lodi, San Joaquin Co., Cal., Engineer, City Engineer, Lodi, Owners, City of Lodi. Rights-of-way for water and sewer mains across two blocks in the Barnhart Tract to serve the residents between Central avenue and Tokay street in the southern part of this city have all been secured. Plans for this work will be prepared by the City Engineer, and on completion of the plans bids will be called for.

**IRRIGATION PROJECT**—\$25,000,000. Red Bluff, Tehama Co., Cal. Engineer, State Engineer, W. F. McClure, Sacramento owners, Sacramento Valley Irrigation Project. The project for the construction of a huge storage dam across the Sacramento River above Red Bluff for the use of the water from the upper Sacramento River for irrigation rather than navigation, has as its main feature the construction of a gigantic irrigation project for the Sacramento Valley, which will distribute water to approximately 888,000 acres. The cost will be about \$25,000,000, according to State Engineer W. F. McClure, a member of the special board of engineers appointed by Secretary of the Interior Lane to investigate irrigation in the Sacramento Valley. The members of the Board of Engineers who made a report suggesting the great irrigation project are: Wm. L. Marshall, Consulting Engineer to the Secretary of the Interior; D. C. Henny, Acting Chief Engineer of the United States Reclamation Service, Wm. F. McClure, State Engineer, and H. T. Corey, engineer of the Iron Canyon Project.

**WATER MAIN EXTENSIONS**—\$6,000. Stockton, San Joaquin Co., Cal. Engineer, City Engineer Bazzellotti, Stockton. Owners, City of Stockton. At the regular meeting of the Board of Trustees Superintendent Henning submitted estimates of the cost of installing cast iron water mains into the Cordier Tract and the Western Addition, recommending that the same be constructed in time for water service in the spring. The estimates are as follows: Pleasant avenue to Hutchings street, 320 feet of six-inch pipe, \$1,125; west of Hutchings, 600 feet of six-inch pipe, and 610 feet of four-inch at \$7, 676. Total, \$3,795. No action was taken, but it was the sense of the board that a meeting will be called within a short time, when this and other proposed extensions will be threshed out. Engineer Bazzellotti submitted an estimate of \$1,777 for a ten-inch storm sewer for West P. street.

ELECTRO-TECHS. Cost not stated.  
Chicago, Battie Co., Chgo. Engineer, none  
owners, CHV of Chgo. The next meet-  
ing of the Development Board will be

The new building, which is being constructed on the site of the old one, will be a two-story structure, with a total area of 10,000 sq. ft. The new building will be equipped with modern plumbing, heating, ventilation, and air conditioning. It will also have a large reception hall, a lounge, and a dining room. The building will be completed by the end of the year.

LOS ANGELES AND SOUTHERN  
CALIFORNIA.

COLD STORAGE PLANT—6 story  
and base, reinforced concrete, \$250,000.  
Los Angeles, Cal. Architect's name not  
given. Owners, Pacific Coast Beef and  
Provision Co., 1000 Lyon street, L. A.  
The building will be erected on Lyon  
street, covering an area of 110 by 140  
feet. Construction will be fireproof.  
Only preliminary sketches have been  
prepared and complete details will not  
be available for some time. Further  
mention will be made of this work.

SCHOOLS—2, 1 and 2 story and base,  
hollow tile. Cost not stated. Calceico  
Imperial Co., Cal. Architects, Allison  
& Allison, Hibernian Bldg., L. A. Own-  
ers, City of Calceico. Plans for two  
new buildings have been completed  
and figures will be taken beginning  
December 22nd. The two-story build-  
ing will cover an area of 178 by 61  
feet and the one-story structure 145  
by 75 feet. Interiors will be finished  
in pine with maple floors in the class  
rooms. Plans provide for modern  
school plumbing, ventilating system  
and program clocks. Exteriors will be  
faced with cement plaster. Plans can  
be secured from the architects after  
the date above mentioned. Bids will  
be opened on January 5th.

## Contracts Awarded.

RESIDENCE—2 story and base,  
frame, \$15,000. Los Angeles, Cal. Ar-  
chitects, Milwaukee Building Co.,  
Wright and Callender Bldg., L. A.  
Owner, Eugene F. Kline. Contractors,  
Milwaukee Building Co., Wright and  
Callender Bldg., L. A. Contract price,  
\$15,000.

Ana, Orange Co., Cal. Engineer, Coun-  
ty Surveyor. Santa Ana, Orange  
County Contractors, Keene &  
Norton, Santa Ana. Contract price,  
\$16,123.57.

## SEATTLE AND WASHINGTON

COURT HOUSE—2 story and base,  
Class A construction, \$100,000. Dec-  
ember, Powell Co., Mont. Architects,  
Clark & Harte, Billings, Mont. Own-  
ers, Powell County. Only preliminary  
plans have been prepared and details  
cannot be given at this time. The  
building will be fireproof throughout  
and will contain offices for all county  
clerks, court room and county jail.  
Exterior will probably be faced with  
granite. Working drawings will be  
completed as soon as bonds can be sold.  
Further mention will be made of the  
work.

## CHRISTMAS FIRE DANGERS.

## By National Board of Fire Underwriters

Two of our holidays, the Fourth of  
July and Christmas, are usually at-  
tended with serious accidents and fires.  
On Independence Day especially in the  
past, vast quantities of fireworks and  
explosives were used by children.  
Serious accidents and numerous fires  
resulted from this indiscriminate use.  
Accordingly a movement for a safe and  
same Independence Day was inaugu-  
rated, which has made splendid progress.  
The result is that fatal and non-fatal  
accidents and fires on that day have  
greatly decreased.

The use of Christmas trees with their  
inflammable decorations, and some of  
the other observances of Christmas  
have been productive of serious damage  
and loss of life. This has led to a  
movement for a safer Christmas day  
which is rapidly spreading, and bids  
fair to accomplish splendid results.

In furtherance of this movement the  
following from **Safety Engineering** is  
of present interest, and should be care-  
fully read and its admonitions observed  
in every home.

## CHRISTMAS DANGERS.

The records of fire departments  
show every year losses of life and prop-  
erty by fires resulting from carelessness  
during the Christmas holidays. In the  
effort to prevent such losses of life  
and property individual co-operation is  
needed by officials charged with legal  
responsibility.

To secure such individual co-opera-  
tion the following suggestions are di-  
rected to the man who is not actually  
interested in fire prevention, but who  
is sensible enough to understand that  
he can help materially in The Fight  
Against Fire.

In schools, halls, churches or where-  
ever children or grown-ups gather,  
unusual precautions should be taken.  
Exits should be marked with red lights  
and kept free and clear. Sheet tin or  
sheet zinc should be placed under  
every Christmas tree to catch candle  
drippings. Sand, water or fire ex-  
tinguishers should be kept in the most  
convenient places for instant use.  
Every Santa Claus costume should be  
dipped in a solution of four ounces of  
phosphate of ammonia to a quart of  
water.

In private homes cotton batting  
should not be used. The dry Christ-  
mas tree is bad enough. Watch candles  
carefully. Several basins or pails  
should be filled with water and kept in  
the kitchen. If a person's clothing  
catches fire the very first thing to do  
is to throw that person down; this  
changes the direction of the flame and  
saves eyes, ears, face and lungs. Then  
smother the flame with a rug, blanket,  
carpet, coat or anything that may be  
handy. If your own clothing takes fire  
lie down and roll around while ex-  
tinguishing the flames. To breathe fire,  
even invisible flame, is nearly always  
fatal because the heat shrivels up the  
lungs.

In stores and all sorts of retail  
establishments, the greatest care must  
be exercised. Many department stores  
have been destroyed and many persons  
killed to death because of some seem-  
ingly unimportant error of judgment.

**E. H. Williams**      **Chalmer Munday**

Attorneys-at-Law

Special Attention Given to Building  
Law and Bankruptcy Cases

Telephone Sutter 2622

615 Phelan Building,      San Francisco

All electric wiring should be done or examined by some competent person. Temporary wiring is generally faulty. Gas lights should be protected by a globe, chimney, screen or smoke bells, and all muslin, cambric, curtains or other combustible materials should be kept at least 24 inches away from such flame. Swinging gas brackets should never be used. Do not decorate electric light bulbs with paper petticoats—the heat is enough to set fire to paper. Ventilate show windows. Keep exits clear. Keep fire extinguishers handy. Insist upon "No Smoking." Fire is a useful servant, but a terrible master.

**LOW BIDDER OF ROSTRUM IS WITHIN AMOUNT AVAILABLE.**

**R. Ehrhart Will Build New Rostrum in National Cemetery at Presidio. More Government Work Shortly.**

Bids opened by the Constructing Quartermaster at Fort Mason for constructing a rostrum in the National Cemetery at the Presidio of San Francisco show R. Ehrhart low at \$5,532. His bid was the only one received which was within the amount allotted by Congress. This figure does not include a proposed toilet room.

F. Szoke of San Francisco has been awarded a contract at \$315 for constructing a three-inch water main at Fort Miley.

A number of new government jobs will shortly be out for figures plans office of the Constructing Quartermaster at Fort Mason.

**COMPLAINT OF SEWER.**

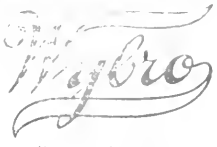

The Balboa Improvement Club and residents in the vicinity of Mission street, between San Jose and Ocean avenues, have called attention of the Board of Supervisors to the unfinished condition of the Ishas Creek sewer. They ask the Board to remedy the nuisance as soon as possible.

**HORSEPOWER HOILER.**

Angele Fappiano, 81 Greenwich St., has filed application with the Supervisors for a permit to install and maintain a 2-horse power hoiler at 815 Greenwich street, to be used for heating hot water.

**CLUB PLANS APPROVED.**

Plans and specifications for the Alchitect G. Albert Lanchester, with the Bureau of Building Inspection of the Board of Public Works, for a three-story and basement brick addition to

Veneered Panels of  
unexcelled quality  
Sold only at

5th and Brannan Streets      San Francisco

the present construction of the harbor on the southern corner of the city. The addition will cost about \$1,000,000. The total cost of the harbor will be about \$1,500,000.

**HAMBURG HARBOR.**

Some conception of the extent of the harbor may be obtained from the fact that it provides more than 2,000 linear feet of dockage, with about 50,000,000 square feet of space for unloading. These docks are, however, used for package freight only, the bulk cargoes being unloaded at other quays directly into cars for transport to destination, or into elevators and storage warehouses, or into lighters for transportation by water route to inland factories. Two years ago an extension of these already large harbor facilities was decided upon and an expenditure authorized to cover another 10,000 linear feet of quay. In 1912 there were unloaded in Hamburg Harbor 18,000 vessels with an aggregate tonnage of 1,000,000—Pacific Mailer & Engineer.

**NEW POWER PLANT AND PRISON FOR PHILIPPINES.**

MANILA, Dec. 15, 1914. A \$2,000,000 company has been organized to build an electric power and light plant, and to erect an ice plant in connection therewith. The capital was furnished by Filipinos.

Vice Governor Martin has prepared the draft of a bill to be presented to the legislature providing for setting aside 1000 hectares (2,470 acres) of land and appropriating \$2,000,000 for an island prison, to take the place of United Prison, which it is proposed to abandon. Plans concerning the same are reported in the local correspondence.

**EXPOSITION NEWS NOTES.**

Three new exhibits are to be introduced by the United States at the Exposition in Manila. They are a model of the new harbor, a model of the new city, and a model of the new government.

The Great Northern Steamship Company has announced that it will open a line of steamships between San Francisco and Astoria. The line will consist of two ships, the Great Northern and the Northern. The Great Northern will leave San Francisco on January 17 and February 17, and the Northern will leave on January 27 and February 27. The ships will be commanded by Captain J. H. Smith and Captain J. H. Smith.

The Great Northern Steamship Company has announced that it will open a line of steamships between San Francisco and Astoria. The line will consist of two ships, the Great Northern and the Northern. The Great Northern will leave San Francisco on January 17 and February 17, and the Northern will leave on January 27 and February 27. The ships will be commanded by Captain J. H. Smith and Captain J. H. Smith.

White pine and yellow pine are the woods most used for boxes, and are sold at a price of about \$1.00 per cubic foot. The price of the wood is about \$1.00 per cubic foot.

**WANT SUPERVISORS TO ACCEPT CROOKER DONATION.**

To make a donation to the improvement of the city, the Board of Supervisors has accepted a donation of \$10,000 from the Crocker family. The donation is for the improvement of the city, and is to be used for the improvement of the city.

**AWARD CONTRACT FOR COURT HOUSE WORK.**

The Board of Supervisors has awarded a contract for the construction of the Court House to the firm of J. H. Smith and J. H. Smith. The contract is for the construction of the Court House, and is valued at \$10,000.

**U. S. METAL PRODUCTS CO. OF THE PACIFIC COAST, INDEPENDENT CONCERN.**

The U. S. Metal Products Co. of the Pacific Coast is an independent concern. It is a company that is engaged in the manufacture of metal products, and is located in San Francisco.

in the seven far Western states, has suffered considerable inconvenience through publication of the voluntary bankruptcy petition of the United States Metal Products Company of New York City, a Massachusetts corporation. The New York concern has no financial connection whatever with the California company, although it has handled some of the products of the United States Metal Products Company of New York under an agency arrangement.

Vice-President.

#### NEW PROCESS TO STRENGTHEN STEEL.

**Nobel Prize Winner Discovers Revolutionary Method for Improving Metal.**

CHICAGO—The discovery of a revolutionary method of treating steel, by which it is made several times the strength of the present product, was announced before the National Academy of Sciences recently by Prof. A. A. Michelson, winner two years ago of the Nobel prize for physical research work.

Professor Michelson said the new steel would revolutionize warfare by making fortifications as well as ammunition many times stronger than at present. The new steel would advance peaceful projects, he said, by permitting the erection of sky-scrapers to heights never yet undertaken, and the construction of greater suspension bridges.

Demonstrating, Professor Michelson took a bar of new steel and twisted it. Two kilograms of force, he said, were used. He laid the bar aside and in a few minutes repeated the twisting. Instead of breaking, the bar withstood an application of three kilograms of power. Four times the experiment was repeated and each time a greater application of force was withstood.

Professor Michelson said the process might be carried on until steel appliances might be made that would be practically indestructible.

#### CURIOUS STREET NAMES.

There are some curious street names in London, such as Beer lane, Pickle Herring Street, Shoulder of Mutton alley, Hot Water court and Tiger bay. But there was a time when London possessed a far wider collection of capricious thoroughfares than is now the case. King Edward street, the site of the general post office, was for centuries known as Stinking lane. Crackbrain court and Cutthroat lane were in Whitechapel, and Dead Man's place adjoined Dirty lane in Southwark. Hangman's Gains stood near the Tower, and there was a Bandyleg alley off Fleet street. Crackneck court, opposite the Old Bailey, where goldsmith lived when he first settled in London, has also disappeared. Pall Mall Gazette.

#### PLANS TO IMPROVE RIVER.

WASHINGTON—Republican Representative Ricketts has introduced a bill

appropriating \$140,000 for the improvement of the Sacramento and Feather rivers above Sacramento to Red Bluff.

#### RECORD YEAR FOR SHIP BUILDING

NEW YORK.—During the last fiscal year there were added to the shipping of the world 713 new vessels with a gross tonnage of 2,020,185, according to the annual report of Lloyd's register of shipping, made public here. This is said to be the highest total for any one year recorded in the history of the society.

About 60 per cent of the total was for the British Empire, the remainder divided among other countries. The period covered by the report ended June 30 last.

#### MILL TAILINGS FOR ROAD METAL.

In Missouri a considerable amount of road material is obtained from the tailings of the concentrating mills at the Zinc mines. This material, which is put on the market as "chats," consists of small angular fragments of chert and limestone. The zinc companies are very glad to get rid of this waste material, which is loaded on the cars by the railroads of the district at a cost of about 6 or 8 cents a ton. It makes more than ordinarily good roads and is widely distributed all through the Middle West. It sells in most places at prices ranging from 50 cents to \$1 a ton, but in the neighborhood of the mines it can be had for about 15 cents a ton. It is used for railroad ballast as well as road making. The annual output, according to the United States Geological Survey, amounts to about 1,300,000 tons.

In Tennessee and Alabama a quantity of chert is used for road metal, and in many States crushed slag from blast furnaces also furnishes a valuable road material. In Alabama, one of the large iron-producing States, over 2,000,000 short tons of furnace slag, the average value of which was about 25 cents a ton, was crushed and put on the roads last year. Crushed slag is also used as railroad ballast and for concrete and roofing material.

#### RUTILE DEPOSITS YIELD TITANIUM

Rutile, from which is derived the metal titanium, is a reddish, brownish, or nearly black mineral composed of titanium dioxide, and though it is widely spread through the rocks it is rarely found in large quantities. Titanium exists in larger quantity in the earth's crust than copper, lead, zinc, or any of the common metals except iron, but it is called one of the rare metals because of the lack of concentrated deposits and because the metal is so difficult to separate that it has been seen by few people.

The value of rutile arises from the use of titanium as a scavenger in molten steel and cast iron, and from the use of titanium salts in dyeing textiles and in tanning leather. The largest known deposits of rutile are at Roseland, Nelson County, Va. A few other much smaller deposits have been found in the eastern part of the United States, and still other deposits, also much smaller than those in Virginia, have been found in foreign countries. Dr. Thomas L. Watson, State Geologist of Virginia, has described all the known deposits, laying stress on

those in the United States, in Bulletin 580-O of the United States Geological Survey. The bulletin may be obtained free of charge by applying to the Director, United States Geological Survey, Washington, D. C.

#### ELECTRIC DEPARTMENT WANTS OFFICE ROOM.

Jas. M. Barry, Chief Electrician of the Department of Electricity, has communicated with the Supervisors asking that a portion of the Civic Center Service building be turned over to his department for office purposes. Barry states that this can be accomplished without great expense.

#### WHY OPTIMISM?

Extracts from Address by Geo. Otis Smith, Director, United States Geological Survey, American Mining Congress, December 8, Phoenix, Ariz.

Europe's war finds its echo in America's industry. What contrast could be greater; on the one shore of the Atlantic all activity seemingly destructive in purpose; on the other shore, every energy directed along constructive lines; absolute waste of life and property as opposed to production of wealth and betterment of life.

Even though it is at a distance that we view the terrible disaster that threatens the whole continent of Europe, optimism seems a lost art. Yet sooner or later this epoch of catastrophe must be followed by a period of repair, and the longer this period is delayed the greater will be the needs involved in the reconstruction and replacement. Where war has torn down at terrific speed, peace must build up slowly.

The interruption of international trade stopped our exports of cotton and copper and our imports of dye-stuffs and potash, whereby several important industries were well nigh paralyzed. Yet startling as has been this disturbance of the whole balance of industry, certain fundamental facts and laws remain for us to build upon and indeed the lower course of foundation stones for optimism has already been laid.

Evidence of business betterment is before us on every hand, and the reasons for optimism are many. The United States farmer has harvested a five billion dollar crop and there is a high price market for all our surplus food stuffs; already our grain is pouring across the Atlantic. The millions of men who are fighting are not working, and yet these hordes of soldiers must be clothed and equipped as well as fed. Foreign orders have started factory operations which at once tends to relieve the stagnation in the steam-iron trade, the steel situation has turned from serious depression to rapid improvement, and the whole mineral industry may soon expect to share in this general business improvement.

Today the financial horizon is so cloudless that the prophets of bad weather have little upon which to base their predictions. The new federal banking system makes the money reserves mobile as never before, and extension of credit is now possible, without the veto power remaining in the hand of a small group of big men. Still another reason for belief in bust-

ness betterment is the recognition now becoming widespread, of the general interdependence of big business and the general public. On the one side, the people are realizing that they are and have been in reality the silent partner in big business, and now that there has come the promise of some regulation that will in large part prevent monopolistic centralization, the people are interested in getting their share of returns that can come only with operation at a profit. On the other hand, the managers of the large corporations, the trustees of the investing public, are beginning to see that a certain financial security goes with public confidence, and that the attitude to the public so tersely expressed 30 years ago by a pioneer in railroad financing does not pay dividends today.

Of course optimism is apt to go to extremes. Already we are hearing such expressions as "trade boom," or "opportunity unparalleled in history" and "avalanche of prosperity," and even hardheaded business men are quoted as thus characterizing the present situation. All this kind of talk indicates that a period of overstimulation may threaten us, a condition that is somewhat symptomatic of the American temperament. The four months' record, however, can be summarized thus: While European countries have been mobilizing their armies and calling to the field of battle their reserves of soldiers, America has mobilized its credit and begun to send forward to the market place its vast reserves of food-stuffs and mineral products.

Secretary Redfield recognizes three periods of business condition as naturally following the declaration of war on August 1 last—those of shock, stimulation and readjustment. These three must be expected to affect in the same order all branches of American business, though the transition from one period to the next may not be simultaneous in all branches. Thus for several weeks after war was declared, the exportation of wheat felt the shock and thousands of carloads accumulated at Eastern ports. With cotton the period of shock has been longer, but stimulation of export has now begun. With copper the resumption of sales to Europe seems slow in coming, but come it must, for in the modern world, whether at war or at peace, the red metal is a necessary of life.

As we look toward the south we find that our commerce with South America for the last four years has been onerous to the extent of an unfavorable annual trade balance averaging more than 60 millions of dollars. The fact that the balance of trade is against the United States in two of the three "A B C" countries should be taken only as an invitation to export more, and that so millions suggests the chance for further development of trade relations. We need meat and hides from Argentina, tin ore from Bolivia, rubber and coffee from Brazil and Venezuela, nitrate from Chile, platinum from Colombia, cacao from Ecuador, wood from Peru and Uruguay. What can we export in exchange?

To increase industrial prosperity this country needs to export finished rather than crude products and to import raw materials rather than manufactures.

Betterment of industrial condition can come best through expansion of manufacturing. The increase of the element of labor in the product exported will mean that we are not bartering away our heritage of natural resources but rather that we are using these resources as a basis simply for the expenditure of labor which renews itself.

Coming down to bottom facts, the United States will profit by the European war only as the nation makes larger and wiser use of its mineral resources. Foreign markets in the main can be won and held only as the quantity or quality of the "Made in America" product rivals that of the goods offered by the other producing nations. The buyer, whether he be in the Far East or in South America, wants the most and the best for his money. Yet it would seem a safe rule of national conduct that industry should begin at home, and therefore every industrial opportunity in America should be improved. If these opportunities are recognized and grasped every one of us can indulge in optimism.

### FOREST NOTES.

The timber industry represents 37 per cent of the annual production of wealth in British Columbia.

Boxmakers in the United States use more than four and a half billion board feet of lumber each year or more than one-tenth of the entire lumber cut of the country.

In addition to his own fire detection system, the supervisor of the Palisade national forest, Idaho, was notified of each fire by from five to ten different local settlers, who thus showed their co-operation in working for fire suppression.

### UNIQUE ENGINEERING FEAT.

When railroad building was undertaken in Alaska following the discovery of gold a unique engineering feat was performed. At a point eighty miles out of Skagway the survey had been made for the road along the shore of a lake, but it was found to be so irregular and broken by so many coves that the plan was adopted of getting a better line by lowering the level of the lake. This was done by cutting an outlet channel, through which fourteen feet of the lake drained off. But presently the new channel, having been cut through a sandy hill, gave way, and the escaping lake water wore an enormous canyon through the country and reduced the lake level again over seventy feet. A line, level roadbed was secured over what was formerly the bed of the lake.—Argonaut.

### BANGKOK MUNICIPAL POWER STATION.

[Vice Consul General Carl C. Hansen, Bangkok, Siam, Aug. 1.]

The recently completed power station for the city of Bangkok is built entirely of brick and reinforced concrete and measures 123 by 135 feet. It is divided into compartments for turbines, boiler, turbines and switches, accumulators, etc.

Owing to the limited space and the

lack of room for the installation of this power station, the city of Bangkok was forced to build the power station in a very small space. The station is built on a hill, and the water is pumped up to the station by a pump. The station is built on a hill, and the water is pumped up to the station by a pump. The station is built on a hill, and the water is pumped up to the station by a pump.

### Mechanical Stoking, Boiler Installation.

The method adopted for feeding the boiler furnaces from the bunkers consists of a simple arrangement of mechanically controlled shutters, which by the hush may be readily regulated as the demands for steam arise. The hush store is a building 10 feet long and 6 feet wide, constructed of concrete pillars and brick walls between. The capacity of this store is equivalent to one month's requirements of paddy hush, while the bunkers hold a quantity sufficient for two weeks' demands at full load.

Barcock & Wilcox boilers have been installed. There are 16 steam drums, together comprising four batteries of boilers, each independent of the other. While paddy hush is the primary fuel, liquid fuel, coal, or firewood can also be used. Liquid fuel will also be stored overhead, but only for use in the event of paddy hush giving out.

Superheated steam will be used entirely for the steam turbines, the boiler pressure being 200 pounds to the square inch. They have been tested up to 100 pounds. The heating surface of each battery of boilers is 6,480 square feet, while the heating surface of the superheater is 2,280 square feet. One boiler will always be kept for liquid fuel. The chimney in connection with the boilers is of steel, and one of the highest in Bangkok, being 162 feet from ground level and 8 feet in diameter.

### Station in Three Sections, Automatic Switchboard.

One object aimed at in designing the station was to have one bank of boilers, one turbine, and one condenser complete, so that if the station were divided into three sections each would work independently of the other. The parts of each section are interchangeable, thus rendering it necessary to keep only one set of spare parts.

There are three 1,200-kilowatt turbines of the multi-stage Curtis type. The plant includes the latest type of boiler feed pump driven by a small Curtis turbine and capable of delivering water against a boiler pressure of 200 pounds to the square inch. The condenser room, under the three turbines, is below the river level. The pumps here are driven by a small steam turbine.

The switchboard is of the latest type, in action, and includes a governor device for regulating the speed of the turbines, keeping it steady. The switchboard is of the latest type, in action, and includes a governor device for regulating the speed of the turbines, keeping it steady. The switchboard is of the latest type, in action, and includes a governor device for regulating the speed of the turbines, keeping it steady.

panel in the switchboard.

#### Station Provides Light and Power to Large Area.

A feature of the switchboard is the lightning resistors, which relieve the very high pressure caused by a flash of lightning striking the overhead wires and thus protect the generators from damage. Each generator has an instrument for registering the number of units, so that the output of the station may be calculated exactly, and also for indicating any leakage and on what part of the line. A large Tudor battery has been installed with a capacity of 2,600 amperes in 5 hours. There are 110 cells in the battery.

This station provides lighting for a large area occupied by royal palaces and residences for Siamese nobles. The motive power for operating the machinery of the Bangkok waterworks and the opium factory is also supplied by this plant.

#### HIG STEEL ORDER.

An order for 63,150 tons of 90-lb. steel rails has been placed by the Santa Fe with the Colorado Fuel and Iron Company. Of this allotment 23,000 tons are for the eastern lines, 25,000 for the western lines, 7,600 for the coast lines, and 6,950 for the gulf lines.

#### SELECT LOCAL ENGINEERS.

SANTA BARBARA, Santa Barbara Co., Cal.—On the recommendation of the County Highway Commission, the Board of Supervisors of Santa Barbara County have engaged the engineering firm of Haviland & Tibbetts, Alaska Commercial Bldg., S. F., as highway engineers, the basis of remuneration to be percentage.

The highway commission is composed of George M. Williams, Hope; Hugh Kelly, Santa Maria, and W. A. Lewis of Lompoc; the secretary of the commission is Frank Kellogg.

#### CLAY PRODUCTS CONFERENCE.

CORVALLIS, Oregon.—A conference of brick, tile and other clay workers of Oregon is to be held in Corvallis the early part of February, 1915.

#### NEW TRADE PUBLICATION FOR LOS ANGELES.

The "Oil and Mining Bulletin," a monthly publication devoted to the up-building of the oil and mining interests of the southwest has made its appearance in Los Angeles. The book is edited by J. Nelson Nevius under the auspices of the Chamber of Mines and Oil of Los Angeles. A copy of the Bulletin may be seen at the office of the "Engineering News."

#### USES OF TUNGSTEN.

Tungsten is used principally as an alloy of high-speed steel—that is, steel used in making tools used in metal-turning lathes running at high speed—to which it imparts the property of holding temper at higher temperature than carbon steels will, according to the United States Geological Survey. The now well-known cutting tungsten is used for incandescent lamps, which are fast displacing carbon lamps. Recently 2,000,000 incandescent lamps, in

which the wire is wound in helices and in which the globes are filled with nitrogen, have produced a close approach to white light. These lamps are furnished in candle powers up to 2,000. Ductile tungsten is practically insoluble in all the common acids; its melting point is higher than that of any other metal, its tensile strength exceeds that of iron and nickel, it is paramagnetic, it can be drawn to smaller sizes than any other metal (0.0002 inch in diameter), and its specific gravity is 70 per cent higher than that of lead.

## Editorial Comment.

The table of figures published by the American Contractor shows an aggregate decrease for the month of about 20 per cent compared to the same month last year, which is almost exactly the same relation that existed last month. It is something less than the decrease for September, but whether or not there is a reaction since that time can no be determined. In any event the cause is country wide for the same condition exists everywhere. The tabulation is given herewith:

City	November, 1911.	November, 1913.

Nobody seems to know why the Chief of the Fire Department was fired. There is certainly no just cause for it, as the general consensus of opinion is that Murphy was one of the most efficient officers. Meanwhile Ex-Mayor Schmitz has announced his candidacy for mayor on the appeal to "bring the good old times back again," and the present city administration leaves much to be desired. When can we elect a mayor and a government that is above petty and cheap politics?

The advance in freight rates allowed by the Interstate Commerce Commission has called forth varying comments from the newspapers. And they vary in tone from the positive approval of the Railroad organs to positive disapproval of those opposed. No doubt the Interstate Commerce Commission has acted according to the best interests of the country from the facts before it for consideration and it probably has a better view of the situation than most of the editors.

[illegible]

## Lumber Market of the Territory of Hawaii.

The eight islands in the Territory of Hawaii, usually referred to as the Hawaiian Islands, while part of the United States, are commonly considered as a foreign market by the lumbermen of the Pacific coast, since the lumber shipped to the several ports is of the same export grade as that consigned to the ports of other nations. Only four of the eight islands are of commercial importance, namely, Oahu, Hawaii, Maui and Kauai. The remaining islands—Molokai, Lanai, Niihau and Kahoolawe—do not now require much lumber and are not likely to within the next ten years. The chief industry of the last three is sheep raising.

Probably the comparatively short distance that separates the group from the United States—approximately 2,100 miles from San Francisco, Cal., and 2,400 miles from Seattle, Wash., in contrast to the 4,800 miles from Manila, P. I., or 3,450 miles from Yokohama, Japan, the next nearest source of lumber supply, though the latter is admittedly of a different character—the Hawaiian Islands always have depended and will probably continue to depend upon the mainland for its lumber demands. None of the islands has sufficient timber to meet its own needs, even were the timber that is available best adapted to the uses to which it must be put. The forests are principally of the hardwood type and they are of more value as a protection to the watersheds of the islands than for lumber. The Territorial government, recognizing this fact, has set aside forest reserves aggregating 690,000 acres, of which about 67 per cent is government land. The problem of fuel, particularly in the case of settlements and plantations some distance from a seaport, is a serious one, since both wood and oil must be shipped in. In an effort to solve the fuel problem, the experiment is being made of planting eucalyptus (*glabulus* and *robustus*) for firewood.

### Sawmill Operations in Islands.

Only one sawmill is in operation in the Territory. The mill is that of the Hawaii Hardwood Co. (Ltd.), at Pahoa, on the island of Hawaii. Here is cut a limited quantity of ohia, a dense hardwood, which is manufactured into railroad ties, vehicle stock, flooring, paving block, and lumber that is principally used for interior finishing purposes. The anomaly is presented of this mill's product in the shape of ties being shipped to the mainland for the Santa Fe Railway Co., while the Hilo Railroad Co., over which the ties are hauled from Pahoa to Hilo for shipment, imports redwood ties from California for its own line. Ohia flooring is quoted in Honolulu at \$80 per thousand feet board measure for 13-16 inch by 2 1/2-inch face, while 1 by 1 inch stock in lumber brings \$75 and 1 inch by 10 and 12 inch as high as \$85 per thousand feet.

One other species which is cut in limited quantities and which in a measure may be said to compete with lumber from the mainland is koa, another

dense hardwood, occasionally referred to as Hawaiian mahogany. This is an acacia, found chiefly on Hawaii and Maui. Natives cut the timber and find a market for the logs and gnarled pieces. It manufactured principally into furniture and takes a beautiful polish. It is also made into small articles sold as souvenirs.

The lumber imports show a total value for all lumber and lumber products for the year ended June 30, 1914, of \$1,383,322. This amount is smaller than for any one of the four preceding years. The shipments from the United States represent almost the total imports of lumber into Hawaii.

### Government a Big Consumer.

The United States Government, as represented by the War Department and the Navy Department, has been a heavy importer of lumber in recent years. The island of Oahu is being made the Pacific base for both the Army and the Navy, and the several services have nearly completed permanent quarters for 8,000 enlisted men. In the construction of fortifications and buildings of varied types many million feet of lumber have been used. All but a very small per cent of the lumber was bought under the specifications of one or the other department from the mills on the Pacific coast and most of it shipped to Honolulu by sailing vessels. The work planned by the Army is nearing completion. This branch has used steel and concrete to a large extent, and cement has even been used in the building of barracks and officers' quarters. It is possible that bids will be asked before the expiration of 1914 on lumber totaling \$100,000 in value. This will probably be the last big order for the use of the Army in Oahu. Construction work at the Pearl Harbor naval station, near Honolulu, is progressing, but the immediate or even prospective needs for lumber at the station can not be accurately determined. It is likely considerable lumber will be used annually for the next five years, especially in the building of houses for the officers, while unquestionably much lumber will be utilized in the reconstruction of the dry dock.

### Wood Best Building Material.

Wood is without question the best building material for use in the construction of homes in the Territory of Hawaii. The equable climate, with no extreme of heat or cold, and a prodigious rainfall in some sections, require a shelter not too heavy in construction and so arranged as to secure the maximum of sunlight and air. Shingles, it has been proved, make the most desirable roofing, though in some sections corrugated iron is used on the roofs in order that every drop of rain may be diverted into tanks and saved for future use.

### Douglas Fir Principally Used.

The lumber bought on Puget Sound is almost all Douglas fir, but is known in the Territory as Oregon pine and is sometimes called Northwestern pine, early all of it is No. 1 merchantable grade and is graded and sold under

the certificate of the Pacific Lumber Inspection Bureau. Small quantities of rough clears are also included in some of the orders. In unloading it is the custom to sort over the stock before putting it in pile and a small amount of select grade is secured from the No. 1 merchantable. \*A\* and clear red cedar shingles also are purchased, together with flooring, finish, and mill-work.

### Redwood and Other Species.

Redwood lumber is also bought on standard export grading. It forms about 10 per cent of the stock imported by two of the larger concerns in Honolulu. In addition to the rough lumber imported, quantities of redwood ties, poles, posts, and shingles are brought in, the poles and ties usually being in special orders. A base price on redwood is employed.

Very little California sugar or white pine lumber finds its way into the Territorial markets. Small stocks are carried by the leading yards in Honolulu to meet the call for special purposes, such as mill-work orders, pattern stock, or drain boards.

Hardwoods are used only to a limited extent. Only three species are imported—oak, ash and hickory. In lumber the grade bought is No. 1 common. Since the hardwoods are desired almost exclusively for the building of new or repairs to old vehicles, dimension stock is largely specified. Probably not more than 15 cars a year find a market in the islands. The lumber is sometimes shipped from the assembling points east of the Missouri River to San Francisco, but more often it is bought in the eastern markets and shipped from New York or Philadelphia by steamer in parcel lots.

### Large Lumber Consumers.

One of the largest of the individual consumers of lumber is the Oahu Railway & Land Co., which operates approximately 11 1/2 miles of railroad on the island of Oahu. The Koolau Railway, operating about 12 miles, is practically an extension of the Oahu Railroad. In Honolulu the company has a plant for building both passenger and freight cars of varied types (all narrow gauge) in operation. An estimate of the quantity used annually for building cars and in maintenance is given at 1,000,000 feet b. m.; this is practically all Douglas fir. Possibly 2,000 feet of ohia is used for finish. The railroad also uses approximately 25,000 ties a year. These are all redwood of standard size (6 by 8 by 8 inches). In explanation of using a standard-size tie on a narrow-gauge road, it has been found by experience that the mechanical life of the tie is much less than its resistance to decay, and by shifting the tie and cutting off a portion of one end and relaying it a financial saving is made. The Oahu Railroad operates its telegraph and telephone system over the pole line on its right of way owned by the Mutual Telephone Co. and therefore does not purchase poles. The company buys practically all of its lumber direct from manufacturers.

branch houses of San Francisco companies, and they relieve the buyer of all responsibility in purchasing lumber or other supplies.

As to credits, all of the concerns that import lumber in cargo lots for their yards in the islands have had such extensive dealings with the lumbermen on the Pacific coast that no serious questions arise as to terms or time of payment. Settlements are usually arranged for on the basis of payment on receipt of documents less 2 per cent for cash.

[Consular Reports of Commercial Agent Franklin H. Smith, Oct. 22.]

### INCORPORATIONS

Associated Merchants Credit Bureau. To conduct a general mercantile and collection agency. Capital Stock, \$25,000; 2500 shares at \$10 each; amount subscribed, \$50. Place of business, San Francisco. Directors—J. A. Buck Jr., E. J. Benjamin, W. J. Watson, J. C. Smith, W. H. Murphy, 1 share each.

American Brass Mfg. Co. General manufacturing and jobbing business. Capital Stock, \$25,000; 25,000 shares at \$1 each; amount subscribed, \$5. Place of business, San Francisco. Directors—L. H. Handy, M. A. Whittle, H. G. Johnston, W. L. Phillips, A. L. Studebaker, 1 share each.

Sampson Peak Mining Company. To mine and trade in magnesite and its products. Capital Stock, \$25,000; 2500 shares at \$10 each; amount subscribed, \$25,000. Place of business, San Francisco. Directors—H. Wrightson, 2498 shares; H. Fischel and F. C. Schernstein, 1 share each.

San Francisco Reduction Company. Cert. copy. To reduce and destroy garbage, rubbish, etc. Capital Stock, \$50,000; 500 shares at \$100 each; amount subscribed, \$500. Place of business, Los Angeles, Cal. Directors—C. D. Crouch, V. E. Crouch, J. W. Gridley, G. Hansen, G. Micon, 1 share each.

Western Alfalfa & Hog Company. To raise and deal in hogs, horses and cattle. Capital Stock, \$50,000; 100,000 share at 50c each; amount subscribed, \$50. Place of business, San Francisco. Directors—R. Atthowe, C. Rosenthal, J. A. Bondenson, A. S. Pare, N. J. Bess, 20 shares each.

Fairmont Hospital Corporation. To equip and maintain hospitals and sanitariums. Capital Stock, \$100,000; 10,000 shares at \$10 each; amount subscribed, \$500. Place of business, San Francisco. Directors—P. A. Bill, W. P. Read, W. A. Harvey, W. G. Harder and E. Williams, 10 shares each.

Surface Electric Railway Supply Company. To deal in patents and inventions, stocks, notes and its own commercial paper. Capital Stock, \$25,000; 25,000 shares at \$1 each; amount subscribed, \$5. Place of business, San Francisco. Directors—J. A. Wheeler, S. G. Mitchell, S. Joseph Thersien, 1 share each.

Seattle Brewing and Malting Co. Cert. Copy. To operate breweries and to manufacture beer and malt liquors products. Capital Stock, \$1,000,000; 10,000 shares at \$100 each; amount subscribed, \$100,000. Place of business, Seattle, Washington. Directors—Andrew Hemrich, 9996 shares; Wm. Hemrich, R. R. Spencer, A. H. Anderson, and John Mueller, 1 share each.

John Rapp & Son. Cert. Copy. To

conduct a general beer bottling business. Capital Stock, \$50,000; 500 shares at \$100 each; amount subscribed, \$500. Place of business, San Francisco. Directors—B. Rapp, A. Rapp, G. W. Brooks, John Rapp, J. G. Rapp, 1 share each.

Joseph Samuel, Inc. To deal in flowers, plants, trees, etc. Capital Stock, \$250,000; 2500 shares at \$10 each; amount subscribed, \$12,000. Place of business, San Francisco. Directors—J. Samuel, B. Samuel, R. Gordon, G. Gordon and H. Lesser.

"Pavo Real." Social to promote dancing. No capital stock. Place of business, San Francisco, 2 directors.

Gentry Investment Co. To act as hotel and inn keepers and to do a catering business. Capital Stock, \$25,000; 25,000 shares at \$1 each; amount subscribed, \$5. Place of business, San Francisco. Directors—F. R. Wasch, P. C. Bryant and E. Lyon, 1 share each.

Hendee Manufacturing Sales Company. Cert. Copy. To deal in motorcycles, automobiles and machines. Capital Stock, \$50,000; 500 shares at \$100 each; amount subscribed, \$50,000. Place of business, Springfield, Mass. Directors—G. M. Hendee, C. A. Earl, F. J. Westhler, 1 share each; Hendee Manufacturing Co., 197 shares.

Beating Back Film Corporation of California. To deal in moving pictures, films and appliances. Capital Stock, \$20,000; 200 shares at \$1 each; amount subscribed, \$500. Place of business, San Francisco. Directors—C. Deckelman, B. S. Cohen, J. R. Crone, L. Ferrari, A. Jacoby, 100 shares each.

Hampton Electric & Machine Co. To do a general machine manufacturing business. Capital Stock, \$25,000; 25,000 shares at \$1 each; amount subscribed, \$5. Place of business, San Francisco. Directors—C. J. Thelen, N. M. Lundstrom, E. J. Hampton, H. Merrick and L. Welch, 1 share each.

C. S. Clancy, Inc. To deal in automobiles and generally in mechanically propelled vehicles. Capital Stock, \$25,000; 25,000 shares at \$1 each; amount subscribed, \$12. Place of business, San Francisco. Directors—W. G. Deal, J. A. Cochrane, 1 share each; C. S. Clancy, 10 shares.

The Rose Development Company. To develop and exploit gold, silver and other lode or placer mines and deposits. Capital Stock, \$5000; 5000 shares at \$1 each; amount subscribed, \$50. Place of business, San Francisco. Directors—L. T. Ryono, A. C. Parsons, H. C. McConnell, R. Thayer, C. J. Parks, 10 shares each.

St. Luke's Hospital. Cert. Copy. To found and maintain a hospital. No Capital Stock. Place of business, San Francisco. Directors—J. G. Eastland, Wm. Babcock, J. Wignier, E. R. Taylor, C. P. S. Gibbs and Wm. Blanding.

Beating Back Film Corporation of California. To deal in moving pictures, films and appliances. Capital Stock, \$20,000; 200 shares at \$100 each; amount subscribed, \$500. Place of business, San Francisco. Directors—C. Deckelman, B. S. Cohen, J. R. Crone, L. Ferrari and A. Jacoby, 100 shares each.

Professional Chauffeurs' Holding Company. To further the interests of the professional chauffeur. No Capital Stock. An admission fee of \$21. Place of business, San Francisco, 7 directors. California Drivers' Company. To market and deal in automobiles and their parts. Capital Stock, \$200,000; 2000 shares at \$100 each; amount subscribed, \$20,000.

\$300. Place of business, San Francisco. Directors—J. H. Murphy, E. E. W. A. Lux, 1 share each.

Pacific Imperisho Casket Company. To manufacture caskets. Capital Stock, \$75,000; 750 shares at \$100 each; amount subscribed, \$500. Place of business, San Francisco. Directors—H. Bernay, R. H. Harvey, L. C. Hochschuch, L. Ferrari and A. Jacoby, 1 share each.

Japanese Amusement Concealment Company. General amusement business. Capital Stock, \$10,000; 10,000 shares at \$1 each; amount subscribed, \$3. Place of business, San Francisco. Directors—S. Sekigushi, G. C. Calo, J. E. Wooley, 1 share each.

Travel Company of America. To act as agents, factors and brokers. Capital Stock, \$15,000; 1500 shares at \$10 each; amount subscribed, \$15,000. Place of business, San Francisco. Directors—R. S. Hunter, 750 shares; S. J. Johnson, 600 shares; M. F. Garrigue, 150 shares.

### ENGINE HOUSE PLANS ORDER PREPARED.

The Board of Public Works has rected the Bureau of Architecture prepare plans and specifications for engine house in which will be located Engine No. 3, Chemical No. 6 Battery No. 1.

The building will be erected on north side of Post street just east Polk and will be modern through sleeping quarters and other details are in all firehouses throughout city will be provided for.

Construction will be of Class two stories in height and will cost the neighborhood of \$35,000.

### CO-PARTNERSHIP.

Harry William Knoll as L. P. Fisher Advertising Agency.

Clyde A. Auger as Auger Artistic Limb Co.

Nathaniel Bois as Bois Roll Screen Co.

T. C. Conmy, M. W. Shannon, W. Shannon as Shannon-Conmy Printing Co.

John W. Barnett as Oregon Cider Extract Company.

J. J. Seibert, C. R. Danziger "Seibert Co."

### DECREASE OF CAPITAL STOCK

Andes Silver Mining Company, decreased from \$250,000 of 1000 shares at 25c each to \$100,000 of 400 shares at \$1.00 each.

### AWARD ELECTRICAL CONTRACT

The General Electric Company has been awarded the contract for electric work in the Civic Center Plaza by the Board of Public Works on their bid of \$1529.

### NOTICE OF NON-RESPONSE

Dec. 16, 1911—N. SUTTER 3740 m or E Steiner E 70 m or 1 by N 70 m or 1. Emma Gates Butler as in improvements on leased property. Dec. 16, 1914—NO. 2915 BAKER, J. Meyer and M. Blackie, 100 shares, to improvements on leased property.

# ADVANCE NEWS

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 2 story and base, brick and steel. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Post street west of Hyde and has been designed for a high class of tenants. There will be 100 rooms arranged in suites of two and three rooms. All apartments will have wall beds and private baths. Interior will be finished in pine, redwood and blue gum. Hardwood floors will be used in the living and dining rooms. There will be a complete steel frame. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will be finished in tile. Marble and tile wainscot will be used in the entrance vestibule. Exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete and segregated figures will be taken at once.

**OAKLAND, CAL.**—Apartment house, 2 story and base, brick and steel, \$55,000. Architect, W. L. Schmoller, 166 Geary street, S. F. Owner, Joseph Meyer. The building will be erected on Alice street near 15th in the Lake Merritt District and will cover an area of 80 by 120 feet. There will be a total of thirty apartments of two, three and four rooms. The building will be built around a central patio. All suites will have wall beds and private bath rooms. Interior will be finished in curly redwood and burl redwood. Hardwood floors will be used in the principal rooms. There will be a large social room and roof garden. Bath rooms will have tile wainscot and floors. Plans provide for steam heat, an automatic elevator, electric dumb waiters and hot water supply. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

## BONDS.

**RED BLUFF, TEHAMA CO., CAL.**—An election held in this city to construct and complete a new water works system at a cost of \$85,000 has been defeated.

The vote was 282 in favor of the proposition and 528 against. The vote being just a little less than 10 per cent of the total registration of the city.

**COLUSA, COLUSA CO., CAL.**—The Supervisors have sold the \$100,000 county bridge bonds to the Anglo and London-Paris National Bank of San Francisco for \$57,735.54. Halsey & Co. bid par with \$1,557 premium and William Stuart & Company bid \$75,335. The issuance of these bonds was ordered at a special election held in Colusa County March 7, 1914.

**PUEBLO HIGH SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—Bonds in

the sum of \$60,000 for the construction of a new high school building in the Pueblo Union High School District were voted at a special election held recently. The bond carried by a large majority.

**YUBA CITY, YUTTER CO., CAL.**—The Capital National Bank of Sacramento has sold \$1,000 of the State Highway bonds on a 5 per cent basis for the Supervisors, which insures the construction of the State Highway in this county between Yuba City and Live Oak and on to the Butte County line.

**FAIRFIELD, SOLANO CO., CAL.**—The Supervisors of Solano County have sold \$50,000 worth of State Highway bonds held by the county to a San Francisco bank for \$46,645.50 and accrued interest.

The county still holds \$200,000 in highway bonds, \$100,000 of which will probably be offered for sale next year.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Arrangements are now being completed in this county for calling a special bond election for \$1,000,000. The bonds will be issued as follows:

\$500,000 or more to build 210 miles of good roads in Santa Barbara County.

\$250,000 to build bridges for the highway system, including \$50,000 for the La Cuesta bridge.

\$100,000 for a new county hospital.

\$15,000 for a new detention home.

It is thought that an election date will be set within ten days when the matter will come up before the people for a decision.

**NEWCASTLE, PLACER CO., CAL.**—At a special election held at Newcastle bonds in the sum of \$2,500 carried by a large majority. Although the voting was light, not a vote was cast against the proposition. Sixty-nine votes were cast in all.

The bonds will allow the town to proceed with the completion of its sewer system.

**WOODLAND, YOLO CO., CAL.**—The County Treasurer of Yolo County will sell 200 bonds of Reclamation District No. 900, with accrued interest, on December 21th. The bonds are in denominations of \$1,000 each and bear interest at the rate of 6 per cent per annum, payable semi-annually. Roy E. Cole is the County Treasurer.

**FAIR OAKS, SACRAMENTO CO., CAL.**—Negotiations are now under way for the sale of \$75,000 worth of school bonds to be used in the purchase of a site and the erection of a new school building. The site for the building is now being considered.

**MARYSVILLE, YUBA CO., CAL.**—A bond election for the purpose of raising funds of \$50,000 with which to beautify the city of Marysville will soon be held by the officers of Marysville. It is the intention of the officials of the city to place the lake, the city and the streets, sidewalks and sewers.

**CHATELAIN, SHASTA CO., CAL.**—A special bond election will be called during January or February of next year by the Anderson cottonwood irrigation district for the purpose of voting bonds in the sum of \$10,000 with which to raise funds for a large irrigation project for which plans have already been prepared. H. H. Henderson, Engineer in chief of the district, has submitted plans for the work to the Board of Directors of the district, who will approve and set a date for an election.

**CORNING, TEHAMA CO., CAL.**—Bonds in the sum of \$100,000 will be voted here next spring according to word received. The calling of the election to vote this sum is for the raising of the necessary funds for the extension of the sewer system. The election will be held on January 12th, according to an ordinance passed to print.

**CHATSWORTH SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—Bonds in the sum of \$11,000 for the erection of a new school building have been voted at an election held in the Chatsworth School District on December 8th. The trustees of the district will advertise for plans for the new building.

**CINAGA SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—The Supervisors will receive bids up to 2 p. m. December 28th, for the purchase of bonds in the sum of \$85,000. H. J. Leland is the County Clerk.

**HAWTHORNE SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—Bids will be received by the Supervisors for the purchase of bonds in the sum of \$45,000 on December 28th. The proceeds of the sale will be used in the construction of a new school building.

**MORNINGSIDE SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—Sealed proposals will be received by the Board of Supervisors for the purchase of \$55,000 in bonds on December 28th. The proceeds of the sale will go towards the erection of a school building for the district.

**VACAVILLE, SOLANO CO., CAL.**—The election held to decide the proposition to bond the town for \$100,000 for street improvements, carried.

The proposed street improvements had been divided into two propositions, the first provided for the improvement of Main street and the route of the State Highway through the town, costing for \$12,000, the other including the balance of Main street and the graveling of most of the residential streets costing for \$88,000.

**VADON ST., STANISLAUS CO., CAL.**—A bond election for \$100,000, \$75,000 and \$25,000 bonds issued during the recent session of \$100,000 by the Modesto Irrigation District was accepted yesterday. The bonds were sold at 100. The Modesto Irrigation District, Stanislaus County, California, has accepted the bonds for the district. The proceeds of the sale will be used for the improvement of the money market at this time. Pay-

ments, according to the bid, will be made as follows: February 15, 1915, \$50,000, and \$50,000 on the 15th of each month for the six months following.

This issue of bonds, amounting to \$610,000, was voted by the irrigators less than a year ago, the money being necessary for the permanent improvement of the upper works of the system.

**PORTLAND, ORE.**—Bids have been received by C. A. Bigelow, Commissioner of Finance, for the purchase of \$150,000 improvement bonds to bear interest at the rate of 6 per cent, payable semi-annually.

Bids were also received by Bigelow for another block of \$185,000 general improvement bonds in denominations not to exceed \$500. All bids are now being considered.

**SODA SPRINGS, IDAHO.**—A special election has been called for December 28th to vote on the issuance of \$15,000 bonds for the installation of a municipal lighting plant. J. F. Woodhall is chairman of the Town Board.

**SEATTLE, WASH.**—A conservative estimate of the County Engineer's office for new road and bridge improvements for King County is given as about \$1,000,000.

Bonds in this amount to provide for the work will be sold shortly after the first of the year, according to a resolution passed at a recent meeting of the Commissioners.

**BAKER, ORE.**—An election will be held in this city in the near future for the purpose of voting bonds in the sum of \$180,000, the proceeds of which are to be used in the construction of a municipal lighting plant.

Plans for the plant have already been designed by L. R. Stockman of Baker, but a question now prevails as to whether the people want such a modern plant. J. L. Stannard, consulting engineer in the Henry Building at Portland, has been directed to report on the matter.

## BRIDGES AND DAMS.

**RED BLUFF, TEHAMA CO., CAL.**—Bridges, steel, concrete and timber. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama and Shasta Counties. Plans and specifications for all the bridges along the highway from Red Bluff to the Shasta County line have been adopted by the Supervisors. The plans will be forwarded to the engineer of the State Highway Commission and on approval bids will be taken.

**SAN FRANCISCO**—Pier construction, timber, creosoted piles. Cost not stated. Engineer, Assistant Engineer Newman, Ferry Bldg., S. F. Owners, State of California. At the Thursday meeting of the State Board of Harbor Commissioners a resolution was passed authorizing the secretary to call for bids for the construction of Pier No. 24, to be erected at the old Harrison street site. The resolution was sent to the State Board of Control, who will place the official advertisement within a few days. The pier will be of a similar type of construction to those recently built, and will be of timber piles treated with creosote. A shed and spur track will be built.

**PACIFIC COAST RIVERS AND HARBORS**—Annual appropriation, \$54,138,580. The annual Rivers and Harbors Appropriation Bill carrying \$34,138,580 for waterway improvements

throughout the United States has been passed. Among the appropriations for the larger projects were the following:

California—Sacramento and Feather Rivers, \$230,000; Oakland harbor, \$150,000; Humboldt harbor and bay, \$275,000.

Columbia River—Cello Falls to the mouth of the Snake River, \$15,000; The Dalles to Cello Falls, \$80,000; at Cascades, \$10,000; Columbia and Lower Willamette Rivers, below Portland, \$600,000; mouth of the Columbia, \$1,250,000.

Oregon—Coos Bay, \$80,000; Nehalem Bay, \$116,175; Coquille River, \$76,000; Siuslaw River, \$117,500; Snake River, \$20,000; Willamette River above Portland and Yamhill River, \$12,500.

Washington—Gray's Harbor and Chehalis River, \$15,000; waterway, Puget Sound to Lakes Union and Washington, \$5,000; Cowitz and Lewis Rivers, \$22,000; Puget Sound, \$25,000; Skagit River, \$7,000.

Hawaii—Kahului harbor, \$10,000.

**RICHMOND, CONTRA COSTA CO., CAL.**—Wharf, reinforced concrete. Cost not stated. Engineers, Haviland & Tibbets, Alaska Commercial Bldg., S. F. Owners, City of Richmond. Plans for this work are complete and now out for figures. The wharf will be of reinforced concrete construction, reinforced concrete piles and floor. There will be a steel frame shed with unloading equipment. Plans and specifications can be secured from the office of the engineers. Bids will be opened at p. m. on December 28th.

## Contracts Awarded.

**FRESNO, FRESNO CO., CAL.**—Bridge, reinforced concrete, \$3,987. Engineer, County Surveyor, Fresno. Owners, Fresno County. Contractors, J. P. Williams and W. R. De Viese, Fresno. Contract price, \$3,987.

**MERCED, MERCED CO., CAL.**—Bridges, timber construction. Cost not given. Engineer, County Surveyor, Merced. Owners, Merced County. Contractor, W. K. Widenman, Merced, one bridge, \$1,391, and L. P. Pate, Merced, three bridges, \$1,124, \$221 and \$279.

**VENTURA, VENTURA CO., CAL.**—Bridge, reinforced concrete, \$2,052. Engineer, County Surveyor, Ventura. Owners, Ventura County. Contractor, Andrew Holloway, Pasadena. Contract price, \$2,052.

**FORT BAKER, CAL.**—Wharf repairs, \$1,515. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Contractor, O. J. Granfield, S. F. Contract price, \$1,515.

## COURT HOUSES.

**SAN FRANCISCO**—City Hall sheet work, \$36,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for the sheet metal work on the dome of the new City Hall show the Pendergast Cornice Works low at \$36,687. Only one other bid was received.

## Contracts Awarded.

**RED BLUFF, TEHAMA CO., CAL.**—Metal furniture, \$1,615. Architect, none. Owners, Tehama County. Contractors, M. G. West Co., S. F. Contract price \$1,615. Note: This contract covers only the metal furniture in the Auditor's and County Clerk's offices.

## Factories and Warehouses.

**SAN FRANCISCO**—Bakery, 2 1/2 story and base. Class C construction, 000. Architect, D. C. Coleman, Chants' National Bank Bldg., S. Owners, Langdorfer Baking Co. building will be erected on McAll street, covering a considerable gr area. Special ovens and machinery will be installed. The front portion of the building will be arranged for a tail store and will be finished in exterior. Exterior will be faced with pressed brick. Plans are being prepared. Work will proceed as soon as funds are available.

**SAN FRANCISCO**—Wagon rooms storage space, 2 story and base, \$16,000. Architect, Theo. W. Low, Humboldt Bank Bldg., S. F. Owners, Old Homestead Bakery. This building will be erected on the west side Shotwell street north of 18th on property adjoining the extensive plant of the Old Homestead Co. The ground floor will be used for a wagon and upper floor for storage purposes. There will be electric work and plumbing. Exterior will be faced with pressed brick. Plans are complete. The work will be done by Day L. Materials are now being purchased.

## FIREHOUSES AND JAILS.

**SAN FRANCISCO**—Fire house story and base. Class C construction, \$35,000. Architect, City Department, Architecture, Temporary City Hall. Owners, City and County of San Francisco. The building will be erected on the north side of Post street of Polk, and will be designed for engine company, one truck company and chemical apparatus. Upper floor will be arranged for living quarters for the crew. Interior will be finished in pine. There will be steam heat, special plumbing and electric work. Exterior of the building will be finished with pressed brick and terra cotta. Plans are now being prepared.

## FLATS.

**FRESNO, FRESNO CO., CAL.**—2 story and base, frame, \$5,500. Architects, Bowen & Davis, Fresno. Owners, George Lighttower. The building has been designed to contain two of six rooms each. Interiors will be finished in pine, redwood and hardwood. Hardwood floors will be in the living and dining rooms. There will be open fire places and tile brick mantels. Bath rooms will have tile floors and wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans complete and figures will be called for once.

**SAN FRANCISCO**—Flats, 2 story base, frame, \$5,000. Architect, R. Owners, Conservative Building and Investment Co., Phelan Bldg., S. F. building will be erected on the north side of Clement street west of avenue, having a frontage of 25 feet and a depth of 69 feet. There will be two modern flats of five and six rooms. #### Huzeman, Mont., Construction, January

Sound Construction and Engineering Co., Seattle, Wash.

Thomas J. Brady, Jr., & Co., 1170 Broadway, New York City.

Leigland, Kleppe & Co., Great Falls, Mont.

J. L. Murphy & Sons, Charleston, Wash.

Hiram-Lloyd Building and Construction Co., 404 Odd Fellows' Building, St. Louis, Mo.

#### Bryan, Tex., Construction, December

Daniel T. McCarthy, 411 Walnut street, Philadelphia, Pa.

J. E. & A. L. Pennock, Land Title Building, Philadelphia, Pa.

J. F. McKnight, Hallettsville, Tex.

R. Williamson & Co., Washington and Jefferson streets, Chicago, Ill.

George A. Shaul, Seneca, Kans.

A. C. Kreipke, El Reno, Okla.

#### La Junta, Colo., Construction, January

George A. Shaul, Seneca, Kans.

George W. Stiles Construction Co., the Rookery Building, Chicago, Ill.

Dieter & Kenzel Construction Co., Wichita, Kans.

Daniel T. McCarthy, 411 Walnut street, Philadelphia, Pa.

J. H. Wiese, City National Bank Building, Omaha, Neb.

Frank H. Latimer & Son, 612 Massachusetts Building, Kansas City, Mo.

J. E. & A. L. Pennock, Land Title Building, Philadelphia, Pa.

R. S. MacMillen, Box 27, San Francisco, Cal.

Hiram-Lloyd Building and Construction Co., 404 Odd Fellows' Building, St. Louis, Mo.

Westchester Engineering Co., 6 Grand street, White Plains, N. Y.

### Highline Canal, Utah.

The Secretary of the Interior has authorized the Reclamation Service to execute the following contracts for construction of the first three divisions of the Highline Canal, Strawberry Valley irrigation project, Utah:

Schedule 1. With Mendenhall, Straw & Bird Construction Co., Springfield, Utah, contract price, \$17,465.

Schedule 2. Ryden & Andrus, of Provo, Utah, contract price, \$25,897.50.

Schedule 3. McCarthy Bros., 11 Pine street, New York City, \$37,078.50.

### Pearl Harbor, Dry Dock.

The following supplemental agreement has been made with the San Francisco Bridge Co. for the construction and completion of the dry dock at the naval station, Pearl Harbor. The revised plans provide for a flat bottom 172 feet wide and a dock 1,028 feet long. The government agrees to pay in addition to the compensation agreed to be paid on account of original contract, namely, \$1,760,000, as supplemented by agreements increasing said contract price by \$514,000, \$150,643.22, and \$711,342.50, re-

spectively, and by certain change of orders increasing the contract price by \$149,670, \$18,562, and \$12,502.52, and in the manner of making payments on account thereof the sum of \$1,281,000, making the total compensation as previously agreed and now supplemented \$1,112,113.47. The government agrees to furnish 1,500 cubic yards of coast sand for the work, and the charge of 74 cents in the original specification shall not be applied to piles yet to be driven under the contract as modified. The present total price includes the cost of all piles to be furnished and driven. The time set for completion of the work is June 30, 1918. Both parties to the contract agree in consideration of the signing of same, to waive all previous claims. It is further agreed that in consideration of the present payment to the contractor of the 10 per cent previously retained out of the contractor's earnings, viz., \$115,147.73, the contractor will furnish a bond in the sum of \$115,000 conditioned on the full and faithful performance of every obligation imposed by the present contract and supplemental agreement.

### Seattle, Wash., Mezzanine Floor.

The contract for constructing a mezzanine floor in the work room at the U. S. post office (old) has been awarded to Sieg Johnson at \$266; add \$69 for conduit and wiring; add for lighting fixtures, etc., \$15, total, \$350.

### Brigham City, Utah, Post Office.

In addition to the fixtures previously named, the following fixtures and material have been approved for use in connection with the construction of the U. S. post office at Brigham City, Utah: Lighting fixtures, Capitol Electric Co.; canopy switches, Cutler-Hammer Mfg. Co.; pendant switches, General Electric Co.; keyless sockets, General Electric Co.; reflectors, Holophane Co.; glassware, Macbeth-Evans Glass Co.; special glassware, Holophane Co.

Kroeschell Bros. Ice Machine Co., Chicago, Ill., second proposal, item 2, \$1,760; first proposal, item 6, \$5,046.

Gay & Sons, San Francisco, Cal.; this bid was mailed to the navy yard, Mare Island, Cal., through error.

#### San Francisco, Cal., Subtreasury.

As previously reported, the contract for the installation of lighting fixtures in the U. S. Subtreasury, San Francisco, Cal., was awarded to the Sterling Bronze Co., New York City, at \$7,670. In the prosecution of the work fixtures manufactured by the following firms will be used: Lighting fixtures, Sterling Bronze Co.; canopy switches, Cutler-Hammer Mfg. Co.; key sockets, Arrow, Keyless sockets, Weber; reflectors, Holophone Co.

SAN FRANCISCO.—Store house, 1 story and base, reinforced concrete. Cost not stated. Architect, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. This building will be erected at Fort Winfield Scott and has been designed for a store house to be used by the California Coast Defense Militia. The building will cover an area of 30 by 60 feet. Interior will be finished in pine. Plans provide for modern plumbing and electric work, including fixtures. Exterior will be faced with cement plaster. A slate roof is specified. Plans are complete

and figures are being taken. Bids will be opened on December 30th at 11 a.m.

#### HOSPITALS.

SAN FRANCISCO.—Female ward, 2 story and base, reinforced concrete. Cost not stated. Architect, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. This building will be in the nature of an addition to the Letterman General Hospital at the Presidio. This is the second similar structure to be erected. The building will be 32 by 80 feet and will contain 24 rooms with 15 baths. Interior will be finished in birch and hardwood floors. Bath rooms will have tile floors and wainscot. There will be steam heat from the central plant. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are now nearly complete and figures will be called for shortly.

SAN FRANCISCO.—Operating pavilion, 2 story and base, reinforced concrete. Cost not stated. Architect, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. The building will be erected at the Letterman General Hospital, covering an area of 28 feet by 80 feet. Interior will be finished in tile and white enamel. Tile floors will be used throughout. Special sanitary doors without panels will be used. A large amount of special operating room plumbing fixtures are required. Steam heat will be supplied from the central plant. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are nearly complete and figures will be called for shortly.

BERKELEY, ALAMEDA CO., CAL.—Hospital cooling store rooms. Cost not stated. Architect, State Architect George B. McQuigall, Sacramento. Owners, State of California. Plans have been completed for furnishing and installing cooling equipment and constructing cooling rooms in the kitchen of the California Institution for the Deaf and Blind. Bids are now being taken on the work. Plans and specifications can be secured from the office of the State Architect. Bids will be opened on January 20th. An official proposal appears in another column of this issue.

FRESNO, FRESNO CO., CAL.—Receiving hospital and garage, 1 story, frame. Cost not stated. Engineer, City Engineer, Fresno. Owners, City of Fresno. The City Council is considering plans prepared by the City Engineer for the new receiving hospital and municipal garage to be erected at the rear of the City Hall.

#### HOTELS.

SAN FRANCISCO.—Hotel, 3 story and base, frame, \$15,000. Architect, Charles C. Frye, 20 Montgomery street, S. P. C. Owner's name withheld. The building will be erected south of Market street and will cover an area of 30 by 60 feet. There will be a total of 15 guest rooms and twelve baths. Interior will be finished in pine and redwood. Plans provide for steam heat and a hot water supply. All bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

OAKLAND, CAL.—Hotel and store, 7 story and base, brick and steel, \$108,000. Architect, William Wilde, 1725 Broadway, Oakland. Owner, O. J. Meade. The building will be erected at the southeast corner of Tenth and Clay streets and has been designed for several stores on the first floor besides the hotel office and lobby. Upper floors will contain 104 guest rooms, a large percentage of which will have private baths. Interior finish will be of pine and hardwood with some ornamental plaster in the office and lobby. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will be finished in tile. A tile floor will be used in the lobby. Marble wainscot and bases are specified. Patent store fronts will also be used. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, Leonard L. Jones & Co., Central Bldg., L. A. Owner, John Thomas. The building will be erected at the southeast corner of Seventh and Gladys streets, and will cover an area of 52 by 109 feet. There will be three stories besides the hotel entrance and lobby on the ground floor. Upper floors will be arranged for a total of 82 rooms and 20 baths. Interior finish will be largely of pine with some oak in the lobby. There will be steam heat, a hot water system, vacuum cleaning and elevator service. Bath rooms will be finished in tile with composition floors. Patent store fronts will be used. Exterior of the building will be faced with ruffled brick with white stone trimming. Plans are complete and subfigures are being taken.

NORTH BEND, ORE.—Hotel, 4 story and base, brick and steel, \$125,000. Architect, J. E. Tourtellotte, Rothchild Bldg., Portland. Owners, North Bend Hotel Co. The building will cover an area of 96 by 120 feet. There will be a number of stores on the first floor, the main dining room, office and lobby. Basement will be arranged for a billiard room and cafe. Upper floors will contain in the neighborhood of 80 guest rooms, all of which will have private baths. Interior finish will be of pine throughout. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken.

#### LIBRARIES.

BAKERSFIELD, KERN CO., CAL.—Library lighting fixtures. Cost not stated. Architect, O. L. Clark, Bakersfield. Owners, City of Bakersfield. Plans have been completed for furnishing and installing the lighting fixtures in the new Bakersfield Library. The system will be what is known as the indirect or semi-indirect lighting system. Plans and specifications can be secured from the Building Inspector, Bakersfield. Bids will be opened on December 23rd.

#### Contracts Awarded.

VACAVILLE, SOLANO CO., CAL.—Library, 1 story and base, reinforced

work by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$10,000. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owner, Mrs. S. J. Hawley. The dwelling has been designed for a ten-room house with three baths and will be erected in North Berkeley. **SHERMAN, LOS ANGELES CO., CAL.**—Residence, 2 story and base, hollow tile, \$35,000. Architect, Irving J. Gill, 913 South Figueroa street, L. A. Owner, W. L. Dodge, 551 Kinsley Drive, L. A. Contractors, Concrete Building and Investment Co., 913 South Figueroa street, L. A. Contract price, \$35,000.

#### SCHOOLS.

**OAKLAND, CAL.**—School, 1 and 2 story and base. Class A construction. Cost not stated. Architect, J. J. Don-

taken and will be opened by the Supervisors on January 9th. Plans and specifications can be secured from the County Clerk at Bakersfield.

#### Contracts Awarded

**SAN FRANCISCO**—Electric work, Civic Center Plaza, \$1,529. Engineer, City Engineer, Temporary City Hall. Owners, City and County of San Francisco. Contractors, General Electric Co., S. F. Contract price, \$1,529.

**RICHMOND, CONTRA COSTA CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Richmond. Owners, City of Richmond. Bids opened by the City Council for paving Seventh street show the following bidders and their bids:

L. L. Pace .....	\$11,128
C. W. McMaster .....	10,339
E. H. Higgins .....	11,555
John W. ....	11,283
Gialbraith & James .....	10,916
G. W. Cushing .....	11,248

The awarding of the contract was postponed until the treasurer examines the bonds offered by the bidders.

**OREGON CITY, ORE.**—Water pipe line, \$297,052. Engineers, Hubert & Rands, Henry Bldg., Portland. Owners, Oregon City. Contractors, Oregon Engineering and Construction Co., Oregon City. Contract price, \$297,052.

#### STORES AND OFFICES.

**SAN FRANCISCO**—Stores, 1 story, frame and plaster, \$6,000. Architect, W. L. Schmoller, 166 Geary street, S. F. Owner, E. P. Engan. The building will be erected on Irving street near 9th avenue and has been designed to contain three stores. It will have a frontage of 47 feet by a depth of 75 feet. Interior will be finished in pine. There will be tile bases and entrances. Exterior of the building will be covered with cement plaster on metal lath. Large plate glass show windows will be installed. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Stores, 2 story and base, brick and steel, \$20,000. Architects, Reid Bros., California Pacific Bldg., S. F. Owners, Treadwell Realty Co. The building will replace fire damage on the east side of Fillmore street south of Ellis. There will be a number of modern stores on the first floor. Upper floor will be arranged for offices. Interior will be finished in pine. There will be patent store fronts and marble bases. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**SAN FRANCISCO**—Market building, 1 story and base, brick. Cost not stated. Architect, O. R. Thayer, 20 Montgomery street, S. F. Owner, Mrs. Rebecca Klunfield. The building will be erected on the east side of Polk street between Washington and Jackson streets. The building will have a frontage of 40 feet and a depth of 120 feet and has been leased for a long term from the plans. The total investment will be about \$35,000. The building will be a one-story and basement brick structure and has been designed for general market purposes. There will be a tile floor over the entire area, the basement on the walls to the height of 7 1/2 feet, special ventilation and special garbage disposal system. The floor will be pitched to drain so that it may be loaded and cleaned daily. Another feature of the building

will be the ladies' rest room, a room 12 by 26 feet in which will be installed a free telephone and other conveniences. Four large skylights will furnish the light. Exterior of the building will be faced with white enameled brick. Plans are nearly complete and figures will be taken shortly.

**OAKLAND, CAL.**—Stores, theatre and offices, 12 story and base. Class A construction. Cost not stated. Architect, Carl Werner, Phelan Bldg., S. F. Owners, R. F. Fitzgerald, J. F. Carlson, W. H. Hynes et al. The building will be erected at the northeast corner of 11th and Franklin streets, covering a large ground area. Construction will be fireproof with a complete steel frame and exterior walls of brick and concrete. There will be several stores on the first floor besides the main body of the theatre. Upper floors will be arranged for modern offices. Only preliminary plans have been prepared and further mention will be made of the work.

**MODESTO, STANISLAUS CO., CAL.**—Stores and theatre, 1 story and base, reinforced concrete, \$16,000. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owners represented by G. H. Umshen Co., S. F. The building will be erected at the corner of 10th and J streets, having a frontage of 100 feet on one street and 110 feet on the other. There will be nine stores besides the theatre. Interior will be finished in pine throughout with some ornamental plaster in the theatre. Patent store fronts and marble bases are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**SACRAMENTO, CAL.**—Oil distributing stations, 5, 1 story, corrugated iron. Cost not stated. Engineer's name not given. Owners, Shell Oil Co., S. F. The Shell Oil Company will build new distributing stations in this city when permits are granted by the City Commission. The total investment planned by the Shell Company at Sacramento is \$250,000.

**LOS ANGELES, CAL.**—Stores, offices and theatre, 2 story and base, brick. Cost not stated. Architects, Charles F. Masten and Herold B. Dunn, Van Nuys Bldg., L. A. Owner's name withheld. The building will be erected on West Washington street and will cover a considerable ground area. There will be two stores on the first floor besides a theatre seating 500 people. Upper floor will be arranged for modern offices. Interior finish will be of pine throughout with some ornamental plaster in the theatre. There will be special electric work and a modern system of ventilation. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**SEATTLE, WASH.**—Office addition, 1 story, Class A construction. Cost not stated. Architect, Harlan Thomas, Arcade Bldg., Seattle. Owners, Arcade Building. An addition of one story will be made to the present building. The addition will cover an area of 101 or 122 feet, and will be arranged for club rooms, dining room with complete kitchen equipment, and five offices. Interior finish will be of pine and hardwood. The present elevator service and steam heat will be extended into the new portion. Plans are complete and figures are being taken.

#### THEATRES.

**SAN FRANCISCO**—Theatre, 1 story, frame and plaster, \$6,000. Architect, Carl Giffuss, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on the Great Highway near the Ocean Beach. The seating capacity will be 399 people. Interior will be finished in pine with some ornamental plaster. Special electric work and sheet metal work will be required. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Theatre alteration, frame construction, \$3,000. Architect, W. L. Schmoller, 166 Geary street, S. F. Owner, G. Berson. The first floor of the present building located at 1049 Fillmore street will undergo alterations and will be fitted up for a modern picture theatre. The work will require plastering, painting, sheet metal work and electric work. Plans are complete and the work will be done by Day Labor.

**CHICO, BUTTE CO., CAL.**—Theatre and store, 1 and 2 story, reinforced concrete. Cost not stated. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Turner & Dahnken. Latest reports from this city make known the fact that the Turner & Dahnken interests of San Francisco, who control a number of large theatre buildings throughout the state of California, will erect a large theatre building in Chico. The company intends to construct at least twenty buildings for theatrical purposes west of Denver, including Chico.

#### SEALED PROPOSALS

##### PROPOSALS FOR BUILDING.

**BUILDING**—Treasury Department, office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. on January 22, 1915, for the construction (including the mechanical equipment, interior lighting fixtures and approaches) of a one-story, basement and stone and brick-faced building of 1,650 square feet ground area, fireproof first floor, and composition roof, for the United States post office at Uvalde, Tex. Drawings and specifications may be obtained from the custodian of the site at Uvalde, Tex., or at this office, in the discretion of the supervising architect, O. WENDERTH, supervising architect.

##### PROPOSALS FOR EXCAVATING.

**EXCAVATING**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Montrose, Colo., on or before January 5, 1915, for the construction of the Lower Selig extension canal and laterals, Incomparable Valley project, in the vicinity of Clatskanie and Selma, Colo. The work involves the excavation of about 117,300 cubic yards of material in open cut. For particulars address the United States Reclamation Service, Montrose, Colo., or the Commonwealth Building, Denver, Colo., or Washington, D. C. A. P. DAVIS, chief engineer.

##### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 881**—Proposals for Threaded and Unthreaded Steel Reinforcing Rods and Attachments.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m. December 29, 1914, at which time they will be opened in public for furnishing the above mentioned articles. Bids and general information relating to this circular (No. 881) may be obtained

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

**GREAT AFRICAN LAKE.**

Lake Victoria Nyanza, in which the river Nile has its source, measures 220 miles from north to south and 220 from east to west. Its coast line, which is very irregular, is about 2,000 miles. Its water area is estimated at 27,000 square miles, and its islands have an area of some 1,400 square miles.

**TRUCE IMPOSSIBLE.**

The well meant efforts of the Pope for a Christmas truce have met with their inevitable rebuff. This war is a serious thing and cannot stop for such mere trifles as Christianity and humanity. The Germans may have made a virtue of a bluff in their offer to accept the proposed truce, provided their opponents accepted it also. They knew, of course, of a certainty that these opponents would not and could not accept. There was a time when Popes could propose and get accepted a "truce of God." That time has passed; not because of the lessening of the authority of the Pope—though it must be recognized that this war is being conducted in large part by nations which do not recognize that authority—but because the truce in the very nature of things is impossible. Neither a brief truce for Christmas nor a patched-up peace to terminate the war could now be considered by any of the combatants. They are at each other's throats, fighting to the death. This war will end either when one part of Europe has crushed the other part or when all are in a state of such utter collapse that there is nothing left to crush. A war which has suspended all the ten commandments and reversed the golden rule has not left enough Christianity to stop it even for a week.

**AN ALARMING IMPATIENCE.**

From The Kansas City Star.

"Impatience with the ordinary process of law" has led both employers and employees to resort to extra legal or even illegal means to gain their ends, declares the preliminary report of the United States Commission on Industrial Relations. This report does not state the conclusions of the commission, but gives the gist of testimony presented at numerous hearings throughout the country.

A general impatience with due process of law is undeniable. It would be surprising if it did not manifest itself in labor affairs and industrial affairs. The commission says that employers showed a distrust of courts whose judges are elective, and that labor asserted its distrust of courts whose judges are appointed for life—the former being invariably state courts and the latter being almost in every case federal tribunals. From the viewpoint

Management.

Chester W. Kelley

of labor, "the flat assertion is made repeatedly that property rights have been put above human rights." On the other hand, "many employers are equally insistent that the law, the police and the courts have ceased to give them a proper measure of protection in their property interests."

In a recent letter to The Star, Judge J. C. Ruppenthal of Kansas says, "Our piecemeal court system, tolerable in primitive society, has grown up in the United States by spasmodic accretions, each of which is largely independent of every other." Judge Ruppenthal writes hopefully and approvingly of the efforts of the American Judicature Society, whose general purpose is "to promote the efficient administration of justice."

The conflicting interests of labor and property undoubtedly go deeper than to questions of court administration. It would not be fair to hold the forms of procedure, jurisdictional conflicts, and even the varying attitudes of courts to economic questions, responsible for the differences in the economic interests of men and groups of men. But these sharp differences do bring into clearer relief the fact that the administration of justice in this country is not up to the mark that it should reach.

Perhaps one chief trouble is that the courts in America are overburdened; that they have assumed to do too much and have "bitten off more than they can chew." Certainly they have assumed to do more in the way of administrative regulation, of controlling lawmaking and of determining public policies than the courts of any other country or time have taken upon themselves.

nished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

E. J. CHERCHILL,

Secretary.

**NOTICE TO CONTRACTORS.**

OFFICE OF THE CLERK OF THE Board of Supervisors, Alameda County, California.—Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, at his office, until Monday, December 28, 1914, at 10 o'clock A. M. (The day when said bids will be opened and the contract awarded) for the installation of steel roller book shelf cases in the office of the Recorder of Alameda County. Specifications for said work are on file in the office of the County Clerk, subject to inspection of bidders.

Each bid must be accompanied by a check for at least ten per cent of the amount of the bid or proposal, certified to by some responsible bank, and made payable to John P. Cook, Clerk of the Board, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract.

(Seal) JOHN P. COOK,  
Clerk of the Board of Supervisors.

**PROPOSALS.**

**BUILDING**—Sealed proposals, indorsed "Proposals for Ward Pavilions" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. January 2, 1915, and then there publicly opened for three temporary one-story wooden ward pavilions at the naval hospital reservation, Puget Sound, Wash. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, Puget Sound, Wash. H. R. STANFORD, chief of bureau.

**CALIFORNIA'S PUBLIC LAND.**

California has 20,853,637 acres of public lands, according to the report of the state board of agriculture. The only counties of the state having no vacant lands are Sutter, Santa Cruz, San Mateo, San Francisco, Sacramento and Marin.

The larger part of this area consists of grazing, timber, mineral, mountainous or desert lands. Some of it is very valuable but for agricultural purposes most of it, because of lack of water or transportation or because of its conformation is useless.

**MONAZITE SAND CONCESSIONS IN BRAZIL.**

United States Ambassador Edwin V. Morgan cables from Rio de Janeiro, Brazil, that the known deposits of monazite sand are already covered by concessions and that there are no opportunities for prospective miners. The sand may be purchased from John Gordon, care of Rio Lighterage Co., Rio de Janeiro, as mentioned in Daily Consular and Trade Report for Sept. 26, 1914.

## SAN FRANCISCO.

**FOREIGN EXHIBIT PALACE**—Frame and plaster. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, French Government. The French Government has notified the Panama-Pacific International Exposition that an architect has already left Paris for San Francisco to complete the details for the building to be erected at the 1915 Exposition by France. Working drawings have already been completed and actual construction will be started as soon as the architect arrives. The French building will be a reproduction of the Legion of Honor Building in Paris, and plans have been prepared by the Division of Works of the Exposition Company, acting on advice cabled from the French Government. A full description of the building together with many details of the construction were cabled from Paris at a cost of \$2,500.

**FILTRATION PLANT AND PUMP-ING SYSTEM**—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications for a filtration system and pumping plant to be installed at the Exposition Grounds are complete. This plant will be used in connection with the auxiliary water system. Bids are now being taken and will be opened by the Buildings and Grounds Committee on December 24th. Plans and specifications can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

**COMFORT STATIONS**—1 story, frame. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications for constructing three comfort stations in the Exposition Grounds have been completed. Bids are being taken and will be opened by the Buildings and Grounds Committee on December 24th. Plans and specifications can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

**RESIDENCE**—2 story and base, frame, \$12,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner's name withheld. The dwelling will be erected in Forest Hill, and has been designed for an eight-room house with two baths and sleeping porch. A private garage will also be erected on the property. Interior of the dwelling will be finished in pine, redwood, hardwood and some white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on

metal lath. Plans are being prepared.

**RESIDENCES**—2, 2-story, attic and base, frame, \$9,000 to \$15,000. San Francisco. Architect, Charles J. Rousseau, Monadnock Bldg., S. F. Owner, Matthew A. Little. These high class dwellings, which are to be erected on lots having thirty foot frontages located on the west side of Broderick street, between Green and Filbert streets, Matthew Little is the owner of the property to be improved. Each house will contain ten rooms, two baths and sleeping porches. The main floors will be finished in blue gum while the upper floors will be finished in white enamel. Hardwood floors will be used throughout. Bath rooms will have tile floors and wainscot and will be equipped with needle shower. One dwelling will be heated by hot water and the other two by furnace heat. There will be open fire places and tile, brick and marble mantels. Besides the main stairway there will be a servants' stairs from the basement to the attic. In the basement will be located male servants' quarters, laundry, wine cellar, garage and furnace room. The main floor will contain a large living room, dining room, reception hall, cloak room, butler's pantry and kitchen. The second floor will be arranged for the main bed room and three other bed rooms. The attic will be arranged for a large billiard room and servants' rooms. Opening off the billiard room will be a pergola. Exteriors will be covered with cement plaster on metal lath. One exterior will be designed in the French Renaissance style, one in the Spanish and the third in the classic style. Plans are being prepared and when complete the work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$14,500. San Francisco. Architect, none. Owner, J. M. Peters, 1011 Balboa street, S. F. The dwelling will be erected on the west side of 16th avenue north of Clement street, and has been designed for a seven-room house with bath. Interior will be finished in pine, redwood and some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be both furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—1 story and base, frame, \$2,000. San Francisco. Architect, none. Owners, Oscar Heyman & Bro., 712 Market street, S. F. The dwelling will be erected on the west side of 16th avenue south of Cabrillo and has been designed to contain two rooms and bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place in the living

room. Mantels will be of tile. Some tile and plaster will be used on the bath room and kitchen. Exterior of the house will be covered with rustic and brickwork. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCES**—1, 2-story and base, frame, \$4,000 each. San Francisco. Architect, none. Owners, H. B. and L. E. Allen, 125 Sutter street, S. F. These houses will be erected on 9th avenue north of Alvarado and 9th avenue south of Lawton. Each house will contain seven rooms and bath. Interiors will be finished in pine, redwood and some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. Furnace heat and open fire places are specified. Mantels will be of tile and brick. There will be automatic water heaters. Bath rooms will have tile floors and wainscot. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$14,000. San Francisco. Architect, none. Owners, Metropolis Investment Co., 333 Kearny street, S. F. The dwelling will be erected on the west side of 26th avenue north of Lake street. A garage will also be erected on the property. The house will contain seven rooms and bath. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. The wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**APARTMENT HOUSE**—6 story and base, brick and steel. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Post street west of Hyde, and has been designed for a high class of tenants. There will be six rooms arranged in suites of two and three rooms. All apartments will have wa. beds and private baths. Interiors will be finished in pine, redwood and blue gum. Hardwood floors will be used throughout. There will be both furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—1 story and base, frame, \$2,000. San Francisco. Architect, none. Owners, Oscar Heyman & Bro., 712 Market street, S. F. The dwelling will be erected on the west side of 16th avenue south of Cabrillo and has been designed to contain two rooms and bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place in the living

**PIER CONSTRUCTION**—Timber, crosstied piles. Cost not stated. San Francisco. Engineer, Assistant Engineer Newman, Ferry Bldg., S. F. Owners, State of California. At the Thursday meeting of the State Board of Harbor Commissioners a resolution was passed authorizing the secretary to call for bids for the construction of Pier No. 24, to be erected at the old Harrison street site. The resolution was sent to the State Board of Control, who will place the official advertisement within a few days. The pier will be of a similar type of construction to those recently built, and will be of timber piles treated with creosote. A shed and spur track will be built.

**RESIDENCES**—2, 2 story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, J. S. Purcell, 356 Presidio avenue, S. F. These two houses will be erected on the west side of 14th avenue south of Anza and each has been designed to contain five rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places in the living rooms. Mantels will be of tile or brick. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**CITY HALL SHEET METAL WORK** \$36,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for the sheet metal work on the dome of the new City Hall show the Forrester Corrice Works low at \$26,687. Only one other bid was received.

**FIRE HOUSE**—2 story and base, Class C construction, \$35,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The building will be erected on the north side of Post street east of Polk, and will be designed for one engine company, one truck company and chemical apparatus. Upper floor will be arranged for living quarters for the crew. Interior will be finished in pine. There will be steam heat and special plumbing and electric work. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

**BAKERY**—2 story and base, Class C construction, \$36,000. San Francisco. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, Langdonier Baking Co. The building will be erected on McAllister street covering a considerable ground area. Special ovens and machinery will be installed. The front portion of the building will be arranged for a retail store and will be finished in pine. Exterior will be faced with pressed brick. Plans are being prepared and work will proceed as soon as funds are available.

**WAGON ROOMS AND STORAGE SPACE**—2 story and base, brick, \$16,000. San Francisco. Architect, Theo. W. London, Humboldt Bank Bldg., S. F. Owners, Old Homestead Bakery. This building will be erected on the west side of Shotwell street north of 19th on property adjoining the extensive plant of the Old Homestead Co.

The ground floor will be used for a wagon room and upper floor for storage purposes. There will be electric work and plumbing. Exterior will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owners, Conservative Building and Investment Co., Phelan Bldg., S. F. The building will be erected on the north side of Clement street west of 14th avenue, having a frontage of 25 feet and a depth of 69 feet. There will be two modern flats of five and six rooms. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living rooms and dining rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**VAN NESS AVENUE ENTRANCE**—Frame and plaster. Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened by the Buildings and Grounds Committee on December 24th for constructing the Van Ness Avenue Entrance for the Exposition. Plans and specifications can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

**STORE HOUSE**—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Constructing Quartermaster's office, Fort Mason. Owners, United States Government. This building will be erected at Fort Winfield Scott and has been designed for a store house to be used by the California Coast Defense Militia. The building will cover an area of 30 by 60 feet. Interior will be finished in pine. Plans provide for modern plumbing and electric work, including fixtures. Exterior will be faced with cement plaster. A slate roof is specified. Plans are complete and figures are being taken. Bids will be opened on December 30th at 11 a. m.

**HOTEL**—3 story and base, frame, \$15,000. San Francisco. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. The building will be erected south of Market street and will cover an area of 30 by 69 feet. There will be a total of 15 guest rooms and twelve baths. Interior will be finished in pine and redwood. Plans provide for steam heat and a hot water supply. All bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**FEMALE WARD**—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Constructing Quartermaster's office, Fort Mason. Owners, United States Government. This building will be in the nature of an addition to the Letterman General Hospital at the Presidio. This is the second similar structure to be erected. The building will be 32 by 80 feet and will contain 24 rooms with 15 baths. Interior will be finished in

birch and hardwood floors. Bath rooms will have tile floors and wainscot. There will be steam heat from the central plant. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are now nearly complete and figures will be called for shortly.

**OPERATING PAVILION**—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Constructing Quartermaster's office, Fort Mason. Owners, United States Government. The building will be erected at the Letterman General Hospital, covering an area of 28 by 80 feet. Interior will be finished in tile and white enamel. Tile floors will be used throughout. Special sanitary doors without panels will be used. A large amount of special operating room plumbing fixtures are required. Steam heat will be supplied from the central plant. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are nearly complete and figures will be called for shortly.

**RESIDENCE**—1 story and base, frame, \$1,500. San Francisco. Architect, none. Owner, T. L. Sharrman, 1454 Shafter avenue, S. F. The dwelling will be erected on the north side of Shafter avenue west of Jennings, and has been designed for a five-room house with bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be an open fire place in the living room. Mantel will be of tile. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**STORES**—1 story, frame and plaster, \$6,000. San Francisco. Architect, W. L. Schmolze, 166 Geary street, S. F. Owner, E. P. Eagan. The building will be erected on Irving street near 9th avenue, and has been designed to contain three stores. It will have a frontage of 47 feet by a depth of 75 feet. Interior will be finished in pine. There will be tile bases and entrances. Exterior of the building will be covered with cement plaster on metal lath. Large plate glass windows will be installed. Plans are complete and figures are being taken.

**STORES**—2 story and base, brick and steel, \$20,000. San Francisco. Architects, Reid Bros., California Pacific Bldg., S. F. Owner, Treadwell Realty Co. The building will replace fire damage on the east side of Fillmore street south of Ellis. There will be a number of modern stores on the first floor. Upper floor will be arranged for offices. Interior will be finished in pine. There will be patent store fronts and marble bases. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**MARKET BUILDING**—1 story and base, brick. Cost not stated. San Francisco. Architect, O. R. Thayer, 20 Montgomery street, S. F. Owner, Mrs. Rebecca Klibbled. The building will be erected on the east side of Polk street between Washington and Jackson streets. The building will have a frontage of 10 feet and a depth of 120 feet and has been leased for a long term from the plans. The total investment will be about \$36,000. The building will be a one-story and basement brick structure and has been designed for general market purposes.

There will be a tiled floor covering the fire area, tile wainscot on the walls to the height of 5 1/2 feet, special ventilation and special garbage disposal system. The floor will be pitched to drain so that it may be flooded and cleaned daily. Another feature of the building will be the ladies' rest room, 10 feet 12 by 26 feet in which will be installed a free telephone and other conveniences. Four large skylights will furnish the light. Exterior of the building will be faced with white enameled brick. Plans are nearly complete and figures will be taken shortly.

**THEATRE**—1 story and base, frame and plaster, \$6,000. San Francisco. Architect, Carl Goiffaux, 16 Kearny street, S. F. Owner's name withheld. The building will be erected on the Great Highway near the Ocean Beach. The seating capacity will be 399 people. Interior will be finished in pine with some ornamental plaster. Special electric work and sheet metal work will be required. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

**THEATRE ALTERATION**—Frame construction, \$5,000. San Francisco. Architect, W. L. Schmollé, 166 Geary street, S. F. Owner, G. Benson. The first floor of the present building located at 1649 Fillmore street will undergo alterations and will be fitted up for a modern picture theatre. The work will require plastering, painting, sheet metal work and electric work. Plans are complete and the work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$6,000. San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owner, Mrs. W. M. Donahue. The dwelling will be erected on the east side of 32nd avenue north of California street, and has been designed for an eight-room house with two baths. Interior finish will be of pine, redwood and hardwood with some white enamel in the bed rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**ANNUAL APPROPRIATION**—\$24,138,580. Pacific Coast Rivers and Harbors. The annual Rivers and Harbors Appropriation Bill, carrying \$24,138,580 for waterway improvements throughout the United States has been passed. Among the appropriations for the larger projects were the following:

California—Sacramento and Feather Rivers, \$280,000; Oakland harbor, \$150,000; Humboldt harbor and bay, \$375,000.

Oregon—Coos Bay, \$80,000; Nehalem Bay, \$116,175; Copille River, \$76,000; Siuslaw River, \$117,500; Snake River, \$20,000; Willamette River above Portland and Yamhill River, \$42,500.

Washington—Gray's Harbor and Chehalis River, \$15,000; waterway, Puget Sound to Lakes Union and Washington, \$5,000; Cowitz and Lewis Rivers, \$22,000; Puget Sound, \$27,000; Skagit River, \$7,000.

Hawaii—Kahului harbor, \$100,000.

Columbia River—Cello Falls to the mouth of the Snake River, \$45,000; The Dalles to Cello Falls, \$80,000; at

Clatsop, \$100,000; Coquille River, \$76,000; Willamette River, \$117,500; Snake River, \$20,000; Willamette River above Portland, \$42,500.

## OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—2 story and base,  
frame, \$10,000. Berkeley, Alameda Co.,  
Cal. Architect, James W. Plachek,  
Acheson Bldg., Berkeley. Owner, Mrs.  
S. J. Hawley. The dwelling has been  
designed for a ten-room house with  
three baths and will be erected in  
North Berkeley. Interior will be fin-  
ished in pine, redwood and hardwood  
with some white enamel in the bed  
rooms. There will be furnace heat  
and open fire places. Mantels will be  
of tile and brick. Bath rooms will be  
finished in tile. Hardwood floors will  
be used in the principal rooms. An  
automatic water heater will be in-  
stalled. Exterior of the dwelling will  
be covered with rustic and cement  
plaster on metal lath. Plans are com-  
plete and figures are being taken.

RESIDENCE—2 story and base,  
frame, \$4,000. Berkeley, Alameda Co.,  
Cal. Architect, James W. Plachek,  
Acheson Bldg., Berkeley. Owner, Mr.  
Dutra. The dwelling will be erected  
on Spruce street, and has been de-  
signed for a seven-room dwelling with  
bath and sleeping porch. Interior will  
be finished in pine, redwood and hard-  
wood. Hardwood floors will be used  
in the principal rooms. There will be  
furnace heat and open fire places.  
Mantels will be of tile or brick. An  
automatic water heater will be in-  
stalled. Bath room and kitchen will  
have tile wainscot. Exterior of the  
dwelling will be covered with cement  
plaster on metal lath. Plans are now  
being prepared and figures will be  
called for shortly.

RESIDENCES—3, 1 story and base,  
frame, \$2,500 each. Oakland, Cal. Ar-  
chitects, Elite Planners, 1841 5th ave-  
nue, Oakland. Owner, M. P. Brash. These  
houses have been designed to  
contain five and six rooms with bath  
and will be erected in the Thousand  
Oaks Tract. Interiors will be finished  
in pine and redwood with some hard-  
wood veneer. Hardwood floors will be  
used in the living and dining rooms.  
There will be open fire places and tile  
or brick mantels. Bath rooms will have  
tile wainscot. Exteriors will be covered  
with cement plaster on metal lath.  
Plans are being prepared and when  
complete will be turned over to the  
owner who will do the work by Day  
Labor.

RESIDENCE—2 story and base,  
frame, \$5,500. Berkeley, Alameda Co.,  
Cal. Architect, Otto S. Gray, 2011  
Telegraph avenue, Berkeley. Owner,  
H. H. Gastman. The dwelling has been  
designed for a seven-room house and  
will be erected on Euclid avenue. In-  
terior will be finished in pine and red-

wood with some hardwood veneer.  
Hardwood floors will be used in the  
living room, dining room and recep-  
tion hall. There will be furnace heat  
and open fire places. Mantels will be  
of tile or brick. The wainscot will be  
used in the bath room and kitchen.  
An automatic water heater will be  
installed. Exterior of the house will  
be covered with cement plaster on  
metal lath. Plans are being prepared  
and when complete the work will be  
done by Day Labor.

APARTMENT HOUSE—3 story and  
base, brick and steel, \$30,000. Oak-  
land, Cal. Architect, W. L. Schmollie,  
166 Henry street, S. F. Owner, Joseph  
Meyer. The building will be erected  
on Alice street near 15th in the Lake  
Merritt district, and will cover an area  
of 80 by 120 feet. There will be a  
total of thirty apartments of two,  
three and four rooms. The building  
will be built around a central patio.  
All suites will have wall beds and  
private bath rooms. Interior will be  
finished in curly redwood and burled  
redwood. Hardwood floors will be  
used in the principal rooms. There  
will be a large social room and roof  
garden. Bath rooms will have tile  
wainscot and floors. Plans provide  
for steam heat, an automatic elevator,  
electric dumb waiters and hot water  
supply. Exterior of the building will  
be faced with pressed brick. Plans are  
now being prepared.

HOTEL AND STORE—7 story and  
base, brick and steel, \$108,000. Oak-  
land, Cal. Architect, William Wilde,  
1725 Broadway, Oakland. Owner, O. J.  
Mende. The building will be erected  
at the southeast corner of Tenth and  
Clay streets and has been designed  
for several stores on the first floor be-  
sides the hotel office and lobby. Upper  
floors will contain 601 guest rooms, a  
large percentage of which will have  
private baths. Interior finish will be  
of pine and hardwood with some orna-  
mental plaster in the office and lobby.  
Plans provide for steam heat, elevator  
service, a vacuum cleaning system and  
hot water supply. Bath rooms will be  
finished in tile. A tile floor will be  
used in the lobby. Marble wainscot  
and bases are specified. Patent store-  
fronts will also be used. Exterior of  
the building will be faced with pressed  
brick trimmed with terra cotta. Plans  
are complete and figures are being  
taken.

HOSPITAL COOLING STORE ROOMS  
—Cost not stated. Berkeley, Alameda  
Co., Cal. Architect, State Architect  
George R. McDougall, Sacramento.  
Owners, State of California. Plans  
have been completed for furnishing  
and installing cooling equipment and  
constructing cooling rooms in the  
kitchen of the California Institute for  
the Deaf and Blind. Bids are now be-  
ing taken on the work. Plans and  
specifications can be secured from the  
office of the State Architect. Bids will  
be opened on January 20th. An official  
proposal appears in another column of  
this issue.

RESIDENCES—2, 1 story and base,  
frame, \$2,000 each. Oakland, Cal. Ar-  
chitects, Elite Planners, 1841 5th ave-  
nue, Oakland. Owner, M. P. Brash.  
These dwellings will be erected on  
Fountain Park and each has been de-  
signed to contain five and six rooms.  
Interiors will be finished in pine and  
wood with some hardwood veneer. In-

terior will be finished in pine and red-  
wood with some hardwood veneer.  
Hardwood floors will be used in the  
living room, dining room and recep-  
tion hall. There will be furnace heat  
and open fire places. Mantels will be  
of tile or brick. The wainscot will be  
used in the bath room and kitchen.  
An automatic water heater will be  
installed. Exterior of the house will  
be covered with cement plaster on  
metal lath. Plans are being prepared  
and when complete the work will be  
done by Day Labor.

APARTMENT HOUSE—3 story and  
base, brick and steel, \$30,000. Oak-  
land, Cal. Architect, W. L. Schmollie,  
166 Henry street, S. F. Owner, Joseph  
Meyer. The building will be erected  
on Alice street near 15th in the Lake  
Merritt district, and will cover an area  
of 80 by 120 feet. There will be a  
total of thirty apartments of two,  
three and four rooms. The building  
will be built around a central patio.  
All suites will have wall beds and  
private bath rooms. Interior will be  
finished in curly redwood and burled  
redwood. Hardwood floors will be  
used in the principal rooms. There  
will be a large social room and roof  
garden. Bath rooms will have tile  
wainscot and floors. Plans provide  
for steam heat, an automatic elevator,  
electric dumb waiters and hot water  
supply. Exterior of the building will  
be faced with pressed brick. Plans are  
now being prepared.

HOTEL AND STORE—7 story and  
base, brick and steel, \$108,000. Oak-  
land, Cal. Architect, William Wilde,  
1725 Broadway, Oakland. Owner, O. J.  
Mende. The building will be erected  
at the southeast corner of Tenth and  
Clay streets and has been designed  
for several stores on the first floor be-  
sides the hotel office and lobby. Upper  
floors will contain 601 guest rooms, a  
large percentage of which will have  
private baths. Interior finish will be  
of pine and hardwood with some orna-  
mental plaster in the office and lobby.  
Plans provide for steam heat, elevator  
service, a vacuum cleaning system and  
hot water supply. Bath rooms will be  
finished in tile. A tile floor will be  
used in the lobby. Marble wainscot  
and bases are specified. Patent store-  
fronts will also be used. Exterior of  
the building will be faced with pressed  
brick trimmed with terra cotta. Plans  
are complete and figures are being  
taken.

HOSPITAL COOLING STORE ROOMS  
—Cost not stated. Berkeley, Alameda  
Co., Cal. Architect, State Architect  
George R. McDougall, Sacramento.  
Owners, State of California. Plans  
have been completed for furnishing  
and installing cooling equipment and  
constructing cooling rooms in the  
kitchen of the California Institute for  
the Deaf and Blind. Bids are now be-  
ing taken on the work. Plans and  
specifications can be secured from the  
office of the State Architect. Bids will  
be opened on January 20th. An official  
proposal appears in another column of  
this issue.

RESIDENCES—2, 1 story and base,  
frame, \$2,000 each. Oakland, Cal. Ar-  
chitects, Elite Planners, 1841 5th ave-  
nue, Oakland. Owner, M. P. Brash.  
These dwellings will be erected on  
Fountain Park and each has been de-  
signed to contain five and six rooms.  
Interiors will be finished in pine and  
wood with some hardwood veneer. In-

terior will be finished in pine and red-  
wood with some hardwood veneer.  
Hardwood floors will be used in the  
living room, dining room and recep-  
tion hall. There will be furnace heat  
and open fire places. Mantels will be  
of tile or brick. The wainscot will be  
used in the bath room and kitchen.  
An automatic water heater will be  
installed. Exterior of the house will  
be covered with cement plaster on  
metal lath. Plans are being prepared  
and when complete the work will be  
done by Day Labor.

APARTMENT HOUSE—3 story and  
base, brick and steel, \$30,000. Oak-  
land, Cal. Architect, W. L. Schmollie,  
166 Henry street, S. F. Owner, Joseph  
Meyer. The building will be erected  
on Alice street near 15th in the Lake  
Merritt district, and will cover an area  
of 80 by 120 feet. There will be a  
total of thirty apartments of two,  
three and four rooms. The building  
will be built around a central patio.  
All suites will have wall beds and  
private bath rooms. Interior will be  
finished in curly redwood and burled  
redwood. Hardwood floors will be  
used in the principal rooms. There  
will be a large social room and roof  
garden. Bath rooms will have tile  
wainscot and floors. Plans provide  
for steam heat, an automatic elevator,

### SAN JOSE AND THE SANTA CLARA VALLEY.

RESIDENCE — 2 story and base, frame, \$2,000. San Jose, Santa Clara Co, Cal. Architect, none. Owner, C. S. Rhea, 74 East San Antonio street, San Jose. The dwelling has been designed for a five-room house and will be erected on Seventh street near Keys. Interior will be finished in pine and redwood. There will be some hardwood floors. An open fire place and tile or brick mantel will be used. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Flans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SCHOOL. 1 and 2 story and base, reinforced concrete, \$100,000. Palo Alto, Santa Clara Co, Cal. Architects, Allison & Allison, Hiberman Bldg., L. A. Owners, Palo Alto School District. The building will contain fourteen class rooms, departments of domestic science, manual training, offices of the principal and a large assembly hall. Interior will be finished in pine with maple floors in the class rooms. There

will be a central heating system, probably steam heat with a complete oil burning system. Vacuum cleaning, program clocks and slate blackboards will be used. Exterior of the building will be faced with cement plaster. Working drawings are being prepared and figures will be called for as soon as a bond issue has been sold.

#### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**BRIDGES**—Steel, concrete and timber. Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama and Shasta Counties. Plans and specifications for all the bridges along the highway from Red Bluff north to the Shasta County line have been adopted by the Supervisors. The plans will be forwarded to the engineer of the State Highway Commission, and on approval bids will be taken.

**HIGHWAY CONSTRUCTION**—Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids opened at the last meeting of the State Highway Commission for constructing highways in Orange County, Siskiyou County, Sutter County and Los Angeles County, show the following low men. Orange County—The M. A. Co., Los Angeles, \$35,820.89. Siskiyou County—E. T. Johnson, Portland, Ore., \$96,522.10. Sutter County—C. H. and A. W. Gorrill, San Francisco, \$42,331.10. Los Angeles County—Lee Moor Construction Co., Los Angeles, \$76,246. A complete list of these figures together with the engineer's estimate and a list of the materials furnished by the state will be found under the heading of San Francisco in this issue.

**SEWERS, ETC.**—\$50,000. Marysville, Yuba Co., Cal. Engineer, City Engineer, Marysville. Owners, City of Marysville. Action is now being taken by the City Council to beautify the appearance of Ellis Lake in this city. It is the intention of the Council to extend sewers, grade and fill several of the streets about the lake. A bond election will be called to raise funds for the work.

**IRRIGATION PROJECT**—\$350,000. Anderson, Shasta Co., Cal. Engineer, H. H. Henderson, Anderson. Owners, Anderson-Cottonwood Irrigation District. H. H. Henderson, engineer in chief for the Anderson-Cottonwood Irrigation District, has submitted his general report to the Board of Directors of the District. The district includes 32,000 acres of land. His estimate of cost for constructing the project, which includes all the preliminary expenses, the cost of rights of way and the best type of construction, is \$350,000. The plans call for a canal and tunnel, the latter at the Redding end, where the water is diverted from the river, which will carry 17,600 inches of water, or enough to cover every acre in the district one foot deep every ten days. On the approval of the plans a bond election will be called to raise funds to put the work under construction. It is thought that the election will be called during January or February, next year.

**SEPTIC TANK**—Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. The Supervisors have ordered plans and specifications prepared for the construction of a septic tank for the cottage at the County Hospital.

**ROAD TRENCHING**—Cost not stated. Red Bluff, Tehama Co., Cal. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans are complete and figures are now being taken for trenching the Paynes Creek road near Buckeye. Plans and specifications can be secured from the County Surveyor at Red Bluff. Bids will be opened on January 5th.

**STORM WATER SEWER**—Cost not stated. Dinuba, Tulare Co., Cal. Engineer, City Engineer, Dinuba. Owners, City of Dinuba. At a special meeting of the Board of Trustees, bids were ordered received for the completion of the storm water sewer from its present terminal on Tulare street near M and K a distance of two blocks.

**THEATRE AND STORE**—1 and 2 story, reinforced concrete. Cost not stated. Chico, Butte Co., Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Turner & Dahken. Latest reports from this city make known the fact that the Turner & Dahken interests of San Francisco, who control a number of large theatre buildings throughout the state of California, will erect a large theatre building in Chico. The company intends to construct at least twenty buildings for theatrical purposes west of Denver, including Chico.

**OIL DISTRIBUTING STATIONS**—1 story, corrugated iron. Cost not stated. Sacramento, Cal. Engineer's name not given. Owners, Shell Oil Co., S. F. The Shell Oil Company will build five distributing stations in this city when permits are granted by the City Commission. The total investment planned

by the Shell Company at Sacramento is \$250,000.

#### Contracts Awarded.

Bluff, Tehama Co., Cal. Architect, none. Owners, Tehama County. Contractors M. G. West Co., S. F. Contract price, \$4,645. Note: This contract covers only the metal furniture in the Auditor's and County Clerk's offices.

plaster on metal lath. Plans are being prepared.

**HOTEL**—1 story and base, brick and steel, \$125,000. North Bend, Ore. Architect, J. E. Tourtellotte, Rothchild Bldg., Portland. Owners, North Bend Hotel Co. The building will be erected at the southeast corner of Seventh and Gladys streets and will cover an area of 52 by 109 feet. There will be three stories besides the hotel entrance and lobby on the ground floor. Upper floors will be arranged for a total of 52 rooms and 20 baths. Interior finish will be largely of pine with some oak in the lobby. There will be steam heat, a hot water system, vacuum cleaning and elevator service. Bath rooms will be finished in tile with composition floors. Patent store fronts will be used. Exterior of the building will be faced with ruffled brick with white stone trimming. Plans are complete and subfigures are being taken.

**STORIES, OFFICES AND THEATRE**—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Charles F. Masten and Herold B. Dunn, Van Nuys Bldg., L. A. Owner's name withheld. The building will be erected on West Washington street and will cover a considerable ground area. There will be two stories on the first floor besides a theatre seating 500 people. Upper floor will be arranged for modern offices. Interior finish will be of pine throughout with some ornamental plaster in the theatre. There will be special electric work and a modern system of ventilation. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

#### Contracts Awarded.

**RESIDENCE**—2 story and base, hollow tile, \$35,000. Sherman, Los Angeles Co., Cal. Architect, Irving J. Gill, 913 South Figueroa street, L. A. Owner, W. L. Dodge, 551 Kinsley Drive, L. A. Contractors, Concrete Building and Investment Co., 913 South Figueroa street, L. A. Contract price, \$35,000.

**BRIDGE**—Reinforced concrete, \$2,052. Ventura, Ventura Co., Cal. Engineer, County Surveyor, Ventura. Owners, Ventura County. Contractor, Andrew Holloway, Pasadena. Contract price, \$2,052.

### PORTLAND AND OREGON

**HOTEL**—1 story and base, brick and steel, \$125,000. North Bend, Ore. Architect, J. E. Tourtellotte, Rothchild Bldg., Portland. Owners, North Bend Hotel Co. The building will cover an area of 56 by 120 feet. There will be a number of stores on the first floor, the main dining room, office and lobby. Basement will be arranged for a billiard room and cafe. Upper floors will contain in the neighborhood of 50 guest rooms, all of which will have private baths. Interior finish will be of pine throughout. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken.

#### Contracts Awarded.

**SCHOOL**—2 story and base, reinforced concrete, \$19,097. Portland, Ore. Architect, F. A. Naramore, Portland.

owners, City of Portland. Contractor, James Winters, Couch Bldg., Portland. Contract price, \$19,097.

**WATER SYSTEM PIPE LINE**—\$297,052. Oregon City, Ore. Engineers, Hubert & Rands, Henry Bldg., Portland. Owners, Oregon City. Contractors, Oregon Engineering and Construction Co., Oregon City. Contract price, \$297,052.

### SEATTLE AND WASHINGTON

**ROUNDHOUSE, SHOPS, ETC.**—Reinforced concrete construction, \$150,000. Spokane, Wash. Engineer, Engineering Department O-W. R. & N. Co., Wells-Fargo Bldg., Portland, Ore. Owners, Oregon-Washington Railroad and Navigation Co. Plans have been completed by the Engineering Department of the O-W. R. & N. Co. for the construction of a group of buildings which have already been started in Spokane. The estimated cost of these improvements is placed at \$150,000. There will be a group of five structures to be built, which will include a roundhouse, to have eleven stalls; a machine shop, which will be 50 by 100 feet in dimensions; a smaller building and a coaling station to have a capacity of 150 tons. All the buildings will be of brick construction with the exception of the power house, this will be of reinforced concrete construction.

**OFFICE ADDITION**—1 story. Class A construction. Cost not stated. Seattle, Wash. Architect, Harlan Thomas, Arcade Bldg., Seattle. Owners, Arcade Building. An addition of one story will be made to the present building. The addition will cover an area of 164 by 192 feet and will be arranged for club rooms, dining room with complete kitchen equipment, and five offices. Interior finish will be of pine and hardwood. The present elevator service and steam heat will be extended into the new portion. Plans are complete and figures are being taken.

### TO KEEP EVERYBODY WELL AIM OF NEW PROFESSION.

For a long time the universities have been teaching how to cure the sick. Now the University of California is going to train students expressly for a new profession—that of keeping everybody well.

The doctors in the medical faculty have long preached to their students "Preventive Medicine." And the doctors have joined enthusiastically with the University's engineers, chemists, bacteriologists, etc., in establishing this new "Curriculum in Preventive Medicine," for the training of experts whose whole purpose is to prevent anyone from ever being sick enough to need a doctor.

"Graduate in Public Health" will be the degree, and the six-year course will be as long and arduous as that pursued by most physicians.

To give the world a new kind of Health officer is the University's object. It used to be that a Health officer was a busy physician who in the intervals of seeing his own patients ran in to look up a warning of scarlet fever or to investigate a complaint as to somebody's back yard. But now communities have begun to think that protecting everybody's health is enough work to deserve a full-time salary.

There is a great and rapidly growing demand for highly-trained sanitarians and bacteriologists for the service of the city, the state, the school, the army, the nation.

Here are some of the things the University of California will teach to the students who choose the new Public Health Curriculum (just established as the result of the work of a committee including Professors Eugene Woldemar Hilgard, long Dean of the College of Agriculture, A. O. Leuschner, G. E. Stratton, and from the Medical faculty, Dean H. C. Moffitt and Mrs. Wallace I. Terry, W. F. Lucas, and Wilbur A. Sawyer.)

Two years of physics, chemistry, zoology, and modern languages.

Then four years of special professional training, in which the students will learn, for instance:

How a town may get clean water, but how, even if there is no source available except a sewage-polluted stream, a community may yet make such water perfectly safe and good for drinking by filtering it through sand and treating it with bleaching powder to get rid of germs.

How a town may make a sewage farm safe and profitable.

How scientific detective work can find unsuspected human carriers of typhoid or diptheria and put an end to their spreading of infection. (There were 131 reported cases of typhoid in California in September, every one of them unnecessary now that anti-typhoid vaccination has been perfected.)

How flies, fleas, mosquitoes, and other such dangerous insects, which spread disease, may be got rid of by suppressing their breeding places.

How tuberculosis in California may be lessened by requiring all milk or butter to be pasteurized—unless from certified herds.

How colds, coughs, and various serious diseases may be checked in their spread by using individual paper cups instead of glasses at the punch bowl at parties, by abolishing such foci of health as the common drinking-cup and the roller towel.

How a town may get healthy meat, clean milk, foods which are what they pretend to be, and fly-protected food supplies.

What people ought to eat.

That sewer gas is disagreeable but not dangerous—but how good plumbing should be planned.

How schools, churches, and public buildings may be heated and ventilated so that the air will not be dryer than the desert of Sahara, as many ventilating systems make it.

How to fight occupational and social diseases—including poverty and vice.

How the threatening increase of insanity may be contended with, for much of it is preventable.

How sanitary and social surveys are made.

How effective social service work is done.

How public health systems should be administered.

Why it is that half a dozen California towns have a death-rate more than twice as high as that, for instance, of Berkeley, which is 8.6 per thousand per annum, and how the wickedly needless waste of life of an excessively high death-rate can be stopped, if the world will only apply a little more of what science has already found out. For in

615 Phelan Building,      San Francisco

these days a town has it in its own power to say whether its death-rate shall be high or low.

**FOREST EXHIBITS FOR CALIFORNIA.**

Part of the government's exhibit for the Panama California exposition at San Diego leaves Washington this week. This portion has to do with the national forests of New Mexico, and will be shown in the New Mexico building, the exhibit having been prepared in co-operation with the State Board of Exposition Commissioners of that State. The material also shows specimens of the principal timber trees of New Mexico and their uses.

Other exposition material is to leave soon for San Francisco, where it will form a part of the Panama-Pacific Exposition. Part of this is being prepared through co-operation between the forest service and the United States civil service commission. The commission passes on the qualifications of all candidates for positions in the forest service, testing the fitness of those who wish to become forest officers through outdoor examinations in riding, surveying, timber estimating, and similar matters as well as by more conventional methods; its exhibit will illustrate the duties of these officers.

Co-operation also exists, in the preparation of exhibit material, between the forest service and the bureau of education. This shows how forest subjects are used in the public schools, in connection with nature study, commercial geography, agriculture, and the like. One of the exhibits is a display made by the normal school pupils of the District of Columbia, in which a number of those who are studying for teachers' positions entered a prize contest on tree study. Each of the contestants prepared a separate exhibit showing the life history and the products of individual trees, such as white pine, hickory, or sugar maple, its plant.

**TO ISSUE \$100,000 BONDS.**

The Western States Gas & Electric Company has filed an application with the Railroad Commission requesting authority to issue \$100,000 of its 5 per cent bonds at 82½ and accrued interest. The company proposed to use the proceeds from the sale of these bonds in reimbursing itself for expenditures made for additions and betterments to

**FREIGHT SERVICE THROUGH THE PANAMA CANAL.**

The Panama Railroad Steamship Line has inaugurated a fortnightly service for the transportation of freight

Veneered Panels that  
ARE good-----order  
today from

**There is only one real good Panel Wybro**

Experience has taught us to produce and to sell a veneered panel that is good for the purpose for which it is used. We have no other product to offer.

Let us begin to sell WHITE PANELS from now on.

**White Brothers**

5th and Brannan Streets      San Francisco

through the Panama Canal. Cargo may be forwarded by this line direct from New York to Balboa, the terminal port on the Pacific side of the Isthmus, for transshipment there to Panama City, South American, Central American, and Mexican ports. Return cargo will also be taken to Balboa for direct transportation through the canal to New York or for transshipment to Cristobal, the terminal port on the Atlantic side of the Isthmus, to Atlantic ports of Central America and northern South America. The Panama Railroad Co. anticipates that sufficient business will result from this extension of its service through the canal to justify at an early date the maintenance of a weekly schedule.

**ASPHALT FROM THE PHILIPPINES.**

[J. E. Boomer, correspondent, Manila.] Since the announcement in Daily Consular and Trade Reports for June 3, 1914, of a discovery of gilsonite in the Philippine Islands, a number of persons have sought more detailed information concerning the deposit. For their information the following data are offered:

A deposit of the variety of hard asphalt known as uninitahite or gilsonite has been discovered a few miles inland from the west coast of the island of Leyte, near the northern end of the island. The deposit is said to lie some where between the towns of Villahia and Leyte, on the west and northern coasts, respectively. Large samples of this mineral have been sent to the Insular Bureau of Science, and several competent geologists have examined the deposit for private capital and have supplied the bureau with some of their data concerning the deposit. Up to the present no representative of the bureau has visited the deposit.

The occurrence of the mineral is described by a competent observer as a vein or bed outcropping with a thickness of several feet across the floor of a gully and apparently dipping into the hills on either side at an angle of 10 degrees. The observer was unable to determine whether the occurrence is a bedded deposit conforming to the dip and strike of the strata in which it occurs or whether it is a vein deposit cutting across the strata beds. No outcrop there is a petroleum deposit which is heavy and black and is of asphaltic quality.

**Development Work—Analysis and Uses**

The following analysis was made by the Insular Bureau of Science, Manila, Philippines, of a sample of the asphalt from the deposit on Leyte, Philippines, and is given for information:

Asphalt from Leyte, Philippines.

Specific gravity, 1.026.

Penetration at 25 deg C, 6.5 mm.

Loss of weight at temperature of 350 deg C for five hours, 2.25 per cent.

Total bitumen soluble in CS<sub>2</sub>, 92.79 per cent.

Organic insoluble, 1 per cent.

Mineral matter, 2.21 per cent.

Fixed carbon, 5.68 per cent.

This work was conducted in a Manila paper factory. The observer, whose conclusions are quoted above, is of the opinion that no such large amount of asphalt has yet been produced, but that the amount mined is probably not in excess of 75 tons. Relative to the conditions of mining it is said that the inflow of ground water and the necessity for heavy timbering to support the shafts most seriously retarded the exploitation of this deposit.

The following analysis of a representative sample of the deposit is supplied by the Bureau of Science of the Philippine Islands: Character, solid and brittle, color, dull, brownish black, fracture, perfect conchoidal, hardness, specific gravity, 1.026; penetration at 25 deg C, 6.5 mm. loss of weight at temperature of 350 deg C for five hours, 2.25 per cent. total bitumen soluble in CS<sub>2</sub>, 92.79 per cent. organic insoluble, 1 per cent. mineral matter, 2.21 per cent. fixed carbon, 5.68 per cent. As stated, this material is classed as uninitahite or gilsonite rather than asphalt proper. It is regarded as suitable for use as a protective coating or paint, as a binder in bituminous paving materials, and as a roofing material. In quality it is considered equal to the gilsonite that sells for \$10 to \$20 per ton in the American market.

**GEOMETRICAL STAIRCASE BUILDING OF CONCRETE.**

What is believed to be the first geometrical staircase ever built of concrete forms a part of the "Caracol" tower in a museum building that has just been completed in Los Angeles Cal. The building with its tower is in the quietest ancient Spanish style of architecture and is constructed entirely of poured concrete. The tower is 12 feet high and contains the geometrical staircase consisting of 10 steps or 10 feet of an open space of 4 feet in diameter and containing 10 benches or seats. The tower is the most geometrical staircase building the concrete staircases. The building is the only one of its kind in the world and is the only one of its kind in the world. The building is the only one of its kind in the world and is the only one of its kind in the world.

**HEIGHT OF SKYS.**

The height of skyscrapers is a subject of much interest to the public. The height of a skyscraper is determined by the height of the building and the height of the tower. The height of a skyscraper is determined by the height of the building and the height of the tower. The height of a skyscraper is determined by the height of the building and the height of the tower.

specifying that these fixtures be set higher than thirty inches, generally thirty-four or thirty-six inches?

"Women have strained their backs for years over low kitchen sinks, but are now rising in protest against a practice which is almost criminal in its indifference to the comfort of those who are forced to lean over when they might just as well stand straight. I presume it will be a generation before all the old sinks have been changed, but I sincerely hope it will not take that length of time to convince all the plumbers and plumbing supply houses that thirty-six inches is better than thirty for the height of sinks and lavatories, and that washtubs, too, as a rule, have been set too low."—Los Angeles Contractor & Builder.

## CONSTRUCTION WORK ABROAD

### CANADA.

[Consul Abraham E. Smith, Victoria, British Columbia.]

#### New Cement Plant on Vancouver Island

A large cement company, known as the Associated Cement Co. of Canada, has been organized to start a large plant near Victoria, on Vancouver Island. The official Dominion Gazette announces that a company has been formed with \$2,000,000 capital, largely subscribed in Toronto. It is an enlargement of the concern known as the Bamberton Co. The new plant will start operations at the beginning of the new year and will give employment to over 200 men.

The rate payers of Saanich municipality have voted favorably on the expenditure of \$300,000 on paving and waterworks.

### CHINA.

[Consul General Julean H. Arnold, Hankow.]

#### Hankow Improvements to Cost \$50,000,000.

The local manager of one of the foreign banks confirms the report of the conclusion of a loan agreement between Samuel Samuels & Co., London, and the Chinese Government, whereby Samuel Samuels & Co. are to furnish at the expiration of the present war the sum of 110,000,000 (\$50,000,000 in round numbers), a portion of which is to be expended on the construction of a bridge across the Yangtze River and one across the Han River, connecting the Wuhan cities Hankow, Hanyang, and Wuchang, and permitting the Hankow-Szechwan, and Hankow-Canton Railways to enter Hankow city. Such portion of the loan as is not used for the two bridges (it is estimated that these bridges will cost less than 15,000,000) will be used in the reconstruction of the city of Hankow along modern lines. The agreement, so it is reported, grants to Samuel Samuels & Co. the exclusive right to furnish such foreign materials as are necessary in the construction work.

#### J. W. FISH MARRIED.

One of the greatest surprises springing from the building community for a long time was the recent marriage of John W. Fish to a charming woman many years his junior, a sweetheart of early days.

J. W. Fish was one of the founders of the old Builders' Association of California when that organization held forth at 230 Pine street, and in those days Mr. Fish was a prominent contractor, but like other successful men,

retired from active work to enjoy life.

Here's long life, health and happiness to John W. Fish and his bride.

#### WILL CONSTRUCT ASPHALT PLANT.

Preparations are now being made by the Blanchard-Brown Co., 660 Market street, for the complete construction of an asphalt plant covering the block bounded by Geneva and Niagara Aves., Tara and San Miguel streets.

The company has filed application with the supervisors for permits to install and maintain a 12,500-gallon oil storage tank and 45-horse power boiler to be used in furnishing fuel for the operation of the plant.

An application has also been filed with the Board of Public Works asking for a permit to construct a frame building which will be erected on the same property to house the machinery.

#### WANT BIDS ON STREET WORK.

Specifications have been approved and bids will be received by the Board of Public Works until December 23rd for the improvements of Fifth avenue between Geary and Fulton streets.

#### STEEL TONNAGE.

NEW YORK.—The unfilled tonnage of the United States Steel Corporation on November 30 totalled 3,224,592 tons, a decrease of 156,105 tons from October

#### A BASE BALL GAME HELD UNDER THE AUSPICES OF THE S. F. A. C.

It has been long contended which are the better as athletes the Contractors or the Architects. There being no other peaceful means of settling the dispute a base ball game was arranged between the warring factions. To the surprise of many the thin, weak, but brainy architects overcame their stout, strong and giant-like foes.

We sincerely hope that for good of the architects the question of superiority will not arise again, as many architect ball-players will not feel inclined to mount the field after they get through doctoring up their sore arms.

The score was 16 to 12 runs in favor of the Architects.

The Contractors line up was:

Jahods, S. S.; Greenwood, R. F.; Mero, 2d B.; Reininghaus, P.; Cohen, 3d B.; Mehrrn, 1st B.; Ludacher, C.; Pflugger, L. F.

Contractors' Umpire, Greenwood.

Architects' line up:

Williams, R. F.; Helm, 2d B.; Norberg, L. F.; Mellin, 3d B.; Tellefsen, 1st B.; Shalk, C.; Brown, S. S.; Lowenthal, C. F.; Flanders, P.

#### AN ELECTRIC HOTEL PAGE.

Among the many recent devices for aiding the hotel man is the system now in operation at the Wallack and Continental hotels of New York City, which speaks the name of a guest in clear and distinct tones, in the many public rooms.

No longer is it necessary to dispatch a boy to locate Mr. Jones or Mr. Brown, for where this instrument (the Callophone) is in use, the operator or clerk merely speaks in an instrument which resembles an ordinary telephone, the name of the guest desired, and his voice is reproduced at

the several different points, the guest upon hearing his name called, answers from where he may be sitting, apparently speaking to the air, but so sensitive is the Callophone that the operator has heard his answer and with a slight movement of his hand he cuts off all other rooms and gives the guest the desired message.—S. F. Hotel Journal.

#### OREGON HOTEL STATISTICS.

According to statistics compiled by Labor Commissioner Hoff of Oregon, there are 1260 hotels in that State, and they furnish employment to a total of 13,341 people, at wages aggregating \$8,410,500. Of this number of people employed, 4447 are females and \$894 males. The average wage of the former is \$9.50 a week, and of the latter \$13.50. Board and lodging are included in both instances.—S. F. Hotel Journal.

#### WILL ERECT BIG ELECTRIC SIGN.

The Brumfield Electric Sign Co., 18 7th street, has filed application with the Board of Public Works for a permit to construct a large electric sign on the roof of the Westbank Building at the corner of Market and Ellis Sts. The sign will be of galvanized iron construction and is being erected for the Santa Fe Railroad Company. It will cost approximately \$2,000.

#### CONTRACTS GIVEN FOR SIX DESTROYERS.

#### Mare Island Navy-Yard to Build One Ship for Less Than Private Companies.

WASHINGTON.—Secretary Daniels awarded contracts last Saturday for the construction of the six destroyers authorized by the last naval appropriation bill as follows: Fore River Shipbuilding Company, two ships, \$795,000 each; Bath Iron Works, two ships, \$800,000 each; Cramp Shipbuilding Company, one ship, \$530,000.

The sixth ship will be constructed at the Mare Island Navy Yard which submitted an estimate of \$626,457 for one ship. It will be the first destroyer built in a government yard.

The appropriation bill limited the amount to be paid for each destroyer to \$925,000, but made no provision for more than six vessels.

#### SAN FRANCISCO ARCHITECTURAL CLUB ATTELIER.

Class A. Projet III.

Class B. Esquisse Esquisse III.

Saturday, December 19th, 1914.

LEO F. STARKS,  
Grand Massier.

#### C. C. MOORE PASSED AWAY.

After a lingering illness of many months, Charles Parker Moore, for many years actively engaged in the contracting business in San Francisco, passed away at his late residence in Corte Madera, Marin Co., last Tuesday.

Mr. Moore served the old Builders' Association of California as its Treasurer for many years. He was one of the organizers of that association and filled all the responsible positions.

Deceased was 65 years of age. The funeral ceremony will be held today (Friday) under the auspices of Fidelity

were diverted from their original destination. The trans-Pacific service of the Union Steamship Co. from Vancouver, British Columbia, and San Francisco to Sydney via New Zealand have been interfered with but slightly, and the American ships of the Oceanic Co. of San Francisco, have followed their four-weekly schedule without delays. Undoubtedly the present offers unusual opportunities for neutral vessels from the United States to the ports of belligerents. In ordinary times in the recent past three or four ships each month have arrived in Australasian ports from New York. There have been three boats each month from the western seaboard of America two British and one American. These have covered fairly well the requirements of Australia's imports from America, but probably if there were still further facilities available there would be more business done. Shipping houses that charter foreign tonnage are prone to show preference to lines that pay highest rates; thus many bulk lines, such as cement, tiles, rock salt, etc., are seldom found on American outward manifests, whereas were there American boats running on regular schedule there would frequently be found room for these less profitable cargoes, which are in good demand in Australia.

#### Moratorium and Embargoes.

Although the Parliaments of the Australian States have provision for the proclamation of a moratorium should occasion arise, no such decree has been issued. The Federal Government has, however, prohibited the export of meat, wheat, and flour to any points outside the British dominions except by permit issued, in exceptional cases, by the Minister of Trade and Customs. A later prohibition was made with regard to sugar. Applications for permits of this order are now pending in the case of certain shippers on American account, the probability being that, in restricted quantities, the goods specified will be allowed to go forward.

The follows a partial list of the principal exports during 1914 to Continental countries now at war: Copper; Ingot and matte. Lead; Pig and matte. Timber, undressed. Tin.

#### EXPOSITION NEWS NOTES.

Reaffirmation of the participation of France in the Panama-Pacific International Exposition was made in a telegram sent to A. Legallet, President of the Auxiliary French Committee in San Francisco, by A. Tirman, General Commissioner for France to the Exposition, on November 22nd.

The Minnesota State Building at the Panama-Pacific International Exposition is to be a distinct novelty in exposition structures according to the plans received by the Division of Works for the Panama-Pacific International Exposition. The building or buildings, will take the form of model farm house with out buildings and will serve the double purpose of model farm and social headquarters for visitors. It is to be surrounded by lawns, orchards and all the appurtenances of the farm.

From England and Holland there arrived on November 23, 125 tons of rare blossoming shrubs and bulbs consigned

to the Horticultural Department of the Panama-Pacific International Exposition. With these was a large assortment of unnamed roses entered in the \$1,000 competition.

One thousand tons of exhibits consigned by the Chinese Government to the Panama-Pacific International Exposition left Shanghai on one of the big liners for San Francisco and arrived December 1st. The Chinese Pavilion is practically completed.

## Editorial Comment.

At this season of the year when we are to preach and practice the teachings of the master, "Peace on earth, good will to men," it is certainly hard to realize that most of the "civilized" world are in the death grips of a world war. And these are the peoples that profess to be the followers of the Christ, whose birth date marks the beginning of our calendar and who taught the Fatherhood of God and the Brotherhood of man. It is hard to realize that such things as this war exists and is as a dream, the facts of which are well described by Chester Kowell in the Fresno Republican:

The Christian world has repented the Ten Commandments and the Golden Rule. The industries, the education, the science and the philanthropy of half the world are suspended. The majority of the able-bodied men in Europe are now freezing and soaking in burrowed trenches, and killing each other by the hundreds of thousands. The two civilizations to which the world has owed most of its progress for a thousand years are now pitted against each other, each announcing that it can survive only by the destruction of the other. The war so far is a deadlock. Neither side expects to gain much with the troops now in the field. These will destroy each other, and the victory will go to whoever can send in the most after these are gone. France and Germany are now drilling boys from fourteen to eighteen, and old men from forty-five upward, for the final decisive slaughter after the middle generation is destroyed. Individual liberty has disappeared, and the modern status of woman has been forgotten. Women have only two purposes left—to grub the fields, while the men are gone, and to bear children, who shall rehabilitate a Europe of generation after next. With brutal directness as an avowed governmental policy the soldiers have been bled to their women before being sent out to die that the breed may not disappear. And in Germany, the broad women will be cared for by the state, so that the ranks of recruits for the boys of 1925 may not be jeopardized. But in Belgium there is no state to care for them. There, in the course of the future, the birth rate must go on as usual for several months and if the babies will starve to death. Born in an unheated shelter by the road side to a mother whose ration of one loaf a day and one bowl of cold soup a day, fed by the state, and then coming into the world as the only child of a mother who has no other child, on the first night mother will be told to take away her baby and to let it starve to death.

Recognizes that these babies must all starve. But each individual mother is fighting to the last limit of desperation to save her own child, and if she can beg or steal one of the few cans of condensed milk that can be got into the country she will take out its flickering life a few days longer—and then it will die. In some parts of Poland the conditions are nearly as bad. And with most of the wage-earners of Europe drawing a cent a day in the army, the individual problem of the women and children of the poorer classes must be desperate. There is not a family in Europe today that knows whether all its members are dead or alive. Every household in Europe is looking daily for the report of the death or maiming of some member, and few are really disappointed. No propertyed family in Europe knows how soon it will be penniless, and no laboring family knows how soon its surviving members may be starving. No nation in Europe knows whether it will exist next year. The laboratories of Europe, where the secrets of nature were being delved for the relief of human ills, are all closed. No one writes books, paints pictures, composes music, or discovers new truths. Among the millions in the ranks must be some whose genius would have enabled the world forever—and they will be killed. Among the scientific researches left unfinished must be some which would have transformed the life of the world forever—and they will never be resumed. The current of civilization has been turned backward, into a raging torrent of barbarism.

It is a dream a nightmare. But there is no power to awaken the world from it.

While the building business along with all other businesses has not been as prosperous during the past year as one could wish still San Francisco and the bay cities have fared as well as anywhere else in the country. And so far as this country is concerned we are happy to be free from changing alliances that in 1914 have brought us in the world war, where instead of attending to such business as we have it would be our duty to go out and die. In view of the situation then we have reasons to think that things are as good as they are that we are enjoying the relative peace and quiet of our own country and that we are not in the line of fire. It is a relief to be able to say that we are not in the line of fire. It is a relief to be able to say that we are not in the line of fire. It is a relief to be able to say that we are not in the line of fire.

San Francisco, December 30, 1914

## Development in Workmen's Compensation.

G. D. Crain in *The Wood-Worker*.

Some time ago the writer contributed an article to *The Wood-Worker*, discussing the status of workmen's compensation and pointing out that it is bound to come and that wood-workers should get ready for it. In the course of the article the prediction was made that the liability insurance companies would ultimately adopt an analytical schedule of rating, similar to that used as a basis for establishing fire insurance rates, for the purpose of separating the sheep from the goats—penalizing factories where the accident hazard is excessive, and giving credits in the insurance rate to the plant where the danger has been eliminated as far as possible. This has now come to pass.

Under the old system of doing business insurance companies made rates based on their experience with an entire class. Every risk in that class was charged the same rate. It was realized that this was quite inequitable, and made the progressive manufacturer, with the well-equipped plant, help carry the burdens of the concern which paid no attention to safety ideas, and had as many accidents as it pleased. Of course, no manufacturer wants his men to get hurt; but some of them don't feel strongly enough on the subject to do everything they can to keep them from getting hurt! The reason the companies did not go further and inspect every risk was because of the incidental expense involved, which, undoubtedly, would have been large, and would, of necessity, have been passed on to the insured, and because they seemed to be doing very well as it was.

With the arrival of workmen's compensation in many states—twenty-four now have such laws—several things became evident. One of them was that a great many more losses would have to be paid by the insurance companies carrying the employers' liability under the law than before, because in every instance the law wipes out the old common-law defenses of contributory negligence, fellow service and voluntary assumption of risk. By pleading these defenses the employer, in a great many cases, was able to escape payment of a claim for damages, and the insurance companies likewise got off. As the rate was based on the amount of losses that had to be paid this meant that premiums were proportionately lower than they could possibly be under workmen's compensation, when every accident means a payment of loss, with extremely few exceptions.

In other words, the compensation law does not stop to ask, "How were you hurt? Was it your own fault? Did one of your fellow employees cause you to get hurt? Did you know when you took the job that you were likely to be injured?" It merely finds the facts about the accident, and requires payment according to its seriousness and the amount of time lost by the employee. And all right, thinking people will admit that this

is as it should be, and that the operator of a machine, who gets hurt while trying his best to earn his wages, ought not to be deprived of his living during the time that he is incapacitated. Few people inflict self-injury, or desire to undergo the pain and loss of physical capacity that invariably go with an injury.

That was one of the things the insurance companies realized—that there would be more losses. Another was that they would lose a lot of business unless they made a change in their system of rating. They saw at once that if they were going to insure everybody, the good and the bad, the average rate would be so high that those with "preferred risks," the people who had cleaned up their factories and were due to have a minimum number of accidents, would not want to pay it, but would either insure with the state or form mutual companies of their own. In only eight or nine states has an attempt been made to administer the insurance feature, whereby the state collects the premiums, pays the losses and looks after the insurance situation generally. However, owing to the fact that lower rates are usually quoted, at least to begin with, by the state than by the insurance companies, this has been a popular move and has naturally attracted a great deal of business. Thus, the insurance companies found themselves in competition with the state, and also realized that the state was inclined to be a rate-cutter.

That has put it up to the companies, first, to eliminate the extremely bad risks by putting the rate high enough to be prohibitive, and, second, to give the good risks such a low rate, by crediting them for improvements, that the cost of insuring with the stock companies would not be enough greater than the state to make it an inducement to go with the state in its insurance plan. The companies have therefore put into the field the Workmen's Compensation Bureau, which has charge of the application of what is known as the "universal analytic schedule for the measuring of relative work accident hazards in manufacturing industries." This is a very imposing title, but the purpose is about as indicated above.

Under this method an inspection is made of each plant individually, and an individual rate is made for it. It is claimed by the companies, and with a good deal of logic, that such a plan is sure to promote the "safety first" idea, because the employer, knowing that he is to be penalized for failure to put his machinery in good shape, is practically certain to do his best to eliminate the risk to as great an extent as possible. Instead of being merely a humanitarian and progressive proposition, it becomes a matter of dollars and cents, and investments in guards and other safety devices begins to pay dividends in reducing his rate.

After a plant has been inspected a summary is made of the charges and credits. If in this summary, the charges exceed the credits, the basic rate is increased. If, on the other hand, the credits exceed the charges, the rate is reduced to that extent. Thus there is every inducement for the employer to go as far as possible in the direction of improving his "house-keeping," to the end that he may get the lowest possible rate. A statement of the new schedule, which is of interest to every wood-worker for the reason that sooner or later (depending on the speed with which a compensation law is enacted in his state) it will be applied to his factory, is as follows:

No general building charge is made for a plant which is four stories or under; above four stories charge is made for fifth floor and upwards.

A charge is made for defective foundation, for overloaded floors, also if the roof tank and its supports are defective or inaccessible for inspection.

Defective condition of floor surface, such as protruding nails, loose boards, etc., is charged for.

Floor opening and hoistway openings should be protected by standard railing or toeboards. If not a charge is made.

Poorly lighted stair flights, flights with defective treads, or those not provided with standard handrails, are charged for.

Runways or platforms over 4 feet from floor level should be protected with handrails and toeboards.

Dangerous conditions in or about boiler room, including unguarded engine flywheel and lack of efficient governor on engine, are defects that will be charged for.

Imperfect electrical equipment, unguarded sets of gears, unguarded vertical or inclined belts, horizontal belts with less than 7-foot clearance, vertical or inclined shaft without guards, transmission shafting with less than 6-foot clearance, unprotected dead end of shaft within 6-foot of floor level, unprotected set-screw, unprotected coupling with protruding nuts, bolt heads, keys and pins, and failure to provide belt-shifters, are all included among the defects, and a charge is made for each of them.

Fire exits and escapes must be sufficiently numerous and properly arranged to avoid a charge, and there must also be ample fire-lighting appliances.

A charge is made for overcrowded conditions, obstructed aisles, poorly piled material, and for poor conditions as to light, ventilation, sanitation, general order and care. This takes in all the of the features of housekeeping and plant management generally.

Hazardous conditions in yard, including poorly-piled material, which is likely to cause collapses resulting in injury to employees, are taken note of.

It is required, to avoid charges, that each grinding wheel over 8 inches diameter be mounted with safety

flanges, provided with a retaining hood and equipped with a belt-shifter or other disengaging device.

Elevators must be put in good condition. There must not be projecting objects in shaft, and no beams, floors, etc., may form a ledge with floor of passing elevator. It must be provided with safety catches and the shaft equipped with gates. It must have automatic car limit stops at top and bottom, and the sides of car not used for entrance must be enclosed. Each hatchway must be enclosed in approved manner.

Counteracting the charges, credits are given by the schedule for any of the following features:

Building erected where manufacturing is done in four-story building or lower.

Where no boilers are in use for power purposes and no engines are on the premises.

Where boilers are in detached boiler house and are inspected regularly.

Where all smokestacks are constructed of brick or concrete.

Where all moving parts of engines, including flywheels, cranks, cross-heads, oil rods, etc., are properly guarded.

For equipping engine with independent automatic speed-limit stops, with extra credit where engine is connected with stop stations located throughout plant and periodically tested.

Where each power working machine is driven by a direct-connected or individual motor, or where the equipment is driven in groups of not more than ten machines to the group.

For efficient means for stopping, simultaneously, all machinery in each room.

If a substantial portion of shafting is fitted with self-oiling bearings, or where other methods obviating the necessity of oil going near shafting when in motion are employed.

If inspection is made of all machinery, chains, hooks, ropes and other appliances, and record kept, or where systematic accident prevention campaign is carried on by the employer, and literature on accident prevention and special rules relating to safety are disseminated among employees. This would include providing efficient first aid to the injured, etc.

Credits are also given for special fire prevention work, elevator safety provisions, general good order, light and sanitation.

#### SOME NOTES ABOUT CONCRETE BUILDING.

E. H. Sweet in *Keith's Magazine*.

Any material in its formative state of development is apt to be misunderstood and misused by designers. Concrete being still in the formative state, meets with such maltreatment. Many concrete houses of today were designed for stone, brick or even frame, and then by chance at the last moment the material was changed and a so-called concrete house is produced. Naturally such a building can only come under the classification of nondescript, and good results, even structurally, can hardly be looked for.

It must be clearly borne in mind that the material with its possibilities and limitations determines a style or design. Therefore, unless one completely

understands the material, he cannot hope to design a concrete house. A concrete house is not a stone house with concrete walls, nor is it a stone house with concrete floors, nor is it a stone house with concrete roof. It is a house of concrete, and the designer must understand the material and its possibilities and limitations. Then will it reveal its own inherent possibilities.

The idea of a house of concrete is new. It is one with a flat roof, crowned by a parapet or some impulse perforated patterning such as one seen in the country here, or Italy for ailing the day. It is better to avoid the stereotyped type balusters and moldings which have so long been associated with stone work, not because of any difficulty in casting, but simply to avoid stamping concrete an imitation of stone. The windows should be grouped rather than separately spaced, for the additional span is a simple matter with reinforcement, and then one can concentrate on each group surrounding it with a mosaic or scrollwork treatment which offers a pleasant relief from the necessarily bare reveals of the plain windows.

The flat roof is suggested in preference to the pitched because it is obviously cheaper and is the natural form. Shingle or slate roofs are pitched to insure a dry interior; a flat shingle roof would, of course, offer but little protection from water. The flat concrete roof, when composed of a rich mixture and properly done, is a perfectly practical roof.

As an example of successful collaboration between architect and engineer, might be mentioned some recently built columns for a pergola. They were inexpensive to construct because they had been intelligently designed with twenty flat sides to accommodate the material. They could thus be made with the board marks showing. They have the same play of light and shade as true Doric columns, and at a short distance are identical. But if they had been designed as true Doric columns, with hollow flutes the cost, owing to the difficult forms necessary for casting, would have been prohibitive to say nothing of the danger of locking the sharp angles of the flutings, both during the construction and after.

As a final suggestion it should be borne in mind that concrete is a cast material, and therein lies its future. The scoring of the walls in imitation of stone blocks, or even laying up the walls in the form of stone blocks, rob it of its great individuality as a building material.

#### FOREST SERVICE REPORT ON FIRE LOSSES IN 1916.

The season of 1916 was the worst of the forest fires in the United States since 1904. The forest fires in the United States in 1916 were estimated to have cost the government \$1,000,000. The forest fires in the United States in 1916 were estimated to have cost the government \$1,000,000. The forest fires in the United States in 1916 were estimated to have cost the government \$1,000,000.

The forest fires in the United States in 1916 were estimated to have cost the government \$1,000,000. The forest fires in the United States in 1916 were estimated to have cost the government \$1,000,000. The forest fires in the United States in 1916 were estimated to have cost the government \$1,000,000. The forest fires in the United States in 1916 were estimated to have cost the government \$1,000,000. The forest fires in the United States in 1916 were estimated to have cost the government \$1,000,000.

#### More Than Six Thousand Fires.

The total number of fires during the season of 1916 which threatened the national forests and which had to be handled by the protective organization of the forest service were 6,712, or about 1,200 more than occurred in 1915. This number represents the fires reported up to December 31. At that time reports indicated that there was still a dangerous condition in southern California and in certain portions of the national forests in the east. The service says that the total for the year will be increased by fires in these regions during December.

The most serious conditions are reported from western Montana and northern Idaho and on the Pacific slope. The weather conditions in the central and southern Rocky Mountain regions were more nearly normal. As a consequence only 10 per cent of the total number of all national forest fires occurred in these regions and they were handled without difficulty and with very small loss of property.

Of the entire 6,712 fires which threatened the national forests 4,876 were extinguished by the protective organization before they had covered 10 acres. The percentage of fires that burned over more than 10 acres was smaller than in any previous year.

While the detailed reports have not yet been received appraising the exact loss to the government through the forest fires, a preliminary estimate shows that the loss is incalculable. Under the present conditions the loss to the government is estimated to be \$1,000,000. The loss to the government is estimated to be \$1,000,000. The loss to the government is estimated to be \$1,000,000.

#### Region of Greatest Danger.

The region of greatest danger is the Pacific slope. The forest fires in the Pacific slope are estimated to have cost the government \$1,000,000. The forest fires in the Pacific slope are estimated to have cost the government \$1,000,000. The forest fires in the Pacific slope are estimated to have cost the government \$1,000,000.

ington, the 1,200 fires which were handled by the department threatened upwards of \$21,000,000 worth of timber. And these figures, according to the department experts, do not include the value of non-merchantable timber and young growth on about 5,000,000 acres of land, and several million dollars worth of ranch and other private property which lay in the path of the threatening conflagrations. Figures are not yet gathered of the precise amount of damage threatened by fires in California and other national forest states, though they are expected to add large amounts to the total value of the property threatened and saved.

### INCORPORATIONS

**The Casa Company.** To deal in real estate. Capital Stock, \$20,000; 20,000 shares at \$1 each; amount subscribed, \$3. Place of business, San Francisco. Directors—Chas. Urks, N. Cohn and A. W. Roberts, 1 share each.

**Western Exploitation Company.** General real estate business. Capital Stock, \$10,000; 100 shares at \$100 each; amount subscribed, \$300. Place of business, San Francisco. Directors—J. B. Giffen, F. L. Giffen, W. C. McFarlan, 1 share each.

**Exchequer Gold and Silver Mining Company.** Cert. Copy. To deal in mines, mining claims and land. Capital Stock, \$500,000; 100,000 shares at \$5 each; amount subscribed, \$125. Place of business, San Francisco. Directors—C. Hirschfeld, E. P. Barrett, W. P. Henry, W. C. Ralston and G. C. Snider, 5 shares each.

**Alpha Consolidated Mining Co.** Cert. Copy. To operate and control mines, mining claims and property. Capital Stock, \$25,000; 105,000 shares at \$5 each; amount subscribed, \$125. Place of business, San Francisco. Directors—C. Hirschfeld, G. C. Snider, W. P. Henry, W. C. Ralston and A. F. Coffin, 5 shares each.

**Newport Estate Company.** To deal in real estate. Capital Stock, \$50,000; 5000 shares at \$10 each; amount subscribed, \$50. Place of business, San Francisco. Directors—J. B. White, P. M. McAuliffe, S. S. Stevens, 1 share each.

**Sonoma County Tubercular Sanatorium, Incorporated.** To conduct sanitariums, hospitals and health resorts. Capital Stock, \$75,000; 100,000 shares at 75c each; amount subscribed \$750. Place of business, San Francisco. Directors—E. K. Smith, G. R. Hubbell, K. F. Sullivan, J. T. Wise and J. H. Morris, 2 shares each.

**R. S. Corporation.** To manufacture and deal in automobiles. Capital Stock, \$75,000; 750 shares at \$10 each; amount subscribed, \$30. Place of business, San Francisco. Directors—L. H. Rose, P. Smith, H. G. Dunkelshill, 1 share each.

**California State Division League.** To secure the division of the State of California. No Capital Stock. Place of business, San Francisco. Directors—Albert Assur, W. M. Dean, J. S. A. Macdonald and N. B. Anderson.

**The London To South Pole Exhibition Company.** Cert. Copy. To produce descriptive exhibitions. Capital Stock, \$60,000; 300 shares at \$100 each; amount subscribed, not given. Place of business, Dayton, Ohio. Directors—R. and W. Specialty Company.

To design and sell force blowers, vacuum

cleaners, suction fans, etc. Capital Stock, \$25,000; 25,000 shares at \$1 each; amount subscribed, \$15. Place of business, San Francisco. Directors—A. J. Bowie Jr., J. W. White Jr., J. F. Barnett, 5 shares each.

**Pacific Maine Supply Company.** Cert. Copy. To deal in vessels and do a general commission business. Capital Stock, \$100,000; 1000 shares at \$100 each; amount subscribed, \$20,000. Place of business, San Francisco. Directors—H. Leir, 95 shares; A. Liebenthal, 90 shares; S. O. Meyer, D. J. Guggenheim and C. L. Ackerman, 5 shares each.

**United Program Film Service of California.** To deal in a general film business. Capital Stock, \$60,000; amount subscribed, \$4; 60,000 shares at \$1 each. Place of business, San Francisco. Directors—S. Salomon, J. L. Warner, P. Franklin, I. S. Warner, 1 share each.

**Kashukogio Kabushiki Kaisha.** General amusement and theatre business. Capital Stock, \$20,000; 400 shares at \$50 each; amount subscribed, \$2050. Place of business, San Francisco. Directors—T. Nakamura, S. Oica, I. Sugaryaina and S. Akishige, 10 shares each; F. Taniguchi, 1 share.

**California Improvement Association.** To deal in real estate. Capital Stock, \$25,000; 250 shares at \$100 each; amount subscribed, \$5000. Place of business, San Francisco. Directors—H. R. Berry, 41 shares; F. C. Markeand, 4 shares and Jos. Eastman, 5 shares.

**Gold Star Mining Company.** To operate mines and deal in its products. Capital Stock, \$500,000; 500,000 shares at \$1 each; amount subscribed, \$500. Place of business, San Francisco. Directors—E. O. McGrath, H. L. Corson, C. V. Lodge, A. J. Reise and A. C. Bothe, 100 shares each.

**Con-Virginia Mining Company.** Cert. Copy. To deal in mining lands and claims. Capital Stock, \$2,160,000; 2,500 shares at \$10 each; amount subscribed, \$250. Place of business, San Francisco. Directors—C. N. Messer, H. Zadig, C. Hirschfeld, C. H. Fish and T. F. Fish, 5 shares each.

### CO-PARTNERSHIP.

Eugene Dimmer, J. R. Eoff, Jennie Dimmer as Dimmer Hardware Co.  
Henry Karp as H. Karp & Son.  
Peter G. Zaro as Universal Auto Repair Co.

### NOTICE OF NON-RESPONSIBILITY.

Dec. 21, 1914—E. FILLMORE 60 N. Lombard N 25E 110. Walter J. Engle as to improvements on leased property.

### DECREASE OF CAPITAL STOCK.

Con-Virginia Mining Company from \$2,160,000 to \$216,000 of 216,000 shares at \$1 each.

### PLANS FOR RAILWAY EXTENSION ORDERED.

The Board of Public Works at their regular meeting yesterday ordered plans and specifications prepared by the City Engineer for the extension of the Municipal Railway on Church street.

### FINK & SCHINDLER GET BOOTH CONTRACT.

The Fink & Schindler Company has been awarded the contract for the erection of the booth for the Vano-scope Company of New York City. This booth is to be located in the Palace of Liberal Arts.

Nearly \$300,000,000 has been spent annually by Americans traveling in Europe for several years past. This is an enormous sum of money and it represents a traveling public of many people. This will be entirely changed this year for these people can not go to Europe even if they wanted to. And in view of this condition of things is safe to assume that at least a reasonable percentage of this travel will be diverted to the Pacific coast and that not a few will visit the Exposition instead of taking a trip to the continent.

It is a fact that most of the people who acquire wealth wish to display it in ostentation and it is safe to say that half of the people who go to Europe go there simply to say they have traveled on the continent. Most of them have seen little of the wonders of their own country, and if it is the fashion to come to the Pacific Coast this year they will all come and view the Exposition.

Aside from this there is a growing feeling among the people generally that the thing to do is to "See America First." In that case California is the place to see. It is the wonderland that has the infinite variety and charm. It has the highest mountains, the greatest ocean, the biggest trees and the bluest skies. It possesses within its bounds all the climates, all the vegetation, all the beauties of the world. And while other places have a single thing of beauty or grandeur they can all be seen here and the traveler who would see America must see California or miss the main part of the show. The next year ought to be a banner year for American tourists in California and while the Exposition may suffer from the war in some ways it will profit in others.

### THE LATEST OF OUR GREAT RAILWAY STATIONS.

Nowhere are there to be found such noble terminal and union station buildings as now exist in the United States. Foremost among these are the new Pennsylvania station and the new Grand Central Station in New York; but outside of New York there are other monumental buildings which are scarcely second to the two mentioned in importance. The latest of these to be opened is the Union Station in Kansas City, Missouri, which was opened to traffic on November 1st of this year. The building, of classic design, is monumental in size and of dignified and harmonious proportions. The central portion of the building contains a main hall 240 by 165 feet and 92 feet high. The waiting room is 350 by 75 feet. The total cost of the station, approaches, new belt line and the new terminal works represents an output of over forty million dollars. Scientific American.

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO.** Apartment house, 3 story and base, frame, \$6,000. Architect, Edward E. Young, 12 Kearny street, S. F. E. owner, Thomas Scoble, 363 14th avenue, S. F. The building will be erected at the southwest corner of 10th avenue and California street and will cover an area of 25 by 74 feet. Interior has been arranged to contain six modern apartments of two and three rooms. Interior finish will be of pine and elm panels. Some hardwood floors will be used. There will be a hot water supply. All suites will have wall beds and private bath rooms. Tile floors and wainscot will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. A klinker brick base will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor Materials are now being purchased.

**SAN FRANCISCO.** Apartment house, 5 story and base, reinforced concrete, \$120,000. Architect, C. H. Skidmore, Hyster Bldg., S. F. E. owner, Dr. C. F. Buckley. The building has been designed for a high class apartment house which is to be erected for Dr. C. F. Buckley on his property on O'Farrell street west of Larkin. The lot to be improved is a key-lot, having a frontage of 50 feet on O'Farrell, 70 feet on Larkin and 120 feet on Olive avenue. The building will be a five-story and basement structure of reinforced concrete. The building will contain a total of 45 suites of two and three rooms besides a large lobby and palm court on the first floor, ball room and social rooms in the basement and a large sun garden on the roof. Interior will be finished in cireassian walnut, pine and ornamental plaster. The main lobby and palm court will be finished in marble with a tile floor. Both the palm court and main lobby will be 20 by 50 feet. Plans provide for steam heat, a complete oil burning system, automatic elevator, electric dumb waiters, hot water system and vacuum cleaning. Bath rooms will be finished in tile with tile floors and wainscot and will have high class plumbing fixtures. Wall beds are specified for all apartments. The exterior of the building will be faced with pressed brick.

**SAN FRANCISCO.** Apartment house, 3 story and base, frame, \$8,000. Architects, O'Brien Ross, Clume Bldg., S. F. E. owner's name withheld. The building will be erected at the corner of California and 10th avenue, and has been designed to contain a number of two, three and four room apartments. All suites will have wall beds and private bath rooms. Interiors will be finished in pine and elm panels. Hardwood floors will be used in the living rooms and bedrooms. Plans provide for steam heat and hot water system. Bath rooms will have tile wainscot and composition floors. The tracer will be of stone or marble and tile. Exterior of the building will be

finished in pressed brick and tile.

**SAN FRANCISCO.** Apartment house, 3 story and base, brick and tile, 10,000. Architect, August Nordin, Mill Bldg., S. F. E. owner's name withheld. The building will have a complete steel frame and will be erected on the north line of Ellis street near Jones. The building will be one of the most modern apartment houses erected in that section. The building will have a frontage of 7 1/2 feet by a depth of 120 feet. Interior has been arranged for a total of sixty six apartments of two and three rooms. All suites will have wall beds and private bath rooms. Entrance will be finished in marble and tile. A large lobby and social room will be one of the many pleasing features of the building. Interior will be finished in pine, redwood and hardwoods. Hardwood floors will be used. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. All bath rooms will be finished in tile. Exterior of the building will be faced with tapestry brick trimmed with terra cotta.

**SAN FRANCISCO.** Apartment house, 3 story and base, frame, \$20,000. Architect, E. H. Denke, 1317 Hyde street, S. F. E. owner, Joseph Neustadter. The building will be erected at the southeast corner of Clay and Franklin streets, and has been designed to contain a number of four-room apartments. All suites will have wall beds and private bath rooms. Interiors will be finished in pine, redwood and hardwood veneer. Plans provide for steam heat, a hot water system and vacuum cleaning. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble and tile. Some oak floors will be used. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

**OAKLAND, CAL.** Apartment house, 4 story and base, brick and steel, \$85,000. Architect, Clay N. Butler, Albany Bldg., Oakland. Owners name withheld. The building will be erected near Broadway, and will cover a 120 ground area. Plans provide for a total of sixty suites of two, three and four rooms. Interiors will be of pine, mahogany and hardwood. Hardwood floors will be used in the living rooms and bedrooms. Plans provide for steam heat, a hot water system and vacuum cleaning. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble and tile. Some oak floors will be used. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

## ROADS.

**W. VA.** — The West Virginia Highway Commission, held August 1, 1934.

**W. VA.** — The West Virginia Highway Commission, held August 1, 1934.

the Board that comparatively short time will be required for procuring data concerning roads to be improved. Haviland & Tibbitts, Alaska Commercial Building, San Francisco, are the engineers on the work.

**PHOENIX, ARIZ.**—Bonds in the sum of \$29,000, bearing interest at 6 per cent, have been sold to J. W. Thompson, for School District No. 33 of Buckeye. Thompson has also contracted for the purchase of the Glendale bonds, which will be used in the construction of water works.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Bids were submitted for \$10,000 issue of the Temecula School District bonds, and award has been made to the First National Bank of Riverside, whose bid was par and accrued interest and premium.

**REDONDO BEACH, LOS ANGELES CO., CAL.**—The Board of Trustees have decided to call a bond election to vote \$105,000. The proceeds of the sale will be used as follows: \$20,000 for the purchase and improvement of a library site on Elena avenue; \$85,000 for two park sites, one in the north part of town and another in the southern portion, to be known as the Garden of Carnations.

The Trustees have instructed the City Attorney to prepare the necessary proceedings to call the election.

### BRIDGES AND DAMS.

**MODESTO, STANISLAUS CO., CAL.**—Bridge and culvert, concrete construction. Cost not stated. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Plans and specifications prepared by the County Surveyor for the construction of a bridge on the Twenty-six Mile House road and a culvert on the Oakdale road have been approved and accepted by the Board of Supervisors and bids for the work will be received until January 12th.

**YUBA CITY, SUTTER CO., CAL.**—Wharf building, frame and corrugated iron. Cost not stated. Engineer, none. Owners, Feather River Transportation Co., Yuba City. The Feather River Transportation Company has material on the ground and will start the construction of a wharf building at once.

#### Contracts Awarded.

**FRESNO, FRESNO CO., CAL.**—Bridges, timber pile construction. Cost not stated. Engineer, County Surveyor, Fresno. Owners, Fresno County. Contractor, F. Jones, Fresno. Contract price, \$10.70 per foot. Note: These bridges will be erected over the Kings River Slough on the Fred Turner road.

**FRESNO, FRESNO CO., CAL.**—Bridge, reinforced concrete, \$20,000. Engineer, County Surveyor, Fresno. Owners, Fresno County. Contractor, W. A. Kettlewell, Fresno. Contract price, \$19,650. This bridge will be erected over the Kings River near Sanger. Nine bids were submitted, ranging from \$19,650 to \$29,150.

### COURT HOUSES.

**WALLA WALLA, WALLA WALLA CO., WASH.**—Court house, 2 story, dome and base, reinforced concrete, \$150,000. Architect, Henry Osterman, Walla Walla. Owners, Walla Walla County. Carrying out his election promise, County Commissioner H. A. Reynolds introduced a resolution that the Board proceed with arrangements

for the removal of the old court house and for the construction on that site of a new court house not to exceed in cost \$150,000. Architect Henry Osterman of Walla Walla has been working on the plans, and will have same completed in a short time. At that time the Commissioners will take further steps in the matter. At the recent election the citizens voted on the advisability of expending the sum of \$50,000 for the construction of a concrete reservoir; this proposition carried by an eight to one vote. It will now be necessary that a bond issue be voted on at a later election. Further mention will be made of this work.

### FACTORIES AND WAREHOUSES.

**SAN FRANCISCO**—Sugar refinery, 1 and 11 story, brick and steel, \$250,000. Engineer, W. E. Murray, S. F. Owners, Western Sugar Refinery Co. These buildings will be erected on a large factory site at the southeast corner of Louisiana and Humboldt streets. The eleven story structure will cover an area of 58 by 161 feet and the one story building 80 by 140 feet. This is to be the largest and most modern refinery plant on the coast. The estimated cost does not include machinery and equipment. Construction will be fireproof with a complete steel frame, concrete floors and fireproof interior partitions. Exteriors will be faced with stock brick. Plans are complete and contracts for the steel work have been awarded. Other contracts are being let through Engineer Murray.

**SAN FRANCISCO**—Warehouse, 3 story and base, brick and steel, \$40,000. Architect, Leo Devlin, Pacific Bldg., S. F. Owners, Dunham, Carrigan & Hayden. This building will be erected south of Market street on property owned by John Rapp. There will be spur track facilities. Construction will be of the heavy mill type. Interior of the front portion of the building will be finished for offices and display rooms. There will be steam heat, metal window sash and frames and elevator service. Exterior will be faced with stock brick. Plans are being prepared.

**PORTLAND, ORE.**—Manufacturing plant. Class A construction, \$5,000,000. Engineer, J. G. Kelley, Chamber of Commerce Bldg., Portland. Owners, Jason Moore Co., New York. The construction of a large plant for the purpose of manufacturing products to be made by abstracting minerals from Lake Sumner and Albert will be erected by the Jason Moore Co. of New York, whose bid for the lease of these properties has been accepted by the State Land Board. The plans will require the expenditure of \$5,000,000, and in addition to this amount a pipe line of wood pipe 250 miles long will be built. A separate plant will be erected for the manufacture of nitrate, potassium, sodium carbonate, bicarbonate and sodium chloride and the establishment of power plants. Although no arrangements have been made for the buildings, preliminary plans were prepared by J. G. Kelley, engineer, Chamber of Commerce Bldg., for the pipe line. The buildings will be one and two story structures and of fireproof construction, concrete being used. There will be a large amount of equipment, which is included in the \$5,000,000 to be spent. In Portland the company is represented by Shep-

herd & Brock, attorneys in the Yeon Building.

### FLATS.

**SAN FRANCISCO**—Flats, 3 story and base, frame, \$5,500. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owners, R. J. and B. Rudebeck. The building will be erected at the northwest corner of 19th and Douglass streets, and has been arranged for a store and one three-room flat on the first floor. Each of the upper floors will contain a six-room flat. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile and brick mantels. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with shiplap. Marble and tile wainscot will be used in the vestibules. Plans are complete and segregated figures are being taken.

**OAKLAND, CAL.**—Flat, 2 story and base, frame, \$4,000. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The building will be erected at the corner of 58th and Dover streets, and has been designed to contain four modern flats each of four rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms. Entrance will be finished in marble. Exterior of the building will be covered with rustic. Plans are now being prepared.

### GARAGES.

**BERKELEY, ALAMEDA CO., CAL.**—Garage, 1 story and base, Class B construction, \$10,000. Architects, Woollett & Woollett, Newhall Bldg., S. F. Owner, George W. Rodchaver. The building will be erected on north Berkeley street east of Shattuck, and has been designed for a commercial garage. There will be steel roof trusses and a cement floor. Metal window sash and frames are specified. Special gasoline storage tanks will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

### GOVERNMENT WORK & SUPPLIES.

#### Pumping Plant on Isthmus.

The purchasing officer of the Panama Canal will soon invite proposals for the design, fabrication, delivery and supervision of erection of a complete pumping plant for dry dock No. 1 at the Pacific terminus of the Panama Canal, located at Balboa. The pumping plant will comprise four main pumps, two drainage pumps, and one bilge or seepage pump. Salt water will be handled by the main pumps. The main pumps will be required to pump out dry dock No. 1 at any stage of the tide. The drainage pumps are to be capable of laying bare the floor of the suction chamber at any stage of the tide. These pumps will be required to handle fresh or salt water, as well as fresh water containing sewage matter and other wastes from ships in dock. The bilge pumps

chains, including beveled washers, bolts and nuts.

208,500 open-hearth steel rails, tie rods, and low carbon steel splice bars, including bolts and nuts.

13,900 lbs soft steel castings for gratings.

21,600 lbs standard black wrought iron pipe.

26,250 lbs grey iron castings for mooring bits.

24,000 lbs drift pins, bolts, nuts and washers for securing wooden fenders and mooring bits.

\$900,000 lbs, more or less, structural steel work and accessories, fabricated and delivered on dock No. 1.

#### Paving South Pablo Dam.

The following bids were received at the office of the U. S. Reclamation Service, Great Falls, Mont., for 1,700 sq yds of 18-in paving on South Pablo dam:

Wilson Bros., Polson, Mont., \$2.70 per yd.

A. L. Markhus, Polson, Mont., \$3.95. Municipal Construction Co., Helena, Mont., \$4.05.

#### Milk River Project, Bridge.

The Reclamation Service is asking for bids for furnishing and erecting one highway and pipe bridge of two spans, each composed of three trusses 97 feet long, for the St. Mary storage unit, Milk River project, Mont. Sealed proposals will be received at the office of the service in Great Falls, Mont., until 2 o'clock p. m. January 12, 1915. Full particulars may be obtained by addressing the United States Reclamation Service at Washington, D. C.; Great Falls, Mont., or Fletcher, Mont.

#### Excavation.

The Reclamation Service is asking for bids for the construction of the lower Selig extension canal and laterals, Uncompahgre Valley project, Colo. The work involves the excavation of about 117,300 cubic yards of material in open cut. Bids will be received at the office of the service in Montrose, Colo., until 4 o'clock p. m. January 5, 1915. Full particulars may be obtained by addressing the United States Reclamation Service, Montrose, Colo., or 519 Commonwealth Building, Denver, Colo.

#### Pearl Harbor, H. T., Cranes.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for three electric traveling cranes for the naval station, Pearl Harbor, H. T.:

Item 1, 3 cranes delivered at Pearl Harbor; 2, deduct from item 1 if crane is of 2-motor type; 3, cranes, complete, under bidder's specifications.

Cleveland Crane & Engine Co., Wickliff, Ohio, item 1, \$12,745; 2, \$163. Whiting Foundry Equipment Co., Harvey, Ill., item 1, \$13,400; 2, \$150; 3, \$12,800.

The Morgan Engineering Co., Alliance, Ohio, item 1, 20-ton, \$5,900; 10-ton, \$4,865; 3-ton, 1-motor, \$2,360; item 2, 3-ton, 2-motor, \$3,200.

Manning, Maxwell & Moore, New York City, item 1, \$11,250; 2, \$170; 3, \$9,483.

The Pawling & Harnischfeger Co., Milwaukee, Wis., item 3, \$15,900.

Niles-Bement-Pond Co., New York City, item 1, \$12,975; 2, \$175.

#### Pishkun Reservoir Supply Canal.

The following bids were received by the U. S. Reclamation Service, Great Falls, Mont., for Pishkun Reservoir Supply Canal, station 8+60 to 38+53:

Bid 1. Bates & Rogers Construction Co., Spokane, Wash.

2. Security Ridge Co., Billings, Mont.

3. McArthur Bros. Co., 208 S. La Salle street, Chicago, Ill.

4. O'Connor & Heelan, Great Falls, Mont.

Item 1. Excavation, class 1—Bid 1, 20c; 2, 19c; 3, 33c; 4, 43c.

Item 2. Excavation, class 2—Bid 1, 45c; 2, 47c; 3, 45c; 4, 55c.

Item 3. Excavation, class 3—Bid 1, 87c; 2, \$1.25; 3, 90c; 4, \$1.

Item 4. Overhaul—All bidders, 2c.

Item 5. Concrete in conduits, spillway, etc.—Bid 1, \$8.40; 2, \$8.85; 3, \$11; 4, \$12.

Item 6. Concrete in bridge piers—Bid 1, \$8.40; 2, \$8.85; 3, \$9; 4, \$12.

Item 7. Placing reinforcing steel—Bid 1, 1.25c; 2, 1.35c; 3, 1.1c; 4, 1.25c.

Item 8. Placing logs in timber crib—Bid 1, 18c; 2, 15c; 3, 20c; 4, 10c.

Item 9. Erecting lumber in structures—Bid 1, \$13; 2, \$14; 3, \$20; 4, \$15.

Item 10. Filling timber crib—Bid 1, \$2; 2, \$1.50; 3, 60c; 4, \$1.25.

Item 11. Dry paving—Bid 1, 80c; 2, \$1.50; 3, \$2; 4, \$1.75.

Total—Bid 1, \$39,929.50; 2, \$43,936.60; 3, \$50,653; 4, \$59,305.

#### HALLS AND SOCIETY BUILDINGS.

##### Contracts Awarded.

SEATTLE, WASH.—Lodge hall, 1 story, Class A addition, \$50,000. Architect, none. Owners, Arcade Investment Co. Contractors, Woecik & Behrens, Oriental Bldg., Seattle. Contract price, \$50,000.

#### HOTELS.

SAN FRANCISCO—Hotel 3 or 4 story and base. Class C construction. Cost not stated. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, Young Women's Christian Association. The building will be erected near the Exposition Grounds and will be conducted by the institution for the accommodation of its members visiting the Panama-Pacific Exposition. There will be in the neighborhood of 100 rooms, several baths on each floor and a large and attractive lobby. Plans provide for steam heat, a hot water supply and elevator service. Interior finish will be of pine and redwood. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick. Plans are being prepared.

#### HOSPITALS.

SAN FRANCISCO—Pathological ward and garage, 2 story and base. Class A construction, \$78,990. Architects, Richetti & Headman, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for this building show James L. McLaughlin, 244 Kearny street, low on all propositions. He will probably be awarded the contract. A complete list of the bids received will be found under the heading of San Francisco in this issue.

SAN FRANCISCO—Refrigerating equipment, \$1,456. Architect, City De-

partment of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Blaisdell Machinery Co. submitted the lowest figure at the last meeting of the Board of Public Works for installing a vacuum cleaning system in the San Francisco Hospital at \$4,875. A complete list of the other bids received will be found under the heading of San Francisco in this issue.

SAN FRANCISCO—Hospital stand pipe fire escapes, \$735. Architect, City Department of Architecture, S. F. J. M. Lettich submitted the lowest figure for installing stand pipe fire escapes on the San Francisco Hospital group. His bid for this work was \$737.

#### PANAMA-PACIFIC EXPOSITION WORK.

##### Contracts Awarded.

SAN FRANCISCO—Booth, \$14,500. Architect, Henry Shermund, Mills Bldg., S. F. Owners, American Drugists' Syndicate. Contractors, Conlan Bros., 842 Guerrero street, S. F. Contract price, \$14,500. The booth will be erected in the Liberal Arts Palace.

SAN FRANCISCO—Booth. Cost not stated. Architect's name not given. Owners, Pacific Coast Specialties Co., S. F. Contractors, Fink & Schindler Co., S. F. Contract price not stated. The booth will be erected in the Manufactures Palace.

SAN FRANCISCO—Booth. Cost not stated. Architect's name not given. Owners, Sterns Manufacturing Co., Butte, Mont. Contractors, Fink & Schindler Co., S. F. Contract price not stated. The booth will be erected in the Liberal Arts Building.

#### RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Edward Bolles, 660 Market street, S. F. Owners, S. A. Born Building Co., 660 Market street, S. F. The dwelling will be erected in Ashbury Terrace and has been designed for a seven-room house with private garage. Interior finish will be of pine, redwood and hard-wood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$12,000. Architect, Louis M. Upton, 111 Ellis street, S. F. Owner, J. O. Gartner. The dwelling has been designed to contain eight rooms and three baths, and will be erected at the northeast corner of Baker and Vallejo streets. Interior finish will be of pine, redwood, hardwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system, hot water supply and open fire places. Bath rooms will be finished in tile and equipped with showers. Mantels will be of tile and brick. Exterior of the house will be covered with cement plaster on metal lath. A clay tile roof will be used.

## SEALED PROPOSALS.

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR, 885.**—Proposals for Repair Parts for Cars, Galvanized Sheet Iron or Steel, Rivets, Bolts, Nuts, Pipe, Fittings, Brass Tubing, Valves, Cotton Waste, Wool Waste, Lime, Glue, Alcohol, Turpentine, Seals, Fuel Oil, Kerosene, Varnish, Black Jacket Enamel and Paints.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m. January 3, 1915**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular, No. 885 may be obtained from this office or the offices of the assistant purchasing agent, 1056 North Point street, San Francisco, Cal.; also from the U. S. engineer, offices in the following cities: Los Angeles, Cal.; Seattle, Wash. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

### PROPOSALS FOR PAINTING.

**PAINTING.**—Office of the Custodian, U. S. Public Building, San Diego, Cal.—Sealed proposals will be received at this office until **January 15, 1915**, for painting in this building. For further information address C. H. BARTHOLOMEW, custodian.

### PROPOSALS FOR BRIDGE CONSTRUCTION.

**BRIDGE.**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Great Falls, Mont., until **2 o'clock p. m. January 12, 1915**, for furnishing and erecting one highway and pipe bridge of two spans, one combined of three trusses 97 feet 6 inches long for the St. Mary storage unit, Milk River project, Mont. For particulars address the United States Reclamation Service, Washington, D. C.; Great Falls, Mont., or Fletcher, Mont. A. P. DAVIS, chief engineer.

## SAN FRANCISCO.

**APARTMENT HOUSE**—3 story and base, frame, \$10,000. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 363 14th avenue, S. F. The building will be erected at the southwest corner of 10th avenue and California street, and will cover an area of 25 by 74 feet. Interior has been arranged to contain six modern apartments of two and three rooms. Interior finish will be of pine and elm panels. Some hardwood floors will be used. There will be a hot water supply. All suites will have wall beds and private bath rooms. Tile floors and wainscot will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. A klinker brick base will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**APARTMENT HOUSE**—5 story and base, reinforced concrete, \$126,000. San Francisco. Architect, C. H. Skidmore, Hearst Bldg., S. F. Owner, Dr. C. F. Buckley. The building has been designed for a high class apartment house which is to be erected for Dr. C. F. Buckley on his property on O'Farrell street west of Larkin. The lot to be improved is a key-lot, having a frontage of 20 feet on O'Farrell, 70 feet on Larkin and 120 feet on Olive avenue. The building will be a five-story and basement structure of reinforced concrete. The building will contain a total of 85 suites of two and three rooms besides a large lobby and palm court on the first floor, ball room and social rooms in the basement and a large sun garden on the roof. Interior will be finished in cireassian walnut, pine and ornamental plaster. The main lobby and palm court will be finished in marble with a tile floor. Both the palm court and main lobby will be 30 by 50 feet. Plans provide for steam heat, a complete oil burning system, automatic elevator, electric dumb waiters, hot water system and vacuum cleaning. Bath rooms will be finished in tile with the floors and wainscot and will have high class plumbing fixtures. Wall beds are specified for all apartments. The exterior of the building will be faced with pressed brick.

**APARTMENT HOUSE**—3 story and base, frame, \$19,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected at the corner of California and 19th avenue, and has been designed to contain a number of two, three and four room apartments. All suites will have wall beds and private bath rooms. Interiors will be finished in pine and elm panels. Hardwood floors will be used in the living rooms and dining room. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Entrance

will be finished in marble and tile. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—6 story and base, brick and steel, \$90,000. San Francisco. Architect, August Nordin, Mills Bldg., S. F. Owner's name withheld. The building will have a complete steel frame and will be erected on the north line of Ellis street near Jones. The building will be one of the most modern and up-to-date apartment houses erected in that section. The building will have a frontage of 52½ feet by a depth of 120 feet. Interior has been arranged for a total of sixty-six apartments of two and three rooms. All suites will have wall beds and private bath rooms. Entrance will be finished in marble and tile. A large lobby and social room will be one of the many pleasing features of the building. Interior will be finished in pine, redwood and hardwoods. Hardwood floors will be used. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. All bath rooms will be finished in tile. Exterior of the building will be faced with tapestry brick trimmed with terra cotta.

**APARTMENT HOUSE**—3 story and base, frame, \$20,000. San Francisco. Architect, E. H. Denke, 1317 Hyde street, S. F. Owner, Joseph Neustadter. The building will be erected at the southeast corner of Clay and Franklin streets, and has been designed to contain a number of four room apartments. All suites will have wall beds and private bath rooms. Interiors will be finished in pine, redwood and hardwood veneer. Plans provide for steam heat, a hot water system and vacuum cleaning. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble and tile. Some oak floors will be used. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

**SUGAR REFINERY**—1 and 11 story brick and steel, \$250,000. San Francisco. Engineer, W. E. Murray, S. F. owners, Western Sugar Refinery Co. These buildings will be erected on a large factory site at the southeast corner of Louisiana and Humboldt streets. The eleven story structure will cover an area of 58 by 161 feet and the one story building 80 by 140 feet. This is to be the largest and most modern refinery plant on the coast. The estimated cost does not include machinery and equipment. Construction will be fireproof with a complete steel frame, concrete floors and fireproof interior partitions. Exteriors will be faced with stock brick. Plans are complete and contracts for the steel work have been awarded. Other contracts are being let through Engineer Murray.

**WAREHOUSE** 3 story and base, brick and steel, \$10,000. San Francisco.

Architect, Leo Devlin, Pacific Bldg., S. F. owners, Dunham, Carrigan & Hayden. This building will be erected south of Market street on property owned by John Rapp. There will be spur track facilities. Construction will be of the heavy mill type. Interior of the front portion of the building will be finished for offices and display rooms. There will be steam heat, metal window sash and frames and elevator service. Exterior will be faced with stock brick. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, \$5,000. San Francisco. Architect, Edward Bolles, 660 Market street, S. F. Owners, S. A. Born Building Co., 660 Market street, S. F. The dwelling will be erected in Ashbury Terrace and has been designed for a seven-room house with private garage. Interior finish will be of pine, redwood and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$12,000. San Francisco. Architect, Louis M. Upton, 111 Ellis street, S. F. Owner, J. O. Gartner. The dwelling has been designed to contain eight rooms and three baths and will be erected at the northwest corner of Faker and Vallejo streets. Interior finish will be of pine, redwood, hardwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system, hot water supply and open fire places. Bath rooms will be finished in tile and equipped with showers. Mantels will be of tile and brick. Exterior of the house will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and figures are now being taken.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Costello & Ferriack, 23 College avenue, S. F. The dwelling will be erected on the west side of 9th avenue north of Balboa street and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire place and tile or brick mantel. Bath room will have the wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**PARK ENTRANCE** Concrete and stone, \$10,000. San Francisco. Ar-

chitects, Bliss & Foy, 1000 Bldg. S. P. Owners, City and County of San Francisco. Plans have been completed and figures taken for constructing an entrance to Golden Gate Park to be known as the First Avenue Entrance. The work requires considerable stone and concrete. An announcement of contract will be made shortly.

**HOTEL—3 or 4 story and base, Class C construction.** Cost not stated. San Francisco, Architect, Julia Morgan, Merchants' Exchange Bldg., S. P. Owners, Young Women's Christian Association. The building will be erected near the Exposition Grounds and will be designed by the institution for the accommodation of its members visiting the Panama-Pacific Exposition. There will be in the neighborhood of 100 rooms, several baths on each floor and a large and attractive lobby. Plans provide for steam heat, a hot water supply and elevator service. Exterior finish will be of pine and redwood. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick. Plans are being prepared.

**PATHOLOGICAL WARD AND GARAGE—2 story and base, Class A construction.** \$78,990. San Francisco Architects, Richetti & Headman, S. P. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works show James L. McLaughlin, 241 Kearny street, low on all propositions. He will probably be awarded the contract. A complete list of the bids received will be found under the heading of San Francisco in this issue.

**REFRIGERATING EQUIPMENT—\$1,456.** San Francisco, Architect, City Department of Architecture, Temporary City Hall, S. P. Owners, City and County of San Francisco. Bids opened for furnishing and installing refrigerating equipment at the Isolation Hospital show the H. W. Johns-Manville Co. low at \$1,456. They will be awarded the contract.

**HOSPITAL VACUUM CLEANING—\$4,875.** San Francisco, Architect, City Department of Architecture, Temporary City Hall, S. P. Owners, City and County of San Francisco. The Blaisdell Machinery Co. submitted the lowest figure at the last meeting of the Board of Public Works for installing a vacuum cleaning system in the San Francisco Hospital at \$4,875. A complete list of the other bids received will be found under the heading of San Francisco in this issue.

**HOSPITAL STAND PIPE FIRE ESCAPES—\$737.** San Francisco, Architect, City Department of Architecture, S. E. J. M. Lettich submitted the lowest figure for installing stand pipe fire escapes on the San Francisco Hospital group. His bid for this work was \$737.

**FUEL OIL STORAGE TANK—\$1,210.** San Francisco, Engineer, City Engineer, Temporary City Hall, S. P. Owners, City and County of San Francisco. The lowest bid submitted to the Board of Public Works for constructing a fuel oil storage tank in the Civic Center was presented by T. W. McClennahan at \$1,210. He will probably be awarded the contract. A complete list of the figures received will be found under the heading of San Francisco in this issue.

**THEATRE—1 story, Class C construction.** \$10,000. San Francisco, Architect, August Headman, New Cal

ifornia Bldg. Co. submitted the lowest bid for erecting a 1000 Bldg. S. P. Owners, City and County of San Francisco. The main auditorium will have a seating capacity of eight hundred people. Interior will be finished in pine and ornamental plaster. Special electric work and a large amount of hot metal work will be included in the contract. Plans are now being prepared.

#### Contracts Awarded.

**1000TH—Cost not stated.** San Francisco, Architect's name not given. Owners, Pacific Coast Specialties Co., S. P. Contractors, Fink & Schindler Co., S. E. Contract price not stated. The booth will be erected in the Manufacturers' Palace.

## Sugar Refinery To Build Big Plant.

Property at Humboldt and Louisiana Streets to be Improved With Eleven Story Factory Structure.

Plans have been filed at the office of the Building Inspector by the Western Sugar Refineries for one of the largest plants on the coast. This company is the owner of property at the southeast corner of Humboldt and Louisiana

streets. The new building has been located on the corner of the lot bounded by the street to the east and the street to the south. The building is a 15-story structure, the height of which has been limited by the city to 150 feet. The building will be awarded on the basis of the work very shortly.

#### REMOVAL NOTICE.

W. D. HENDERSON, Patentee of the Henderson Clamp System, has removed to larger quarters, Rooms 487-491 Monadnock Bldg., Telephone, same as before, Kearny 4537.

#### OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—4 story and base, brick and steel, \$85,000, Oakland, Cal. Architect, Clay N. Burrell, Albany Block, Oakland. Owner's name withheld. The building will be erected near Broadway and will cover a large ground area. Plans provide for a total of sixty suites of two, three and four rooms. Interior finish will be of pine, redwood and hardwood. Hardwood floors will be used in the living and dining rooms. There will be steam heat, elevator service, hot water supply and vacuum cleaning system. All suites will have wall beds and private bath rooms. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile and marble. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

RESIDENCE — 1 story and base, frame, \$5,000, Berkeley, Alameda Co., Cal. Architect, none. Owner, E. R. Spitzer, 815 Oxford street, Berkeley.

The dwelling will be erected on the north side of Marin street near The Circle, and has been designed to contain six rooms, bath and sleeping porch. Interior will be finished in pine and hardwood veneer with some white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

FIRE ALARM SYSTEM — \$4,000. Livermore, Alameda Co., Cal. Engineer, none. Owners, Town of Livermore. Two bids received by the Trustees for a fire alarm system have been rejected. The reason for rejecting the bids was that the town's finances are not in a condition to justify the probable expense of \$3,000 or \$4,000.

STREET WORK—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. The City Council is considering the reconstruction of Twenty-third street, below the viaduct, on San Pablo from Macdonald avenue north, and a part of the subway.

FLAT—2 story and base, frame, \$4,000, Oakland, Cal. Architects Hutchison Bros., 470 13th street, Oakland. Owner's name withheld. The building will be erected at the corner of 58th and Dover streets, and has been designed to contain four modern flats, each of four rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms. Entrance will be finished in marble. Exterior of the building will be covered with rustic. Plans are now being prepared.

GARAGE—1 story and base. Class B construction, \$10,000, Berkeley, Alameda Co., Cal. Architects, Woollett & Woollett, Newhall Bldg., S. F. Owner, George W. Rodehaver. The building will be erected on north Berkeley street east of Shattuck and has been designed for a commercial garage. There will be steel roof trusses and a cement floor. Metal window frames and sash are specified. Special gasoline storage tanks will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

### OAKLAND HARBOR IMPROVEMENTS

[Commercial Agent W. B. Henderson, San Francisco.]

Municipal and transportation-corporation work in harbor improvement at Oakland, Cal., is already having an appreciable effect on the growth of the city. As different phases of the several projects are completed and a larger use made of them a greater impetus will be given to progress in this section.

The harbor and water-front work at Oakland may be divided into three parts: First, the work under operation and that contemplated by the Federal Government; second, that which is being done by the Oakland municipal government; and third, that under construction by transportation corporations holding leases from the municipal government on the water front. This classification will cover 95 per cent of the harbor and water-front improvement now going forward and for which plans have been perfected.

The Oakland harbor, from its physical characteristics, may be divided into an outer harbor, I. e., the portion of the Bay of San Francisco adjacent

**Government Improvements.**

### Improvements by Transportation Companies.

### Improvements by the Municipality.

The total frontage from the head of the tidal canal around the bay shore to the northern limits of the city that has been or is now being improved is about  $\frac{1}{4}$  miles. Of this, the city retains control of  $\frac{1}{4}$  c., has not leased about one-half. The city's development work is progressing on this retained portion of the water front. The sections selected for first development consists of 1,500 feet of frontage on the west front or outer bay front, and 2,200 feet along the middle pier of the estuary. A bond is now provided for \$100,000 for inaugurating this work.

The section of the municipal wharf that has been constructed on the estuary out of the first appropriation is now nearing completion, the amount of funds available being sufficient to equip the wharves with freight sheds, railroad tracks, and other equipment for freight handling. The estuary from the front of the municipal wharf in this section out of the Government channel has been dredged to a depth of 25 feet in low tide for a distance of 500 feet; while the municipal government has constructed a concrete pier on the upper estuary that gives a berthing space of approximately 700 feet. This is in addition to the rebuilt and re-equipped old municipal wharves with a berthing space of about 600 feet. By the first of the new year the municipal government will have in operation about 3,500 feet of berthing space, including old and new wharves. Already there are applications for their use, which indicate that these municipal wharves will handle during the next calendar year from 100,000 to 500,000 tons of freight that will be new business added to the water-carried commerce of Oakland.

RESIDENCE — 2 story and base frame, \$1,000. San Jose, Santa Clara Co., Cal. Architects, Aitkin & Richards. Theatre Bldg., San Jose. Owner,

**PUNINGLOM**—1 story and base, frame, \$2,000. San Jose, Santa Clara Co., Cal. Architect, none. Owner, A. A. Thomas, 692 North San Pedro street, San Jose. The dwelling has been designed for a five room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be a mesa open to the mantle which is a fireplace. An automatic water heater will be installed. A portion of the house will be covered by a cement porch. The house is a good example of the Spanish style. The plans are complete and in the final stage.

### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA.

**BRIDGE AND CULVERT**—Concrete construction. Cost not stated. Modesto, Stanislaus Co., Cal. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Plans and specifications prepared by the County Surveyor for the construction of a bridge on the Twenty-six Mile House road and a culvert on the Oakdale road have been approved and accepted by the Board of Supervisors and bids for the work will be received until January 12th.

**SCHOOL GROUP**—1 and 2 story and base, brick and steel, \$250,000. Fresno, Fresno Co., Cal. Architect, State Architect, George B. McDougall, Sacramento. Owners, State of California. Plans have been completed for the main building, gymnasium and power house of this institution and figures are now being taken. The main building will be 265 feet long, two stories high with two one story wings. The gymnasium and boiler house will be one story high. The general contract includes the following: Mason work, structural steel and iron, carpentry, metal furring, lathing and plastering, sheet metal work and roofing, painting, staining, glass and glazing, ornamental iron work, marble, tile and electric work. Separate figures have also been called for on the plumbing, gas fitting, vacuum cleaning, steam heating and ventilating and for the installing of the boiler plant equipment in the gymnasium and boiler house. Official proposals for this work will be found under another heading in this issue.

**RESIDENCES**—2, 1 story and base, frame, \$5,000 each. Oakdale, Stanislaus Co., Cal. Architect, Ralph P. Morrill, Odd Fellows' Bldg., Stockton. Owner, A. B. Hasbacher, Stockton. These dwellings will each contain eight rooms and bath. Interiors will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and floors will be used in the bath rooms. Automatic

water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are now being prepared.

### Contracts Awarded.

**BRIDGES**—Timber pile construction. Cost not stated. Fresno, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. Contractor, F. Jones, Fresno. Contract price, \$10,70 per foot. Note: These bridges will be erected over the Kings River Slough on the Fred Turner road.

**BRIDGE**—Reinforced concrete, \$29,000. Fresno, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. Contractor, W. A. Kettlweh, Fresno. Contract price, \$19,680. The bridge will be erected over the Kings River near Sanger. Nine bids were submitted ranging from \$19,680 to \$29,450.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**WHARF BUILDING**—Frame and corrugated iron. Cost not stated. Yuba City, Sutter Co., Cal. Engineer, none. Owners, Feather River Transportation Co., Yuba City. The Feather River Transportation Company has material on the ground and will start the construction of a wharf building at once.

**COUNTY ROAD CONSTRUCTION**—\$12,000. Folsom, Sacramento Co., Cal. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. Through the efforts of Supervisor Russi, a piece of highway will be constructed between Orangevale and Folsom. At the last meeting of the Supervisors plans for the work were ordered prepared for a mile of permanent road starting at the other side of the American River bridge and extending almost to the edge of Orangeville. A reinforced concrete bridge is also included in the work. The estimated cost of the work is \$12,000.

**VOCATIONAL SCHOOL GROUP**—\$100,000 or more. Sacramento, Cal. Architect not selected. Owners, State of California. Prominent educators of the State, headed by A. Bonheim of Sacramento, have interested themselves in a proposition to bring about the establishment of a state vocational school in Sacramento. The legislature will be asked to make an appropriation of \$100,000 for the erection of the first building units of the school, other units to be erected as necessary. The North Sacramento Land Company has offered to donate a site of thirty acres for the proposed building, and the parties interested have also offered an ideal site on Auburn Boulevard, near Ben Ali, three miles from Sacramento proper.

## BUILDING CONTRACTS SACRAMENTO COUNTY.

## CONSTRUCTION WORK ABROAD.

### CHINA.

**Proposed Waterworks for Mukden.**  
A Chinese company, under the name of Tien Po Kung Sheng, has proposed to the Governor General of Manchuria to install waterworks in Mukden. The proposed system is to be constructed at a cost of about \$1,000,000. The project is to be carried out in three stages. The first stage is to be completed in 1915, the second in 1916, and the third in 1917. The project is to be carried out by the Tien Po Kung Sheng company, which is a Chinese company. The project is to be carried out in three stages. The first stage is to be completed in 1915, the second in 1916, and the third in 1917. The project is to be carried out by the Tien Po Kung Sheng company, which is a Chinese company.

by road with the south side. There are no practical difficulties in the way of carrying out the plan.

[Vice Consul General Paul R. Josselyn, Canton, Oct. 23.]

#### New Buildings and Building Projects in Canton.

There has been considerable building activity in Canton during 1914, in both the foreign quarter of Shameen and the Chinese quarter, particularly along the river front of New Bund. It is expected that the war in Europe may cause foreigners to put off any future building schemes until conditions become normal, but work is going ahead on the buildings already in course of construction. A considerable amount of material from the United States is used in building work, particularly in the larger and more modern buildings erected by or to be used by foreigners; but this material is imported into Canton for the most part by British and German houses. It consists of lavatory fittings, door and window hardware, lighting devices, rods for reinforced concrete construction, and lumber, chiefly California redwood, for floors and interior finish.

#### Principal New Buildings.

Of the buildings recently completed or nearing completion may be mentioned the following:

The Bank of Taiwan (Japanese), just completed, is a modern structure of brick and reinforced concrete, three stories in height, erected at a cost of about \$35,000. It is 120 feet long by 80 feet wide. The bars for the reinforced concrete and the metal used for the interior walls were supplied by an American firm. The wood used in the interior finish is teak on the ground floor and California redwood above. Other American material used in the building consists of doors and window hardware, bath room and lavatory fittings, skylight glass and electric lighting devices.

The Victoria Hotel, the foreign hotel on Shameen, is building a large addition that will enable foreign visitors to Canton to secure much better accommodations than has been possible heretofore. The new building is four stories in height and cost approximately \$86,000. It is of brick with wooden floors and a flat concrete roof. The hotel will have 60 guest rooms, of which 33 will have bath rooms attached. The plumbing is to be modern, a septic tank being installed underneath the building. The bath room and lavatory fittings and door and window hardware are of British manufacture.

The wood used for floors and interior finish is teak and Japanese oak. It is expected that the hotel will be completed and ready for occupancy by January 1, 1915.

The Missions Building, situated on the New Bund, is owned by a syndicate composed principally of American missionaries, and will be used as a store and general office building. It is of brick and reinforced concrete, five stories in height, and cost approximately \$25,000. The bars for the reinforced concrete and the hardware and plumbing fixtures were imported from the United States. The brick used is of sand lime manufactured by a Chinese company using American brick-making machinery, which was imported and sold to them by a German firm in Canton.

The administration building for the

China Baptist Publication Society, situated at Tung Shan, Canton, is a two-story brick and reinforced concrete building, 50 by 100 feet. Doors, windows and interior finish are of California redwood. The building cost \$8,500.

Directly opposite the custom house on the river front a customs examination shed 266 by 48 feet has been recently completed. The base is of granite with a brick superstructure, steel casement and trusses, and tile roof. On the water side is a steel jetty supported on screw piles, with a reinforced concrete floor. This jetty runs practically the whole length of the examination shed.

Other construction work in Canton includes a block of three-story brick flats for the foreign staff of the Chinese postal administration, which will cost \$23,000; a telephone exchange building costing \$25,000; an additional story and septic tank for the French hospital costing \$13,000; and a women's hospital costing \$6,500.

#### Projects for 1915.

The most important building project for 1915 is the new custom house, in modern Renaissance, four stories high, which will cost \$130,000. The main facade is 152 feet long, and the building has a depth of 72 feet. Granite from Kowloon, brick, and reinforced concrete are to be the construction materials. In the main offices the floors will be of tile, supplied by a British firm; other floors will be made of teak. There will be a dome clock tower, the top of which will be 105 feet above the pavement. The lavatory fittings are of British and the elevator of American manufacture. It is expected that the structure will be completed by the end of 1915.

The works department of the customs has also completed plans for the erection of a new post office and administration building for the Chinese Government post office, and work will be commenced in about two months. This building will have three stories and a basement and will be built of brick and reinforced concrete, 215 by 165 feet. It is to cost approximately \$56,000.

The Young Men's Christian Association is putting up a building in the Spanish-American style of architecture, three stories in height, to cost \$50,000, which was subscribed in the United States. On the ground floor will be the lobby and offices, billiard room, gymnasium reading room, and an auditorium 71 by 35 feet, with a seating capacity of 2,000. This room will have a sloping floor and a suspended gallery. The gymnasium will be 72 by 40 feet, with locker room and running track. Between the auditorium and the gymnasium will be an open swimming pool 60 by 20 feet, made of concrete and lined with tile. On the second floor will be classrooms and a dining room and kitchen, and on the third floor the dormitories for members. Kabin bars for the reinforced concrete are to be used, but the structural steel for the roof trusses, beams, etc., is to be supplied by German manufacturers. The hardware, lavatory fittings, filter for the swimming pool, etc., have not yet been purchased. The building was started in August, 1914, and is to be completed by January, 1916.

#### Private Buildings Projects for Next Year.

Among the private buildings at present under course of construction may be mentioned the Karanja Building, which will be 130 by 80 feet, four stories high, built of brick and reinforced concrete, with a flat reinforced concrete roof. California redwood will be used for doors, windows, and interior finish. The plumbing supplies and bath room fittings, hardware, etc., have not yet been purchased. The building will be provided with an elevator. The excavation work is about completed and the building is to be finished by the end of 1915. It will cost approximately \$73,000.

A pair of three-story semi-detached houses of brick with reinforced concrete floors with cost \$32,000. The Chinese are also putting up a number of two, three and four story brick and concrete buildings in foreign style, to be used as hotels, shops, tea houses, etc.

[The names of architects and contractors for some of the buildings mentioned may be obtained from the Bureau of Foreign and Domestic Commerce or its branch offices.]

#### SOUTH AFRICA.

[Consul E. A. Wakefield, Port Elizabeth, Oct. 26.]

#### Harbor Improvements at Port Elizabeth.

An addition to the head of the North Jetty, at Port Elizabeth is being built by the Government Harbor Board under the supervision of the harbor engineer. It fits on the end of the Jetty like a cap having an octagonal-shaped end, thus affording a sheltering wing for each side of the jetty. Jetties are constructed of steel piling with heavy floors and afford little or no protection, but the extension now building will be sheathed with steel sheet piling which will protect passengers landing in rough weather.

Very few vessels discharge cargo alongside the jetties in Port Elizabeth and there are no docks. Passengers are always transferred in the harbor tugs. The harbor engineer has furnished the following information concerning the work: Length of extension, 50 feet; greatest breadth, 160 feet; foundation piles, Phoenix column section, 52 feet; bracing channel iron, 12 by 3½ inches; outer facing, steel sheet piling to be driven 8 or 9 feet into sandy bottom; flooring, corrugated steel finished with concrete and asphalt; time of construction, about six months; cost, \$100,000.

#### ROYAL COMMISSION RECOMMENDS INDUSTRIAL CHANGES.

#### Drastic Measures to Be Taken to Protect Labor in New South Wales Silver Mining Districts.

Captain J. W. Nisbigh, Chief Publicity Officer for New South Wales, Australia, is in receipt of the following report from three commissioners appointed by the Parliament to investigate conditions in the silver mines at Broken Hill. The report of these commissioners is of interest to the American public, inasmuch as very similar conditions prevail in our great silver mining districts. The report deals primarily with working condi-

abandonment, especially for the poor, and for foreigners, has been reduced, heavy taxes have been taken care of by the government, and the country is not known for its poverty. The country receives charity privately.

The production of masts in Europe should be estimated for September at 55 per cent of the normal and for October at not more than 10 per cent.

1. That no person suffering from tuberculosis be permitted to work underground.

The unemployed population on the 1st of October in the nitrate plants of Tarapaca should be estimated at 28,000. The unemployed population of the towns and ports can be estimated at 5,000, bringing the total unemployed up to 33,000, half of whom are heads of families.

There has been no public fiscal undertaking to check the depopulation of the Province. There have left at the expense of the Government 22,016 unemployed from Iquique and 676 from Pisagua. Of these 8,452 were Chileans who were sent south; the others were Bolivians and Peruvians sent to Arica and Mollendo.

There are still large numbers of unemployed in the Province, and it is feared that unemployment will increase to an alarming extent if production should average as low as 60 per cent of the normal for any considerable period.

The commission's report furnishes the details of costs of rations provided by the government. An average of about 2,000 people per day have been taken care of there and private charity has taken care of 500 or 600 per day. There is no prospect of a reduction in numbers of persons supplied from the messes; on the contrary, the number will increase with the increase in the number of unemployed.

It is likely that work will soon be started on the extension of the Longitudinal Railway from Pintados to Iquique, and on the municipal waterworks. These will offer temporary employment to many laborers. Both the railway and waterworks will be duplications of European enterprises already in operation.

FROM THE ELECTRIC FIELD,

The Fink & Schindler Company has been awarded the contract for the erection of the booth for the Pacific Coast Specialties Company of Oakland, California, to be located in the Manufacturers' Palace. The Pacific Coast Specialties Company will exhibit the Franz Premier Vacuum Cleaner.

[Consul David J. Myers, Iquique, October 22.]

About 3000 electrical vehicles are in use in Europe. The United States leads in the use of the electric automobile.

The government is erecting a new radio station at San Diego, Cal.

An electrical device has been invented to "cure" logs and lumber to prevent sap staining.

An instantaneous electric water heater is now made, which gives hot water on demand. By turning the faucet to the left hot water is obtained and by turning it to the right cold water flows.

An electric floor scrubber will clean some square feet of floor an hour. The scrubber consists of a motor driven brush and tanks for clean and dirty water.

Electricity is being used as a source of heat and power in large cotton factories.

The supercar, designed to be built at New York, may well be the first American hot rod to be driven by a female model.

The main telephone telephone exchange and cables in the Zone are being placed in an underground conduit system stretching entirely across the Isthmus and adjacent

From  $P_{\text{max}}$  and  $T_{\text{max}}$  we can calculate the maximum power  $P_{\text{max}}$  and maximum torque  $T_{\text{max}}$  of the motor:

$$P_{\text{max}} = \frac{U_{\text{max}}^2}{4R_{\text{a}}} \quad (1)$$

$$T_{\text{max}} = \frac{U_{\text{max}}^2}{4R_{\text{a}}} \cdot \frac{1}{\omega_{\text{max}}} \quad (2)$$

where  $U_{\text{max}}$  is the maximum voltage,  $R_{\text{a}}$  is the armature resistance, and  $\omega_{\text{max}}$  is the maximum angular velocity.

in electric railways, because of approx-  
imate equality between the use of fuel  
in Texas and the use of gas in the west  
south. Throughout the long Texas  
summer, which began in April and  
month of the year people travel by  
electric lines, who use possibly a  
most exclusively, in order to avoid the  
smoke, and dirt incident to steam rail-  
way travel.

Uncle Sam's great money factory in Washington is one of the wonderful sights of the world. Housed in a building one foot higher than its wings each 28 feet deep, it takes 1,500 panes of glass to admit light to its four stories. The structure is the bureau of engraving and printing is built of Indiana limestone and it presents to the shining Potomac which it faces, a row of columns on the front as imposing as those on the east side of the treasury.

This probably is the finest manufacturing plant in the world in point of scientific equipment to conserve the health and comfort of its inhabitants. Two of the great roofs are given over to the employees for recreation purposes, one for men and the other for the women.

A hospital equipped for surgical operations and physicians of each sex are provided. The hospital treats about forty-five patients a day for accidents and illness, but many of these troubles are of a minor character. As more than 4,000 men and women are employed in the building, some of them working nights, about 1 per cent only require medical attention, *Chicago News*.

The  $\bar{K}$  and  $\pi$  mesons are the members of the  $\bar{K}$  and  $\pi$  octets of the  $U(6) \times U(6)$  group which describe the  $U(6) \times U(6)$  symmetry breaking in the  $U(6) \times U(6)$  quark model. The  $\bar{K}$  and  $\pi$  mesons are the members of the  $\bar{K}$  and  $\pi$  octets of the  $U(6) \times U(6)$  group which describe the  $U(6) \times U(6)$  symmetry breaking in the  $U(6) \times U(6)$  quark model.

## HIGHWAY ENGINEERING.

Much has been heard, especially during the past eight years, about the primary considerations that should govern in the selection of materials and methods for building various types of roads and pavements. It is fair to say that highway work would be further advanced and on a basis comparable with other engineering problems if the generally accepted principles derived from scientific research and the practical experience of recognized experts had been more generally adopted and applied.

It must be admitted that highway engineering has not kept abreast of the times as compared with other branches of engineering. As a matter of fact, the problem which presented itself with the advent of the automobile and the consequent revolutionizing of traffic conditions is just beginning to be solved, and while it is true that the highway problem would not be so serious as regards county roads were it not for the automobile, it is equally true that it never received the attention it deserved and was generally looked upon lightly by both engineers and public officials; and the highway departments afforded splendid opportunities to parcel out jobs to men from all walks of life and without any qualifications for the work.—Good Roads.

## FIRE PREVENTION BY PROPER CONSTRUCTION.

By National Board Fire Underwriters.

The general public think that fire insurance rates are too high, and that the expense of conducting the business is too great. It is encouraging to note that people are taking an interest in the subject, and are coming to understand that any increase in expenses, fire losses, taxes, etc., must fall upon the assured. As they come to a fuller realization of this fact, they will make greater efforts to reduce these items of expenditure, thus securing corresponding reduction in cost of insurance.

There is another reason for such interest. Property destroyed by fire is a dead loss to the public, no matter if it is insured. The indemnity is collected from many persons insured in the company and given to the person suffering the loss. Hence there is no such thing as a loss being covered by insurance. It should be said that the loss is distributed over a large number of people instead of being borne by one person, but it is a loss just the same.

This is forcibly illustrated by the terrible fire which recently destroyed the large manufacturing plant of Thomas A. Edison, the great inventor and manufacturer. The first accounts of the fire placed the loss at \$7,000,000. In announcing the fire the newspapers said that insurance of \$2,000,000 reduced this loss to \$5,000,000. If these figures are correct, the financial loss to the Edison Company was reduced that much, but the loss itself was total. Not only was there a heavy financial loss, but the loss to science and art and commerce is beyond computation. Even if the entire financial value of the plant could have been distributed among all the policyholders, the ultimate loss could not possibly be covered.

This and every other fire is an object lesson on the need of fire prevention

not only by proper construction but by eliminating the danger from exposing buildings. It is these large conflagrations that make violent increase in the fire waste, already enormously large from innumerable smaller fires. Until the cause of the Edison fire and its spread among the buildings constituting the plant has been determined, we do not know whether this loss could have been prevented. Most of our fires can and should be prevented, and this great drain on our resources thereby checked.

On the question of fire insurance rates and expense, we can judge by making comparison with countries elsewhere. Insurance Commissioner Epstein of Colorado, has compiled statistics showing the relative cost of insurance and conducting insurances companies in various European countries and in the United States. From these figures it appears that if the fire loss in the United States were no greater than in Germany the insurance rate, would by comparative figures, be lower here than there. Counting everything above the loss as expenses, it is found that the expense ratio of fire insurance companies in Germany is forty-seven per cent, while in the United States it is only forty-two per cent.

It is fair to assume that fire insurance is as economically conducted in Germany as in any other European country, because Germany is regarded as one of our most thrifty and careful nations. It seems, therefore, a good showing for the companies in the United States to be able to furnish insurance at an expense ratio less than ninety per cent of the ratio in Germany.

## TITLES FOR BUILDINGS.

The State Architect of New York has made the excellent suggestion that titles such as "poor house," "almshouse," "home for the aged," etc., be dropped. There is no question but that names for buildings used for charitable purposes are selected usually with more regard to designating the exact purpose of the structure than accords with good taste. Sometimes, however, the designations employed border upon the ludicrous. For example, one state has a home for "disturbed females." The same state also called for bids recently for constructing cottages at the institution for "untidy males." In another advertisement it was stated that proposals were wanted for erecting a dormitory at the "home for indignant women." It took some investigation to find out that a typographical error had transformed "indigent" into "indignant."

## AMERICAN COMMERCE WITH AUSTRALIAN STATES.

[Consul W. C. Magelssen, Melbourne, Victoria, Sept. 24.]

Owing to disturbed conditions among some of the Continental countries of Europe, which interfere with the commercial relations between those countries and Australia, American manufacturers and exporters should be in a position to supply a larger share of the import trade than at present.

France, Germany, Belgium, and Austria-Hungary supplied \$18,784,490 worth of the total imports into, and

from, the consular district of Melbourne \$46,396,900 worth of the exports borne during 1911. The district comprises the States of Victoria, South Australia and Western Australia.

The following is a partial list of the principal articles furnished by the countries named are given in the order of their importance, as follows:

From Austria-Hungary: Vienna chairs, china and parian ware, and glassware.

From Belgium: Iron and steel pipes and tubes, bar and angle iron and steel, canvas and duck piece goods, sheet glass, plate glass, iron and steel plates and sheets, glassware, nails, iron and steel ingots, fishplates, carpets, electrical materials.

From France: Plushes, india-rubber goods, stiles, machinery, glassware and oils.

From Germany: Wire, iron and steel, cement, wire netting, velvets and velveteens, manufactures of metals, chemicals, electrical appliances and machinery, rubber manufactures, machinery, china and porcelain ware, glass and glassware.

The articles exported from Australia to the foregoing European countries are wool, zinc and lead concentrates, copper ingots, hides and skins, and fresh fruits.

## Inquiries Regarding American Goods.

Since the outbreak of war and the consequent cessation of supplies from some of the countries at war, inquiries at this consulate for future supplies from the United States have covered principally the following articles: Cement, electrical wire and cables (covered), iron and steel (girders, beams, joists, hoop, and plain—not galvanized), electrical machinery and appliances, machinery of all kinds, iron and steel wire, wire netting, velvets and velveteens, chemical, hardware, glassware, bentwood chairs (Vienna), china-ware, enamel and aluminum ware, furniture, carpets, linoleums, curtains, desks, etc. All of these lines American manufacturers should be in good position to place on this market.

## Trade Information at Consulate—Merchants Leaving for United States.

Since the outbreak of war the trade indexes and commercial publications on file at this office have been sought by large numbers of Melbourne businessmen.

A number of local merchants realized early the necessity of getting into immediate touch with American houses and took the first available boat for the United States. Another contingent left later on a similar mission.

American trade with Australia should be a reciprocal one. At present this country seeks purchasers for the following products: Wool, hides, rabbit, hare, and sheep skins, copper in matte, and lead and zinc concentrates. The Australian people want American goods at all times, but are not always in a position to secure them.

American manufacturers should enter the market with a view to making it permanent. They should study the business methods employed here. These methods have been satisfactory to European exporters, who have enjoyed the greater share of the trade.

## Steamship Service—Banking Facilities.

Three steamship lines are at present maintaining regular services between Australia (Sydney) and the west coast of North America—two from Vancou-

r and one from San Francisco, the latter being the Oceanic Steamship Co., with vessels sailing under the American flag. There has been no increase in freight rates since the outbreak of war. The opinion has been expressed here that if the United States government would subsidize a line of steamers insuring a regular fortnightly service between San Francisco and Australia (the present service is monthly) and reduce the time of voyage from 19 to 15 days, trade would be greatly encouraged.

The writer interviewed a number of prominent business men relative to the advisability of opening an American bank in Melbourne. Their opinion was that an American bank could be a success in Australia only in the event that it could offer the merchants better inducements than the local or British banks. At present the merchants are well taken care of by British banks. The Australian banks, owing to a long period of prosperity, are able to assist the trader in a satisfactory way.

**The Transcontinental Railway.**  
Work on the Transcontinental Railway has progressed steadily. It is expected that it will be completed for traffic by January 1, 1917. American locomotives and large quantities of American steel rails will be employed in its building.

**ONE GREAT POWER PLANT FOR ALL USE ADVOCATED.**

WASHINGTON, D. C., Dec. 19, 1914.—Economic operations demand one great power plant supplying electric current throughout the United States, according to views expressed by W. A. Breckenridge of the Southern California Edison Company and constructor of Niagara Falls power plant, who appeared before the Senate Public Lands Committee in opposition to the water power sites leasing bill. He assailed the bill as being opposed to such centralization.

**FUNDS TO BE RAISED FOR ROAD IMPROVEMENTS.**

PENDLETON, Oregon.—The Umatilla County Court has levied a tax which will provide \$100,000 for roads and bridges and out of this fund the court plans to appropriate enough to complete the macadamizing of the road between Pendleton and Milton.

**CONTRACT AWARDED FOR EXHIBIT BOOTH.**

The Fink & Schindler Co. has been awarded the contract for the erection of an exhibit booth for Messrs. G. Galleazzi & Sons, which is to be located in the Palace of Liberal Arts. This firm contemplates exhibiting acrobats.

**MANILA ROPE STRONG AS STEEL.**

Weight for weight, 4 manila rope used for power transmission is as strong as a solid bar of steel, according to authorities. On the other hand, the same rope is only 13 1/2 per cent as strong when its cross section is the same as that of the metal bar, such as is used for a tugboat cable. A five per cent the strength of such a like cross section and is stronger than 40 per cent as strong when it is of

**BUILDING AND LIVING NEEDS**

corresponding to the weight of the rope and cable. The reason for this is that the rope is made of fibers which are bound to their position by the friction of the fibers against each other. The two are constructed of the same material. Fibers from the same tree are usually twisted together to form a rope of great strength, and possess great tensile strength, but lack that quality transversely. It is for this reason that the fibers, to be broken into four pieces within a rope, taking it into times dangerous, although apparently strong externally. (Popular Mechanics)

**THE ARCHITECT IN FRANCE.**

It is unusual in France, however small, to be erected in France without the service of an architect, who not only draws the plans but actually superintends the work, says an exchange. Usually it is he who orders the building material and assures himself that its quality is up to the requirements. The contractor and his workmen perform their duties in conformity with the architect's orders, and the latter, who is usually a man of capital, advances the funds required in order that the contractor need not wait for payment until the building is completed. Moreover, the French law imposes on the architect a serious responsibility, since he, as well as the contractor, is responsible for all defects of construction during a period of ten years.—Building Age.

**DEPARTMENT OF THE INTERIOR.**

Bureau of Mines.

New Publications, (List 33.—December, 1914.)

**BULLETINS.**

Bulletin 76. United States coals available for export trade, by Van H. Manning. 1914. 13 pp.

Bulletin 77. The electric furnace in metallurgical work, by D. A. Lyon, R. M. Keeney, and J. F. Cullen. 1914. 276 pp., 56 figs.

**TECHNICAL PAPERS.**

Technical Paper 76. Notes on the sampling and analysis of coal, by A. C. Fieldner. 1914. 56 pp., 6 figs.

Technical Paper 94. Metal-mine accidents in the United States during the calendar year 1913, compiled by A. H. Fay. 1914.

NOTE.—Only a limited supply of these publications is available for free distribution, and applicants are asked to co-operate in insuring an equitable distribution by selecting publications that are of especial interest. Requests for all papers can not be granted without satisfaction. Free publications should be ordered by number and title. Applications should be addressed to the Director, Bureau of Mines, Washington, D. C.

**TO START CONSTRUCTION ON NEW FRESNO SCHOOL.**

FRESNO, Cal., Dec. 20.—The construction of the new Fresno school, which is being built on the corner of Broadway and Broadway, is well advanced. The building is a two-story structure, and is being constructed of concrete and steel. The estimated cost of the building is \$100,000. The building is to be completed by the end of the year.

**AWARDED CONTRACT FOR DISPLAY BOOTH.**

The Fink & Schindler Co. has been awarded the contract for the erection of an exhibit booth for Messrs. G. Galleazzi & Sons, which is to be located in the Palace of Liberal Arts. This firm contemplates exhibiting acrobats.

**BUILDING THE LUNGHANOOK VIADUCT.**

The construction of the Lunghanook viaduct, which is being built on the corner of Broadway and Broadway, is well advanced. The building is a two-story structure, and is being constructed of concrete and steel. The estimated cost of the building is \$100,000. The building is to be completed by the end of the year.

**EDISON'S REMARKABLE INVENTION TO BE EXHIBITED AT FAIR.**

An exhibit of Edison's remarkable invention, which is being built on the corner of Broadway and Broadway, is well advanced. The building is a two-story structure, and is being constructed of concrete and steel. The estimated cost of the building is \$100,000. The building is to be completed by the end of the year.

## RUSSIA'S MARCH TO THE SEA.

From the Kansas City Star.

It is announced that Germany has a half a million Russian prisoners and the world wonders at the Russian loss, provided the figures are anywhere near correct. So far as Russia is concerned, attention is centered in this country on the fighting that is going on in Poland.

But possibly in Russia the Polish campaign is considered more in its relation to another phase of the war. Russia can get on with things as they were in the West. What it wants particularly is the command of the outlet of the Black Sea. Constantinople is its aim.

For three centuries Russia has been struggling to break through to the sea. It is icebound in the White Sea, where it is supreme. It marched east to the Pacific and then Japan blocked its way to an ice free port. With the Kiel Canal Germany commands the Baltic. Constantinople stands guard over the passage from the Black Sea.

This passage into the Mediterranean is of the greatest importance to Russia. The great plains that stretch away from the Black Sea to the north are the granary of Europe. They are to that continent what the Mississippi Valley is to America. With the development of steam power the Russian farmers can readily get their crops to the Black Sea ports for water shipment throughout Europe. But they can exercise that water shipment only by grace of the power that holds Constantinople.

In the season a constant procession of vessels of all nations laden with grain passes through the Bosphorus, the Sea of Marmora and the Dardanelles into the Mediterranean. Two years ago, when Turkey closed the Dardanelles in the month of May, during its war with Italy, two hundred vessels were bottled up in the harbor of Constantinople, commerce has been a nightmare to Russia.

Three times in the Nineteenth Century it moved its armed forces toward the Bosphorus, and three times its way was blocked by other nations, jealous of the control of that strategic outlet. In 1828 Russian armies reached Adrianople, only 150 miles away; in 1854 only the force of England and France kept them back, and in the war of '78 they were at the very doors of Constantinople—Tsarigrad, the King's City, as it was called in Russian—when they were once more deprived of the fruits of victory by the powers at the Congress of Berlin.

"Owing to her geographical position," wrote the Austrian statesman Radetsky, in his memoirs, "Russia is the national and eternal enemy of Turkey. Russia must therefore do all she can to take possession of Constantinople, for its position alone will give her the necessary security and territorial completeness."

In the present war Russia must be looking forward to the achievement of its purpose to obtain free access to the sea for its far-stretching harvest fields.

There is a crusade on against the police department by the Chronicle and Examiner. Their methods are unfair and unjust to the department and so far as the public is able to judge it is impossible to tell whether or not there is any merit in their contentions. This winter will naturally be a bad one for

crime. Men have been out of employment for a year and ex-convicts and that class of men generally will find it hard to make a living even if they so desired. In addition the opening of the Exposition will attract the criminal element to this city and the police department, under the best of management will have its hands full. In the meantime no good is going to be done by misrepresenting the city and acting as if the police department had suddenly been turned over to thugs, burglars, and highwaymen.
